NEW YORK

COUNTRY BRANCH
WHITE PLAINS
NEW YORK

INTERN SERVICE

The house staff consists of six interns, each serving for two years. Appointments are made in April, August and December, and only those who have served a general hospital internship are eligible.

Application blanks will be sent upon request.

ANNIE C. KANE FELLOWSHIPS

Eight fellowships to be known as the Annie C. Kane Fellowships have been established at this hospital. These fellowships offer to selected young surgeons who have first completed their internship in this hospital an opportunity to continue their training in orthopedic surgery for from three to five years, and will carry a substantial annual salary.

SUN ROOM—PRIVATE PATIENTS' PAVILION

REPORT OF THE PRESIDENT

To the Board of Trustees and Board of Supervisors,

LADIES AND GENTLEMEN :

During the past year an event of great value not only to our hospital, but for the future of orthopedic surgery in general, was the gift by the trustees of the Estate of the late Mrs. John Innes Kane of a principal sum of one million dollars, the income from which is to be used for establishing and maintaining fellowships in orthopedic practice and surgery under the control of the trustees of the New York Orthopædic Dispensary and Hospital. The vision of the trustees of this Estate in recognizing the need in the medical profession for opportunities for uninterrupted specialized study will be widely commended; their decision to make our hospital the chief beneficiary of the fund and to entrust us with the responsibility of administering it, is a cause for pride and gratification. Five fellowships have been granted and others will follow in due course; the qualifications of the recipients in each case receiving the careful consideration of the committee appointed by the Board.

Last spring the Hospital purchased the property No. 439 East 58th Street. This house, adjoining on the east the building occupied as an office by Hope Farm, will, while it remains in our hands, afford us a reasonable security against the easterly light in our wards being interfered with.

Additional x-ray appliances and a rearrangement of the x-ray machinery have improved and strengthened this department. The result of these changes has been very satisfactory, for the importance of superior x-ray technique in our class of surgery cannot be exaggerated.

The decoration of the children's wards has been so successful and so favorably noticed, that two additional wards are now being done. The work has been entrusted as heretofore to Miss Ordway, and the cost is being met by generous gifts from Mrs. Henry P.

Russell, and Mrs. A. Murray Young. The decoration of a third ward is promised for next year.

A comparative study of the amount of work done in the dispensary and in the hospital wards, shows that these figures do not vary greatly from year to year. The quality of the work, however, is maintained at a high standard, and with the development of orthopedic surgery under the leadership of Dr. Hibbs and the Staff of our hospital, the percentage of cures has materially increased.

The post graduate course for nurses which was established a year ago has an enrollment of nine for a period of three months training. This course has been very successful and has been of real value, while the policy adopted last year of employing graduate nurses throughout has been fully justified by results.

Last year the total receipts credited to the City Hospital totaled \$371,000., and they slightly exceeded expenses. The indications are that this year receipts will be in excess of \$400,000., which by careful management will cover expenses and leave a modest balance to be carried to reserve. This is gratifying and reflects credit upon the Superintendent and her associates in the management of the hospital.

COUNTRY BRANCH

The financial situation at the Country Branch differs from that at the City Hospital for the reason that the endowment given by the late Miss Emily Watson while yielding an income sufficient to meet the cost of conducting the work as it was some years ago, does not cover the expenses of the Country Branch now. The plant has been enlarged and the patients there require active care and the services of graduate nurses; this hospital no longer being primarily a convalescent home. The income from endowment, from paying patients and from the United Hospital Fund which last year amounted to \$183,000, will this year be increased by about \$5,000., but will fall short of expenditures by some \$34,000. This in spite of careful management and the earnest efforts of the Superintendent. The importance of the work of the Country Branch and the gratifying results obtained fully warrant its efficient maintenance. The prospect of a deficit in this account was

laid before the Trustees last year, so that we are not taken unawares, and we hope to see the endowment fund there increased by gifts for that purpose.

In June last Dr. Herman Le Roy von Lackum, an attending surgeon in this Hospital, met a tragic death in an aeroplane accident and our institution suffered a grave loss thereby. A man of great personal charm and of the highest character, he possessed rare skill in his chosen branch of practice which promised a brilliant future in the field of orthopedic surgery. His death is not alone a source of grief to his associates and friends but a serious loss to the profession.

In closing this report I wish to express on behalf of the Board of Trustees, to the Staff, to the Administration and to the Employees, for their faithful service and loyal co-operation our warm and grateful appreciation.

Respectfully submitted,

ROBERT S. BREWSTER,

President.

REPORT OF THE BOARD OF SUPERVISORS

*To the Trustees of the New York Orthopaedic
Dispensary and Hospital,*

GENTLEMEN:

The success of the past year, as of so many of its predecessors, has been due to the interest and ever increasing kindness of our many friends. We are again deeply indebted to them and to the auxiliary societies for their unfailing help.

The Orthopaedic Hospital Sewing Society has given the linen used in the hospital.

The Junior Guild has supported a free bed, supplied all the clothing for the children on the 6th Floor and paid the salary of a visiting nurse.

The Orthopaedic Hospital Red Cross has made a quantity of surgical dressings.

The Orthopaedic Hospital Guild has supported four free beds, besides supplying linen and clothing for the two Girls' Wards.

Mrs. Charles B. Alexander, Mrs. Robert S. Brewster, Mrs. Whitelaw Reid, Mrs. Henry White, Mrs. A. Murray Young, Mrs. Sanford Procter, Harry F. Knight and the Junior Guild have again most generously given towards the support of the visiting nurses, without whom our hospital work would be sadly handicapped.

Two more wards have been charmingly decorated this year through the kindness of Mrs. Russell and Mrs. Young. These frescos add tremendously to the cheerfulness of the ward and the happiness of the patients.

Christmas was as usual a very happy day both in the Hospital and the Dispensary. Christmas tree and greens made the Wards and Dispensary bright and gay. Christmas baskets were given the patients' families; there were presents for every one, no one was forgotten—thanks to the generosity and thoughtfulness of the members of our Board, the Orthopaedic Guild and the Junior Guild.

As we look back on the past year with gratitude to all our friends for their interest and kindness, one sad event will always be remembered when we think of 1928: the tragic death of Dr. von Lackum, a gifted sympathetic surgeon, whose loss will always be felt by everyone connected with the Hospital.

Respectfully submitted,

CORA OLIVER CHOATE,
Secretary.

MEDICAL LIBRARY

REPORT OF THE SURGEON-IN-CHIEF

*To the Board of Trustees of the New York Orthopaedic
Dispensary and Hospital,*

GENTLEMEN :

We began the year 1928 with 17,127 patients under treatment and during the year received 8,929 new cases, making the total number of patients 26,056 treated in the institution during the year.

Of this number 1,461 had joint tuberculosis, 9,081 deformities of the feet, 1,261 non-tuberculous deformities of the spine, of which 309 were developmental. There were 916 cases of fractures, of which 134 were of the spine; 2,793 cases were paralytic deformities and the remaining 10,544 suffered from a great variety of deforming diseases. (Table I).

This table also shows the results of treatment where it appears that 494 were discharged cured, 3,014 discharged relieved, making a total of 3,508 individuals who were restored to a condition of health where they required no further treatment. 6,778 were discharged for others reasons, many of them having come simply for diagnosis, others for neglect, leaving 15,750 under treatment at the end of the year.

Table II shows that the total number of revisits made in the Dispensary was 63,545; the number of visits by new patients was 8,929; the number of visits by visiting nurses to patients at their homes was 6,878, making a grand total of 79,352. The number of patients visited by nurses at their homes was 3,845.

Table III shows in detail the manufacture of braces in the shop, the total number of new instruments made was 3,140 and the number repaired 3,398.

CITY HOSPITAL. The number of patients in the hospital on January 1, 1928 was 90. The number admitted during the year 857; 869 were discharged, and 4 died, leaving 78 in the hospital on January 1, 1929. The average number of patients in the wards each day was 88, and the average stay of each patient was 34 days. There were 110 waiting for beds at the end of the year.

The number of free days was 26,570, there were 5,695 pay days, and 5,464 private days.

There were 7,586 patients X-rayed and 17,823 X-ray films were taken. (Table VIII).

In the Private Pavilion 205 patients were treated during the year. I am glad to report that the Pavilion was run with a small profit.

The operative work in the City Hospital has been as active as its capacity permits, the total number of operations being 1,351 and the number of patients operated on 1,021. (Table V).

COUNTRY BRANCH. The number of patients in the hospital at the beginning of the year 1928 was 162; 284 were admitted, 288 discharged, none died, leaving 158 in the hospital on January 1, 1929. The total number of patients treated for the year was 446, and the average duration of stay was 131 days. The number of free days was 42,919 and the number of pay days was 15,461. (Table VI).

The Pathological Laboratory report appears in Table VII and really applies to both hospitals. It shows that the total number of examinations made during the year was 6,494.

Table IX shows the report of the X-ray Department of the Country Branch, where 1,175 patients were x-rayed, with 1,704 films made.

A statistical report such as has just been given presents a very inadequate idea of the volume of work performed in both Hospitals and the Dispensary from day to day throughout the year in the detailed treatment of the patients. For instance, the operating room in the City Hospital is active from eight to twelve o'clock three mornings a week and often four, with two operating tables in use and sometimes three, necessitating from twelve to fourteen surgeons, six nurses, two anesthetists and one orderly working under great pressure, with the average number of operations six to ten a day, and yet we are always behind in our operative work.

Our Dispensary Department, open every afternoon from one-thirty to six o'clock, has a staff of one attending and seven assistant surgeons, with the chief surgeon or his associate, and six nurses; the X-ray Department, consisting of the director, three technicians and one librarian; the Physiotherapy and Massage Department consisting of the director and eight assistants, so that you will see in personnel we have a very large organization. I am glad to report that the Pathological Department, which heretofore has not been well organized, will, after the first of March, have a full time pathologist.

At the Country Branch we have two house men and one attending surgeon, with the chief or his associate making rounds once each week and the whole staff once a month.

The Department for the Study of End Results has been increasingly active during this year, and there is no work we do

which is of more far-reaching importance, because it is the best means we have of knowing the results of our work and it stimulates us to the development of better methods of treatment.

One of the most important pieces of work which has been finished this year was the study of the end result in the treatment of Potts Disease (Tuberculosis of the spine). This was a report of 286 cases which, with a previous one of 210 cases, made a total of 496 cases treated from 1911 to 1920, both inclusive. It was found that 74 plus per cent of these patients were entirely well, living normal, active lives, free from disease, and in this connection it may be said that as time goes on and diagnostic methods are improved, which will make possible earlier operation, the percentage of cures will be greatly increased. This study has been published and some of you have seen copies of it.

Another interesting and valuable report about ready for publication is the study of 154 cases of knee joint tuberculosis, covering a period of twelve years, from January, 1915 to November, 1926. It must be remembered that in all this sort of work the patients are examined in the institution and a careful study made of their result. You can appreciate, therefore, what a very difficult undertaking such work is. Without going into detail in regard to this report it is sufficient to say that we found no case in which the disease had recurred after a fusion operation was done. It is doubtful if any case of this disease of the knee has ever gotten well except where a fusion was done by operation or else by nature, and the latter result rarely occurs.

Another study just finished is that of the end results in the treatment of 150 cases of developmental abnormalities of the spine. This report has now gone for publication. A study of the end results in 150 cases of operative removal of loose cartilages from the knee joint is nearly finished. From this series the result was 100 per cent cured. All these important pieces of work have been done by Fellows. A great deal of work is being done in this department all the time among a great variety of cases in general and will eventually come to publication as time permits.

The most important event in the hospital was the establishment of our Fellowship plan made possible by the gift of one million dollars from the Kane estate. This became available after January, 1928, and since then five Fellows have been appointed and are now active in service. This is not only important in the education of surgeons, which is its primary object, but is of very great importance also in the improvement in the work of this institution. These men are active all the time in the routine work of the hospital and in addition have special problems upon which they

are working. I shall be very happy when all the Fellowships which the fund will support have been filled by appointments.

The Medical Library which was established last year is of increasing importance as its use by the whole staff is becoming more constant and general. We have now a total of 950 volumes and the current medical journals. There was added to the library this year the medical library of Dr. Newton M. Shaffer, who by bequest left it to the hospital, also books of Dr. Henry Ling Taylor which were presented by Mrs. Taylor. Dr. Taylor was the son of Dr. Fayette Taylor the first Chief Surgeon of this hospital.

I think it is fair to say that there has been during the year a gradual improvement in the work all along the line; more careful supervision of our patients and more careful records kept of their histories.

Teaching efforts in this institution have been carried out during the year as usual for the students of Columbia University.

Dr. H. Le Roy von Lackum, attending surgeon to this hospital, was instantly killed in an aeroplane accident on June 30, 1928. Dr. von Lackum was a graduate of the University of Iowa and, after his internship in a general hospital, desiring to specialize in orthopedic surgery, he secured the appointment on the house staff of the Orthopaedic Hospital, where he remained until his death, first as a house officer for four years, then as attending surgeon for the remainder of his eleven years' service. His devotion to the hospital was complete, and his service to our patients was constant and devoted.

He was an able teacher and had been made an assistant professor at Columbia University a short time before his death. His contributions to surgery had already been of conspicuous value, and his future seemed to be one of great promise. His loss is deeply felt by all his associates and friends both in the hospital and out. A fund of fifty thousand dollars is being raised to establish a memorial in the hospital and will be used to endow a room in the Private Pavilion.

Respectfully submitted,

RUSSELL A. HIBBS,

Surgeon-in-Chief.

REPORT OF THE SUPERINTENDENT

*To the Board of Trustees,
New York Orthopaedic Dispensary and Hospital,*

GENTLEMEN :

I have the honor to submit herewith the Superintendent's report of the Dispensary and Hospital for the year 1928.

The total expenditure of this institution for the year was \$397,424.44. This was approximately \$26,000 more than the previous year. The running expenses of the hospital department were \$182,830.51; there were 32,265 patient days, thus making the cost per patient day \$5.67. The running expenses of the Dispensary Department were \$83,824.24; fewer visits to this department this year caused the cost per treatment to increase from \$1.01 to \$1.12. The cost per visit by the nurses to the homes was \$1.64.

You will notice in the statistical tables the work which has been done in all the departments of the institution. I also refer you to the treasurer's report for the detailed accounting of the income and expenditures.

The work for the year has gone on much the same as in previous years. There have been but few changes in the departments.

An ambulatory library was inaugurated for the patients on the wards last December. Visits are made two afternoons each week to the wards, the circulation of books amongst the patients amounting to 8,276 volumes during the year. We have only about 1,000 books for the patients and we hope very much to add to this library this year. The patients' library is handled by our Medical Librarian, and through her suggestions and supervision it has proved a most satisfactory feature in helping to keep the patients contented and happy.

The Occupational Therapy Department, which has been established for the past six years, has been very active and I only

hope that we will be able to add to our staff of workers another year.

The building has received the usual amount of attention. Most of the furniture in the Private Pavilion was done over and the walls painted. A great deal of painting was done in the Hospital building also. The walls of two of the wards on the fourth floor were decorated with mural decorations.

Several changes were made in the X-ray Department in the arrangement of the rooms, and a new x-ray machine was installed; this was to replace one which has been in use for some twelve years.

For the past five years, through the generosity of Mrs. Edward S. Harkness, we have sent children away for about six months to a very lovely home which she has established at New London, Connecticut. This has meant very much in the life of the child both physically and mentally.

It is a great pleasure to express my appreciation of the earnest and devoted spirit of co-operation which I have received from every individual connected with the hospital.

On behalf of the staff I wish to thank the Sewing Societies, Guilds, and all others who have associated themselves in any way with the hospital during the past year.

Respectfully submitted,

THEODORA S. ROOT,
Superintendent.

ORTHOPAEDIC HOSPITAL GUILD REPORT

The report of the past year is much the same as the year 1927. We have kept our linen closets well filled as usual, and have furnished the necessary clothing, bedding, etc., for twenty beds. Owing to the good work of our members of the Guild, we are able to take care of twenty children. We have paid for 3 endowed beds, a sum of \$1,050. Mrs. Huntington Norton, as usual, has very kindly filled our Xmas stockings for our Wards. Mrs. Overton's Red Cross Unit has done great work the past year, having made surgical dressings for the entire hospital.

Respectfully submitted,

FLORENCE B. FLEMING,

Secretary.

REPORT OF THE ORTHOPAEDIC HOSPITAL SEWING SOCIETY

The annual report of the Orthopaedic Hospital Sewing Society for the year 1928 should in a measure be encouraging to the members who give so generously of their time and money to keep the linen closet filled.

Though fewer articles were added during the year we had on hand January 1, 1929 one thousand and eighty-six more articles than on January 1, 1928.

Number of articles on hand January, 1928	5,625
Number of articles added during the year	3,841
Total	9,466

Number of articles used during the year	2,758
Number of articles on hand January, 1929	6,708

During the past year we have lost two associate members through death and two active members have resigned. It is with deep regret we report the loss of these valuable members.

Respectfully submitted,

KATHERINE M. LUCE,
Secretary.

REPORT OF THE JUNIOR GUILD

There is no new feature to report in our work during the past year. Miss Bispham takes Miss Chalmer's place as our Visiting Nurse. A Rummage Sale in October and a Movie given at the Heckscher Theatre in the Spring, together with our dollar appeals bring in the necessary amount of money.

Respectfully submitted,

KATE S. R. RAND,
Secretary.

REPORT OF THE JUNIOR GUILD

From January 1, 1928 to December 31, 1928, inclusive

Receipts		Disbursements	
Balance, January 1, 1928	\$1,775.70	District Nurse	\$1,555.00
Interest	22.25	Material	14.42
Rummage Sale	1,126.50	Clothes	47.50
Movies, Heckscher Theatre	966.65	Printing	500.50
Dues	260.00	Heckscher Theatre Expense	118.50
Donations	452.00	Endowed Bed	350.00
		Ice Cream and Potatoes	100.00
		Easter Ice Cream	9.60
		Rummage Sale Expenses	49.50
			<u>\$2,745.02</u>
		Bank Balance, December 31, 1928	1,858.08
	<u>\$4,603.10</u>		<u>\$4,603.10</u>

The Appeals for 1928 have not yet been issued. This accounts for the low total of the donation item. This item stood at \$1,459.00 in the 1927 statement in response to the appeals for that year and the item of \$452.00 in the 1928 statement was donations received from appeals, etc., in 1927.

REPORT OF THE SUPERINTENDENT OF THE COUNTRY BRANCH

*To the Board of Trustees of the New York Orthopaedic
Dispensary and Hospital—Country Branch.*

GENTLEMEN :

The report of the Superintendent of the Country Branch for the year ending December 31, 1928, is herewith submitted :

At the beginning of the year there were 162 patients at the Country Branch ; 27 adults, 130 children between the ages of 2 and 16, and 5 under 2 years. There were 284 new and readmissions during the year ; 110 adults, 168 children between the ages of 2 and 16 and 6 under 2 years. 286 patients had been discharged and 2 died, leaving 158 in the hospital at the end of the year. The average daily census was 159, making the percentage of occupancy .957. The per capita cost for the year was \$3.82 per diem.

The work of improving and reconditioning the buildings has continued and progressed. A new cafeteria-service dining room for the employees has been completed and in use for several months. The wooden railings have been removed from the copper roofs, the roofs re-seamed, the leaders renewed and repaired, and a new Barrett Roof put on the East Wing playroom.

In addition to the general routine repair work in the Engineering Department, two of the boilers were completely retubed and relined, and all discarded pipe in all buildings removed.

An extensive program of painting has been carried out during the year. The Main Building, East and West Wings, the Superintendent's Cottage and all buildings of the tenant property have been re-painted on the outside, and all necessary inside painting in East and West Wings and the Cottage has been completed. Much furniture was refinished, including the ward dressers and chairs and all dining room furniture.

A Hobart mixing machine and an Edison toaster have been added to the equipment of the kitchen, thus increasing the efficiency of this department.

The scope of the school work has been broadened by the addition of High School studies. Through the generosity of the A. E. Society of New York, it has been possible for many of the older boys and girls to receive instruction in stenography and typewriting under the expert teaching of Miss Julia Law. Much interest has been manifested in these classes.

The Occupational Therapy Department continues as heretofore to bring interesting occupation into otherwise inactive hours. The department, during the year, has been reconditioning the wheel chairs which seemed ready for discard so that they are practically as good as new; making monogrammed bureau covers for the West Wing and repairing broken toys and doll houses. The patients have enjoyed this phase of the work and the hospital benefited.

Scout activities have come to be an important part of the lives of both boys and girls while here. Miss Vivian Hall, Scout Leader of White Plains, has very faithfully conducted the meetings of the Girl Scouts and the honor of winning the Girl Scout Trophy came to our band at the White Plains Rally in June.

Mr. John W. MacDowell has been present, or sent an able substitute, to conduct the Sunday morning services for the patients, while Mrs. McDowell has taken charge of the Kindergarten class at the same hour.

We are always grateful to those who bring happiness to the children, and so, to Mr. Silas Clark and Capt. Frank Goodale is due the sincere thanks of all who have enjoyed the many moving pictures which they have provided.

Another source of pleasure to all our patients is the completion of the radio system which furnishes entertainment in all wards and assembly rooms throughout the buildings. The Gedney Farm Association, with Mrs. Howard Willets as chairman, made this installation possible. This same Association gave everyone a happy time at Christmas by a wonderful celebration, and throughout the holidays our grounds were gay with a beautifully decorated, growing Christmas tree, the gift of Mr. and Mrs. Howard Willets.

Our circle of interested friends is an ever growing one and that many organizations and individuals have thoughtfully contributed to the pleasure of the patients by providing music, entertainments, special parties and gifts will be noted by referring to the lists recording these.

The annual outing to Bronx Park, given by the White Plains Order of Elks, was this year, as always, a gala occasion.

Whatever progress may have been achieved toward our aim, the greatest measure of service to our patients, has been made possible by the sympathetic understanding and loyalty of all members of our Staff and workers. For their cheerfulness and singleness of purpose toward this end we have the deepest appreciation.

Respectfully submitted,

STATIRA M. BRIDGMAN,
Superintendent.

FORM OF CERTIFICATE TO THE DONOR OF AN
ENDOWED BED IN PERPETUITY

New York Orthopaedic Dispensary and Hospital

This is to Certify that the New York Orthopaedic Dispensary and Hospital through its Trustees has received from

.....
herein designated as the donor, a fund of Seven Thousand Five Hundred Dollars, for the purpose of founding and maintaining in accordance with its corporate powers an endowed bed in its Hospital in perpetual memory of

.....
The donor shall have the privilege of nominating the occupant of said bed, but such nomination and the use of said bed shall be subject to all such rules and regulations governing endowed beds, and providing for the treatment, reception and discharge of patients as now exists or which may hereafter be enacted by the Board of Trustees of said Dispensary and Hospital.

Witness this corporate seal of the New York Orthopaedic Dispensary and Hospital, and the signatures of two of its officers, this.....day of.....one thousand nine hundred and.....

.....
Secretary.

.....
President.

FORM OF BEQUEST

I bequeath to the New York Orthopaedic Dispensary and Hospital, a corporation incorporated under the Laws of the State of New York, the sum of..... dollars to be applied to the benevolent uses and purposes of said hospital.

NEW YORK ORTHOPAEDIC DISPENSARY AND HOSPITAL

420 EAST 59TH STREET

*Open from 1 to 3 P. M. Daily (Sundays and Legal Holidays Excepted)
for the Reception and Treatment of Patients*

OBJECTS OF THE INSTITUTION.—“To furnish treatment to the poor with special reference to the Diseases and Deformities of the Spine and the Hip Joints and other of the more serious diseases of the bones and joints requiring surgical and mechanical treatment, and for giving instruction in the same.” All cases of deformity, besides those mentioned, including Club Foot, Lateral Curvature of the Spine, Infantile Paralysis, Bow-Legs, etc., are received and treated.

RULES GOVERNING THE ADMISSION OF PATIENTS TO THE DISPENSARY DEPARTMENT.—Professional services are rendered gratuitously. Those who can afford to do so are expected to reimburse the Institution for the actual cost of apparatus. Payment for apparatus is received in installments, if required. Apparatus, however, is never *sold* to patients or others, the Institution reserving the right to remove the apparatus and discharge any patient not complying with the directions of the Surgeons. Apparatus will not be supplied in any case that does not come under the immediate care of the Institution.

RULES GOVERNING THE ADMISSION OF PATIENTS TO THE HOSPITAL DEPARTMENT.—Any suitable Orthopedic case may be admitted. Application for admission may be made at the Hospital during the regular Dispensary hours.

RULES GOVERNING THE ADMISSION OF PATIENTS TO THE COUNTRY BRANCH.—Applications for admission to this Hospital are made through the City Hospital, and only patients who are under treatment at the City Hospital will be admitted to the Country Branch.

THE MEDICAL PROFESSION and the public generally are invited to visit the Institution.

THE INSTITUTION is supported by the contributions of the benevolent. Contributions, which are earnestly solicited, may be sent to the Treasurer.

INTERNE SERVICE

The house staff consists of six internes, each serving for two years. Appointments are made in April, August and December, and only those who have served a general hospital internship are eligible.

Application blanks will be sent upon request.

ANNIE C. KANE FELLOWSHIPS

Eight fellowships to be known as the Annie C. Kane Fellowships have been established at this hospital. These fellowships offer to selected young surgeons who have first completed their internship in this hospital an opportunity to continue their training in orthopedic surgery for from three to five years, and will carry a substantial annual salary.

REPORT OF THE PRESIDENT

To the Board of Trustees and Board of Supervisors,

LADIES AND GENTLEMEN :

While there have been no outstanding events during the year 1929 in the life of the New York Orthopædic Dispensary and Hospital, I think that, as we review the past twelve months, we may feel satisfied that the high standards which have distinguished the work of our hospital have been fully maintained. Several items however, may be reviewed which indicate progress and which all tend to the improvement of the institution.

Changes were made in the power plant of the City Hospital, substituting oil fuel for coal.

The building formerly occupied by Hope Farm at 437 East 58th Street was purchased, and as the hospital already owned 439 East 58th Street, it would seem that our property was now fully protected on the east. It is hoped that the two buildings may be combined and with suitable alterations made to yield a revenue sufficient to carry them as an investment.

A very important measure was adopted by the Trustees and put into effect last March when the charges for recurring visits to the Dispensary were omitted. This has resulted, as expected, in a material reduction in revenue, but has justified itself on other grounds. The number of visits and the number of patients have increased, and the work in the Dispensary and in the Massage and Scoliosis departments has been thereby stimulated.

The use of the Private Pavilion has been about the same as last year, and while it has not averaged much in excess of 50% of its capacity, the receipts have more than covered expenses and the surplus has been used to supplement the general income of the hospital. In this connection it will be appropriate to mention the success attending the raising of a fund in memory of the late Dr. von Lackum. The goal of \$50,000 was reached and passed and

the fund now amounts to about \$58,000. The income of this principal fund is to be used for the hospital expenses of members of and those connected with, the medical and other professions. It has already been put to this use and has been very greatly appreciated.

The budget of the City Hospital for 1929 adopted last January indicated a prospective deficit of \$5,500. That this will be somewhat exceeded is due to the loss of revenue resulting from the remission of Dispensary charges.

Under the provisions of the Kane Fellowship Fund, six fellowships have been granted representing an annual charge against income of \$34,000. The appointees have been carefully chosen and are men of promise. Other fellowships will be granted as opportunities occur from the balance of income available.

On June 5th was celebrated the 25th Anniversary of the opening of the Country Branch at White Plains. A play was given by the children (patients of the hospital), a reception held for the members of the two boards and invited guests, and opportunity was given to visit and inspect the buildings.

This branch of our work, originating as a convalescent and open air home for some thirty children, now comprises a very complete plant with a bed capacity of 160; many of whom require and receive active hospital care and service.

A welcome addition to the equipment of the Country Branch is a new and very excellent greenhouse, the generous gift of a member of the Board of Trustees.

This greatly enlarged service has meant much heavier expenses, but it is gratifying to note that the prospective deficit of \$35,000 indicated in the budget for 1929 will probably not exceed \$26,000.

This satisfactory condition as well as the control of expenses in the City Hospital reflect great credit upon the superintendents at White Plains and in New York, to whose careful management this result is largely due.

The endowment funds of the Hospital have been increased through gifts and legacies during the past year to the extent of \$52,000. The Lloyd legacy amounting to approximately \$300,000 is expected to be paid within a very short time.

Our hospital has lost a warm friend and loyal patron in the death of Mr. Percy R. Pyne, who joined the Board of Trustees in 1903. Faithful in attendance, generous in his support of our work, he had the affection and regard of his associates who feel deeply the loss of his companionship and his counsel and advice.

While this report cannot undertake to touch on the professional side of the work of the hospital, the annual report of the Surgeon-in-Chief and the published records of Dr. Hibbs and his associates show continued progress in the science of orthopedic surgery. It is a very remarkable record of cures effected in lines formerly regarded as incurable, and where at best only moderate relief could be hoped for. As this is the object for which our hospital was founded and for which we are all striving it is gratifying to feel that the New York Orthopædic Dispensary and Hospital stands at the forefront in this humanitarian work and that we close the year with a record of real accomplishment.

To the staff and their associates and to the management and the employees for faithful and devoted service I express the appreciation and thanks of the Trustees and Supervisors.

Respectfully submitted,

ROBERT S. BREWSTER,
President.

REPORT OF THE BOARD OF SUPERVISORS

*To the Trustees of the New York Orthopaedic
Dispensary and Hospital,*

GENTLEMEN :

One looks back on 1929 with renewed gratitude to our friends and pride in the accomplishment of the past twelve months.

There has been one change in our Board this year. Miss Frelinghuysen who has been a devoted member since 1901, has resigned on account of illness. She was a member of the Educational and the Free Bed Committee and it was with the greatest regret that her resignation was accepted. Miss Caroline White was unanimously elected to fill the vacancy. This brought back to the Board one of its old members whose devotion and interest in the work of the Hospital has never flagged, even during her residence in Washington. The Auxiliary Societies have maintained their usual high standard of efficient help, during the year.

The Junior Guild has paid the salary of a visiting nurse, supported four free beds and given all the clothing for the children on the sixth floor.

The Orthopaedic Hospital Red Cross Unit has made many of the dressings.

The Orthopaedic Hospital Guild has supported four free beds and supplied linen and clothing for the two girls' wards.

The Orthopaedic Hospital Sewing Society has given the linen used in the Hospital and Miss Caroline White has given toward the support of a masseuse.

The visiting nurses have been supported by Mrs. Charles B. Alexander, Mrs. Robert S. Brewster, Mrs. Whitelaw Reid, Mrs. Henry White, Mrs. A. Murray Young, Mrs. L. Sanford Procter, Mr. Harry F. Knight, and the Junior Guild. The work these nurses do and their help to the Hospital can hardly be over-estimated.

The Board always tries to make Christmas happy and joyful in the Hospital and this year seemed especially so. There were Christmas trees in all the wards and Dispensary, presents for every child, patient, and nurse, and the greens and holly made the whole Hospital gay. The nurses had their party, which this year was a theatre party, which was much enjoyed. There was a true Christmas spirit everywhere.

There is no outstanding event which distinguishes 1929 from many preceding years, but the unfailing interest and devotion of the men and women connected with the work here, without which the whole atmosphere of the Hospital would change and deteriorate is more valuable than many great events. For these and to these, the Board can never fully express its gratitude and appreciation.

Respectfully submitted,

CORA OLIVER CHOATE,
Secretary.

REPORT OF THE SURGEON-IN-CHIEF

*To the Board of Trustees of the New York Orthopaedic
Dispensary and Hospital,*

GENTLEMEN :

At the beginning of the year 1929 we had under treatment 15,750 patients carried over from the previous year and received 9,687 new cases during the year, which, with 797 cases who had previously been discharged from the Dispensary and were readmitted, make the total number of patients treated in the institution 26,234. This is an increase in new cases of 758, and in the grand total 178.

Of this number 1,431 had joint tuberculosis, 8,994 deformities of the feet, 1,624 non-tuberculous deformities of the spine, of which 415 were developmental. There were 958 cases of fractures, of which 163 were of the spine; 2,800 cases were paralytic deformities and the remaining 10,427 suffered from a great variety of deforming diseases. (Table I).

This table also shows the results of treatment where it appears that 406 were discharged cured, 3,487 were discharged relieved, making a total of 3,893 individuals who were restored to a condition of health where they required no further treatment. 5,881 were discharged for other reasons, many of them having come simply for diagnosis, others for neglect, leaving 16,460 under treatment at the end of the year.

Table II shows the total number of revisits made to the Dispensary to be 73,412. The number of visits by new patients was 9,687; the number of visits by visiting nurses to patients at their homes was 6,552, making a grand total of 89,651, an increase over the previous year of 10,199. The number of patients visited by nurses at their homes was 3,754.

Table III shows in detail the manufacture of braces in the shop. The total number of new instruments made was 3,884, and the number repaired was 3,358.

CITY HOSPITAL. The number of patients in the Hospital on January 1, 1929 was 78. The number admitted during the year was 856; 850 were discharged, and 4 died, leaving 80 in the Hospital on January 1, 1930. The average number of patients in

the wards each day was 90, and the average stay of each patient was 35 days. There were 134 waiting for beds at the end of the year. 1,572 operations were performed, 1,133 patients were operated on. The number of free days was 21,468, and the number of pay days 11,521, making a total of 32,989 hospital days of care.

The cost per patient day in the ward was \$6.21. The cost per visit in the Dispensary was \$1.02. The cost per day in the Private Pavilion was \$18.46. The cost per visit to patients in their homes by nurses was \$1.63.

In the Private Pavilion 209 patients were treated during the year.

There were 8,028 patients X-rayed and 20,250 X-ray films were taken. (Table VIII).

COUNTRY BRANCH. The number of patients in the Hospital at the beginning of 1929 was 158; 289 were admitted, 282 were discharged, 3 died, leaving 165 in the hospital on January 1, 1930. The total number of patients treated was 447. The average number of patients per day during the year was 154. The percentage of beds occupied each day for the year was 93. The cost per day was \$4.14. The number of free days was 39,908; the number of pay days was 16,358.

Table IX shows the report of the X-ray Department of the Country Branch, where 1,162 patients were X-rayed, with 1,726 films made.

The Pathological Laboratory report appears in Table VII and really applies to both hospitals. It shows that the total number of examinations made during the year was 6,173.

It would require a great deal more detailed study than these statistics and the time at my disposal now afford to give you an adequate appreciation of the volume of work that has been accomplished during the year in all departments of the institutions. Suffice it to say that there has been an increase, most conspicuous in the Dispensary service, and both hospitals have been operated practically at capacity. The quick response shown in the attendance of patients in the Dispensary after the remission of the fees charged is very impressive, in showing the wisdom of that action upon the part of your Board, and the same is reflected necessarily in the admissions to the hospital.

It is obvious that we cannot do good work if anything interferes with our constant and intimate contact with our patients. After all, we have but a single object, and that is, making sick people well, and that object must in all things be our supreme and ever constant consideration. Failing in this particular we fail altogether and our vast expenditures of money are of no avail.

We are hampered now in some degree in the easy transmission of our patients from the Dispensary to the City Hospital, thence to the Country Branch, because of the weakness in our operative facilities. We cannot, with our present operating equipment, avoid holding patients waiting too long for operations in the City Hospital, thus checking this constant flow of patients through the various departments. I see no way of obviating this defect except in a rearrangement of the operating facilities, and I hope very much to see this done at some early date. Its need may be appreciated by the comparison of the total number of operations in the year 1917 (the first complete year in this building), which was 932, with the number in 1929, which was 1,572.

With such a change as is here suggested we could take care of a larger number of patients with very little increase in the cost and thus meet a larger need. As you already know, the waiting list for admission to the hospital is constantly from 125 to 200.

There are other weaknesses in our equipment to which at some time I wish to call your attention, such as room for an increased house staff, better laboratory facilities, and certain other rooms for the housing of nurses, et cetera.

The aspect of the work, however, which I am most concerned to emphasize to you, is the increasing thoroughness with which it is done, because it is by this means that surgical methods are improved and more cures effected. There can be no question but that in this particular each year definite progress is made.

A new clinic has been established which illustrates this, and is called a Follow-up Clinic. It was begun March 12th and is held from 9 to 12 every Tuesday morning. This clinic is concerned with a more careful immediate follow-up of every patient discharged from either hospital. These patients are assembled and carefully examined by the staff as a group, so that a thorough check-up may be made upon the results of their treatment. Such work in the first place gives an opportunity to perfect methods of treatment by having under constant observation the patients who have been subjected to those methods, and it brings all the staff in contact with them, thus stimulating their activity in the study and perfection of those methods. During this period 832 patients have been examined in this clinic.

This new clinic does not take the place of the End Result Clinic, long established, but is co-ordinated with it and makes more thorough the work in that clinic, which is concerned only with the end result study of methods of treatment long after their application. This clinic is operated constantly during the entire year, and is conducted in a little different way. Certain definite problems are given to various members of the staff, chiefly fellow-

ship men, for intensive study. The results of these studies become the finished product of the institution's surgical activities and are published as such.

There is no aspect of the work of this institution of greater importance and of more far-reaching influence than that of the treatment of joint tuberculosis. As you know, the Country Branch has been in operation some twenty-six years, and was built especially for the treatment of joint tuberculosis. By the older methods of treatment comparatively few cases were ever cured, though they remained under treatment for indefinite years. Methods of diagnosis were very inaccurate, so that many cases were subjected to long periods of treatment who never had the disease at all.

Eventually, through the studies of cases over long periods of time at the Country Branch and work in the City Hospital, a complete revolution has taken place in our conception of this disease, methods of diagnosis and of treatment.

In 1911 the fusion operation was introduced, first for spinal tuberculosis and gradually the same operative principle was exercised in the treatment of all joints, so that now all these cases, after accurate diagnosis is made, have a fusion operation and are quickly cured. Since 1911, 1,269 cases have been operated. The time saved is shown by the fact that while formerly they remained in the hospital six or seven years in many instances, and continued under treatment in the Dispensary indefinitely, now they remain in the hospital on an average of about one year, and are definitely cured, requiring no further treatment. Under the older methods the mortality from the disease was very high. For instance, in a study of 150 cases of hip joint tuberculosis the mortality was 24%, while now it is negligible.

Such a radical departure from accepted routine necessarily aroused a great deal of interest and some antagonism. I am glad to say, however, that as time has gone on these methods are being accepted all over the world for the treatment of this disease.

It is inevitable that we must always be making progress or the institution dies, and progress necessitates, as you know, mounting budgets, but without progress any budget is largely a waste of money.

Our fellowship system has been in operation two years and we have now, working as active fellows, six men. This experience confirms our conviction that no development in connection with the institution's life has been more important. Not only are we giving men opportunities for perfecting their knowledge and equipment,

but in doing so we are effecting a vast improvement in the care of our patients.

The plan to raise a fund of \$50,000 for the endowment of a room in memory of Dr. H. Leroy von Lackum was very successful, and was over subscribed, a total of \$57,949.29 being given by 409 of his fellow-workers and friends. The fund was given to the hospital for the endowment of a private room and it became available the first of April 1929, and the room has been constantly in use ever since.

That this room is meeting a very definite need is shown by the fact that nine individuals have occupied it, members of various professions,—doctors, physicians' families, nurses, ministers and missionaries—thus giving a private room to people who otherwise would be unable to occupy one. Certainly there could be no memorial more fitting to Dr. von Lackum.

Respectfully submitted,

RUSSELL A. HIBBS,
Surgeon-in-Chief.

REPORT OF THE SUPERINTENDENT

*To the Board of Trustees,
New York Orthopaedic Dispensary and Hospital,*

GENTLEMEN :

I have the honor to submit herewith the Superintendent's report of the Dispensary and Hospital for the year 1929.

The Dispensary, which is the admitting department of both the Hospital and the Country Branch and which also treats ambulatory patients, recorded 83,099 visits in its various departments during the year, an increase of 10,625 visits over 1928. The total expense of maintaining the Dispensary was \$84,391.47, the cost per visit being \$1.02.

With the exception of Sundays and holidays, the Dispensary is open every afternoon for the admission of patients. Two separate services of three days each cover the week. The doctors in the Dispensary are all fully occupied in examining patients and directing their treatment, and the Dispensary is seldom closed before 6. p. m.

Assigned to each assistant surgeon in the Dispensary is one of our Visiting Nurses. In addition to assisting with the patients on their visits here, it is her duty to follow the cases in their homes, doing dressings, adjusting braces and, when necessary, investigating financial conditions and all questions of social welfare.

Dispensary patients are sent to the Physiotherapy, X-ray and Dental Departments, and to the Pathological Laboratory, as

conditions indicate. Each of these departments is an invaluable factor in the diagnosis and treatment of the patients.

The Physiotherapy Department has shown steady progress during the year. Visits numbered 37,519, an increase of 7,283 over 1928. The women engaged in this department are all trained workers and have been in our service a long period of years. They work under the direction of the Dispensary surgeons. Massage is also carried on in the wards.

The Dental Department, which is operated as an auxiliary to the orthopedic end of the work, gave 2,353 treatments. All patients admitted to the wards have their teeth thoroughly examined and cleaned. Those who are to remain for any length of time in the wards, or who are to go to the Country Branch, have their teeth put in perfect order and they are so kept throughout the stay of the patient. Two dentists are in the department, each two afternoons a week, and a dental hygienist is employed full time. A dentist is also in attendance one or two full days a week at the Country Branch. This department is supervised by an attending dentist.

The Department of Visiting Nurses and Social Service plays a very important part in the work in both the Dispensary and the Hospital, as well as in the homes of patients. Ten graduate nurses are employed. During the year 6,552 visits were made by nurses to the homes of patients at a cost of \$1.63 a visit. These visits represent only a small part of the work done. The time of one nurse is almost entirely taken up in clinics which are held for students from the College of Physicians and Surgeons, and in the follow-up clinics for patients. In the Dispensary one nurse helps in the plaster-cast room every afternoon. Another nurse is retained for the operating room where minor dressings are done. Four nurses are assigned each afternoon, as previously stated, to the four assistant surgeons to help with patients. The arrangement of having each Dispensary patient, when admitted as a new case, assigned to a definite nurse and doctor to follow them through the period of their treatment in this institution has proved most satisfactory. It is through this means that we know our individual patients and are enabled to help them to the best advantage.

The X-ray Department has steadily continued to expand. The number of X-rays taken this year was 18,073, as against 12,398 in 1928. More and more the X-ray is becoming a highly important factor in the work of correct diagnosis.

In the Pathological Laboratory 6,173 tests were made. We hope that as time goes on more research work will be done.

The Brace Shop has made 3,884 instruments throughout the year. The use of braces has changed very radically in the last ten years and the number required is gradually decreasing.

In the Hospital there were 32,989 ward days' care. The total expense of operating the hospital was \$204,889.30, making the daily cost per patient \$6.21. The average length of stay of each ward patient was 35 days. The total number of free days' care was 21,468. The days' care paid for by patients or by City Aid numbered 11,521. It is worth noting that applicants for treatment come not only from all over Greater New York, but from various parts of New York State and many other states as well.

The Private Pavilion, a small separate unit having thirty-two rooms, is maintained for the use of the doctors on the active staff of this Hospital.

The nursing service in the Hospital and Private Pavilion has been carried on most successfully during the year. The post-graduate course in orthopedic nursing, which is here offered to graduate nurses, has been continued. It enables us not only to provide the Hospital with nurses trained especially for this branch of nursing, but to graduate nurses who are fitted to carry on orthopedic work elsewhere. Twenty-three nurses were graduated in 1929. In the Private Pavilion the nursing is done only by our own graduates.

During the past year we were most fortunate in our permanent staff of nurses. They have not only taken excellent care of the patients, but have contributed much toward making them happy and contented, a factor which plays an important part in their recovery.

The Housekeeping Department has carried on very satisfactorily. Many necessary repairs have been made, the walls have been redecorated, and the usual standard of up-keep and good order has been maintained. The Dietetic Department has undergone certain changes for the betterment of the work.

In the engine room the coal-burning system has been supplanted by an oil-burning system for heating the building. A great deal of repairing has been done here. As the building grows older with the passing years, we find that the up-keep presents more of a problem. Each year it becomes necessary to spend more money in the engine room and on the stationary equipment throughout the hospital.

The Medical Library has amply proved its worth. The volumes now total 979, and we are most fortunate in that some of these are valuable old editions. The library for the patients, which is carried on in connection with the Medical Library, has 1,315 volumes. It is essential to add new books from time to time and discard old ones. This circulating library has done much to relieve the monotony of the patient's stay in the wards. In the very nature of the case, the patient's day is a long one, and we are pleased that through the library, occupational therapy and the school which is carried on in the wards, they are enabled to pass many hours happily and with benefit to themselves.

The Appeals Department has been functioning steadily throughout the year. The hard times which were felt in the autumn by people who usually contribute to charity affected us to some extent as it did other organizations. This department is a valuable one to the hospital, for not only do its activities bring money into the treasury, but friends are attracted who become interested in helping the institution carry forward its work.

All departments of the Dispensary and Hospital are so closely associated that one cannot think of one without the other. Even the records for both are kept as one, and when patients are transferred to the Country Branch, their records and X-rays are transferred with them.

In summing up our activities for the year, I find that our problems remain much as they have been. We have made gains and progress in some directions, and it is gratifying to note that we have been able to maintain the high standard of treatment for our patients. This has been made possible through the unfailing devotion of the workers and through the generosity of friends and contributors who have given the institution financial support.

I wish to express our sincere appreciation to the following benefactors: To Mrs. Edward S. Harkness for providing a summer home in the country for twenty-eight of our little patients; to the Orthopaedic Hospital Red Cross Unit for making surgical dressings for use in the operating room; to the guilds, organizations and all individuals who have so generously contributed not only in money and material but in personal service.

Respectfully submitted,

THEODORA S. ROOT,
Superintendent.

ORTHOPAEDIC HOSPITAL GUILD REPORT

The work of the Guild during the past year has been very satisfactory. The Guild Ward has been well supplied with linen, and Mrs. Higgins' Red Cross Unit has accomplished wonderful work in the number of dressings made. Great appreciation is extended to Mrs. Higgins, and those who have helped her so faithfully. The Guild has paid for three endowed beds during the year amounting to \$1,050. Mrs. Huntington Norton very kindly filled the Christmas stockings as she has done in the past, and the cake sale held at the residence of Mrs. J. Todhunter Thompson last April netted a sum which greatly helped the Treasurer's account. During the past year we regret to announce that we have lost two valued members by death—Mrs. James A. Blair and Mrs. Charles G. Peters.

Respectfully submitted,

FRANCES BACON PAINE,
Secretary.

REPORT OF THE ORTHOPAEDIC HOSPITAL SEWING SOCIETY

The annual report of the Orthopaedic Hospital Sewing Society for the year 1929 varies somewhat from the previous year.

Notwithstanding the fact that through the generosity of the members of the Society 1,282 more articles were added to the linen closet during 1929, January 1st, 1930 finds us with 1,680 fewer articles than January 1st 1929.

Number of articles on hand January 1st, 1929.....	6,708
Number of articles added during the year.....	4,123
Total	<hr/> 10,831

Number of articles used during the year.....	6,645
Number of articles on hand January 1st, 1930.....	5,128

During the past year the Society has lost through death and resignation four members. It is with deep regret we report the loss of these loyal and devoted associates.

Respectfully submitted,

KATHERINE M. LUCE,
Secretary.

REPORT OF THE JUNIOR GUILD

There is no new feature to report in our work for the past year. During the Lenten season we meet every Wednesday morning at the residences of different members of the committee, and make garments for the children in the wards. The Rummage Sale held in October, together with the dues, donations, and our yearly appeals, bring in the necessary amount of money.

Respectfully submitted,

KATE S. R. RAND,
Secretary.

COUNTRY BRANCH—WHITE PLAINS, N. Y.

REPORT OF THE SUPERINTENDENT OF THE COUNTRY BRANCH

*To the Board of Trustees of the New York Orthopaedic
Dispensary and Hospital—Country Branch.*

GENTLEMEN :

The report of the Superintendent of the Country Branch for the year ending December 31, 1929 is herewith submitted :

The year just passed marked the twenty-fifth anniversary of the opening of the Country Branch. There have been many changes in the physical aspect of the plant since that momentous opening day when the institution looked like a large country dwelling, with its French windows and open verandas, set in an apple orchard. Four large wards, now school and living rooms, each with a capacity of 13 patients have been replaced by three buildings with a total capacity of 165 patients. The patient days during the first year were: 16,006 days; this year 56,266 days. 4 patients were discharged that first year and 282 this year. The entrants this year were 289, over 5 times the total capacity of the first year. The average stay of the first 50 patients was 1,868 days or 5.12 years. The average stay of the last 50 patients discharged during the year 1929 was 302 days or practically 10 months. The total cost the first year was \$20,502.55, a per capita of 1.37; and this year \$233,128.16, a per capita of 4.14. The first year the idea was more that of a home-school where the patients were to be educated and taught to be self-supporting. The patients took part in the home care of the buildings; swept, dusted, washed dishes, etc., every patient was of school age, and there were no bed patients. Today our patients are all surgical and range in age from less than one year to fifty-eight years, constantly needing the active care of surgeons and nurses. While there have been many changes, one idea has ever prevailed; that is, that the patient should be treated individually and the best possible done for him to start or re-establish him in society.

During the year the various departments have functioned much the same as in the past and the general routine repair and upkeep work has continued.

The outstanding gift of the year was a greenhouse from William Adams Delano, one of our Trustees. Other gifts and entertainments from our circle of interested friends are recorded in the respective lists.

We wish to extend our sincere appreciation to all friends of the hospital who have shown their interest in our work and its development during the past year, and especially wish to thank those who have directly contributed to the welfare and happiness of the patients.

Respectfully submitted,

STATIRA M. BRIDGMAN,
Superintendent.

The sum of \$7,500 endows a bed in perpetuity, and the sum of \$350 endows a bed for one year.

FORM OF CERTIFICATE TO THE DONOR OF AN
ENDOWED BED IN PERPETUITY

New York Orthopaedic Dispensary and Hospital

This is to Certify that the New York Orthopaedic Dispensary and Hospital through its Trustees has received from

herein designated as the donor, a fund of Seven Thousand Five Hundred Dollars, for the purpose of founding and maintaining in accordance with its corporate powers an endowed bed in its Hospital in perpetual memory of

The donor shall have the privilege of nominating the occupant of said bed, but such nomination and the use of said bed shall be subject to all such rules and regulations governing endowed beds, and providing for the treatment, reception and discharge of patients as now exists or which may hereafter be enacted by the Board of Trustees of said Dispensary and Hospital.

Witness this corporate seal of the New York Orthopaedic Dispensary and Hospital, and the signatures of two of its officers, this.....day of.....one thousand nine hundred and.....

Secretary.

President.

FORM OF BEQUEST

I bequeath to the New York Orthopaedic Dispensary and Hospital, a corporation incorporated under the Laws of the State of New York, the sum of..... dollars to be applied to the benevolent uses and purposes of said hospital.

NEW YORK ORTHOPAEDIC DISPENSARY AND HOSPITAL

420 EAST 59TH STREET

*Open from 1 to 3 P. M. Daily (Sundays and Legal Holidays Excepted)
for the Reception and Treatment of Patients*

OBJECTS OF THE INSTITUTION.—"To furnish treatment to the poor with special reference to the Diseases and Deformities of the Spine and the Hip Joints and other of the more serious diseases of the bones and joints requiring surgical and mechanical treatment, and for giving instruction in the same." All cases of deformity, besides those mentioned, including Club Foot, Lateral Curvature of the Spine, Infantile Paralysis, Bow-Legs, etc., are received and treated.

RULES GOVERNING THE ADMISSION OF PATIENTS TO THE DISPENSARY DEPARTMENT.—Professional services are rendered gratuitously. Those who can afford to do so are expected to reimburse the Institution for the actual cost of apparatus. Payment for apparatus is received in installments, if required. Apparatus, however, is never *sold* to patients or others, the Institution reserving the right to remove the apparatus and discharge any patient not complying with the directions of the Surgeons. Apparatus will not be supplied in any case that does not come under the immediate care of the Institution.

RULES GOVERNING THE ADMISSION OF PATIENTS TO THE HOSPITAL DEPARTMENT.—Any suitable Orthopedic case may be admitted. Application for admission may be made at the Hospital during the regular Dispensary hours.

RULES GOVERNING THE ADMISSION OF PATIENTS TO THE COUNTRY BRANCH.—Applications for admission to this Hospital are made through the City Hospital, and only patients who are under treatment at the City Hospital will be admitted to the Country Branch.

THE MEDICAL PROFESSION and the public generally are invited to visit the Institution.

THE INSTITUTION is supported by the contributions of the benevolent. Contributions, which are earnestly solicited, may be sent to the Treasurer.

INTERNE SERVICE

The house staff consists of eight internes, each serving for two years. Appointments are made in February, May, August and November, and only those who have served a general hospital internship are eligible.

Application blanks will be sent upon request.

ANNIE C. KANE FELLOWSHIPS

Eight fellowships to be known as the Annie C. Kane Fellowships have been established at this hospital. These fellowships offer to selected young surgeons who have first completed their internship in this hospital an opportunity to continue their training in orthopedic surgery for from three to five years, and will carry a substantial annual salary.

REPORT OF THE PRESIDENT

To the Board of Supervisors and Board of Trustees,

LADIES AND GENTLEMEN :

The figures for the work done show an increase in the number of patients treated in the hospital and dispensary during the year 1930 of 1,252 over the number treated in 1929. The number of patients treated in the city hospital increased from 934 to 984, and the number of patient days from 32,989 to 33,171. In the private pavilion, however, the reverse was true, and the number of patients treated fell off from 209 to 187 and the number of patient days from 5,618 to 4,578. The smaller number of private patients directly reflected the depressed economic conditions of the past year, and was the common experience of other hospitals in New York City.

In spite of this increased service to ward patients and the reduced income from the private pavilion, our expenses were carefully watched and at the end of the year were more nearly covered by receipts than in 1929. The deficit (as well as the deficit of the Country Branch) was met by an appropriation from the James Fund, set apart by the Trustees some years ago as a reserve against contingencies of this kind.

The standard of work has been maintained, the condition of the plant kept up, and there has been no relaxation on the part of the staff and personnel.

A comparison of the amount and character of the work done now and when the present hospital was first occupied in 1916 shows such surprising changes that a study of the present situation indicates very clearly the need for an addition to our plant. Not that more beds are needed, but a rearrangement of the operating room, the X-ray Department and the Laboratory would facilitate and improve the service and would enable a larger

number of cases to be treated and passed through the hospital more rapidly. Taking advantage of the funds coming to the hospital from the Lloyd bequest, the Trustees purchased last July sixty feet on 59th Street adjoining the hospital on the east and plans are being prepared for a building to occupy this site. A building committee has been appointed to study the plans, and it is hoped to start construction shortly.

Country Branch

The death on January 18, 1931, of Mrs. Statira M. Bridgman brought to a close a long association with the Orthopaedic Hospital. Coming to the Country Branch first in 1903, she served in various positions and became Superintendent in 1919. She was devoted to the interests of the hospital and had a tender affection for the children who were patients under her care. She had the regard and affection of her associates and the confidence and respect of the Trustees.

The year at the Country Branch differed in no material degree from 1929, the plant being used to capacity practically continuously. The expenses were about the same as the preceding year, but the receipts were materially greater chiefly through increased payments from the City; the resulting deficit being less than in 1929.

During the past year the Surgeon-in-Chief was asked by a group of British orthopedists to hold an operative clinic in London. This was largely attended, and gave Dr. Hibbs an opportunity to show examples of his later discoveries and the operative technique developed by him and his associates in the New York Orthopaedic Dispensary and Hospital.

An item of more than passing interest this year is the graduation of the first three fellows appointed under the Kane Fund. Doctors Joseph C. Risser, Harold W. Smith and Walker E. Swift have completed their three year fellowships and leave their service with the good wishes of their associates and the Trustees for their future success.

The State Board of Charities, as heretofore, has classified both the City Hospital and the Country Branch as Class I in Plant and Administration.

To the Staff, the Superintendent and the employees for faithful and devoted service, I express the thanks and appreciation of the Trustees and Supervisors.

Respectfully submitted,

ROBERT S. BREWSTER,
President.

REPORT OF THE BOARD OF SUPERVISORS

*To the Trustees,
New York Orthopaedic Dispensary and Hospital.*

GENTLEMEN :

Though 1930 has been a year of intense financial depression, owing to the generosity and interest of our friends, we have been able to continue,—even to add to our activities. We wish to express our thanks to them and to all our Auxiliary Societies who have been so unfailing in their work.

The Orthopaedic Guild has supported two free beds and supplied linen and clothing for two girls' wards. The Orthopaedic Hospital Sewing Society has given much linen, which is most useful to the Hospital. The Orthopaedic Hospital Red Cross Unit has made many surgical dressings. The Junior Guild has supported one free bed and given clothing for the children on the sixth floor, besides its gift of \$1,500 for a visiting nurse. The importance of this branch of the Hospital's service cannot be over-estimated. The visiting nurse work is essential to the Hospital, and we are most grateful to Mrs. Charles B. Alexander, Mrs. Robert S. Brewster, Mrs. Whitelaw Reid, Mrs. Henry White, Mrs. A. Murray Young, Mr. Harry F. Knight, Mr. Jack Straus and the Junior League, for their support of this branch of the Hospital's work.

There has been one change in our Board this year. Mrs. Procter has resigned on account of now living in the country. Her resignation was accepted with much regret. Her active work and personal interest in all things pertaining to the Hospital will be greatly missed. Mrs. Oliver D. Filley was unanimously elected with great enthusiasm to fill the vacancy.

After careful consideration it has been decided to give up Occupational Therapy in the Hospital. This work was started some years ago, and at that time was a great help to the patients, but now, owing to the change in treatment and the fact that patients

are sent as soon as possible to the County Branch, it has lost its value. The patient now stays but a short time in the Hospital, and while here is too ill or too busy with treatments to profit by handwork. Then, too, we now have a Patients' Library, and books are distributed in the wards twice a week. The books are used tremendously and we hope to keep adding to the Library.

Christmas was, as always, very cheerful and happy in the Hospital. The Board gave most generously. There were Christmas trees for all the wards and Dispensary. Presents for every patient and nurse and Christmas greens and decorations made the whole building gay. On account of the widespread unemployment, Christmas baskets were given in greater number this year in the Dispensary, and everyone did his best to help bring cheer and happiness to all. The nurses had a card and game party, which was most successful.

We are facing 1931 with high hope and faith. Hope that the coming year will see an end of the gloom which now is everywhere and faith that such work as ours will not be allowed to suffer no matter what the financial condition of the country.

Respectfully submitted,

CORA OLIVER CHOATE,
Secretary.

REPORT OF THE SURGEON-IN-CHIEF

*To the Board of Trustees of New York Orthopaedic
Dispensary and Hospital.*

GENTLEMEN :

At the beginning of the year we had under treatment 16,460 patients carried over from the previous year, and admitted 10,078 new patients during the year, which, with 948 patients who had previously been discharged from the Dispensary and were readmitted, make the total number of patients treated in the institution 27,486. This is an increase in new cases of 391 over those admitted in 1929, and an increase of 1,252 in the total number of patients treated.

Table I shows that of the total number of patients treated during the year 1,395 had joint tuberculosis, 9,973 deformities of the feet, 1,860 non-tuberculous deformities of the spine, of which 417 were developmental. There were 1,011 cases of fractures, of which 61 were of the spine; 2,742 cases were paralytic deformities, and the remaining 10,505 suffered from a great variety of deforming diseases.

This table also shows the results of treatment: 340 patients were discharged cured, 4,620 patients were discharged relieved, making a total of 4,960 patients who were restored to a condition of health where they required no further treatment. 4,845 patients were discharged for other reasons, many of them having come simply for diagnosis, others discharged for neglect, leaving 17,681 patients under treatment at the end of the year.

Table II shows the number of revisits made by patients to the Dispensary to be 77,410. The number of visits by new patients was 10,078; the number of visits by visiting nurses to patients in their homes was 6,593, making a grand total of 94,081 visits, an increase over the previous year of 4,430. The number of patients visited by nurses in their homes was 3,898.

Table III shows in detail the manufacture of braces in the shop. The total number of new instruments made was 3,252, and the number repaired was 2,790.

CITY HOSPITAL. The number of patients in the Hospital on January 1, 1930, was 80. The number admitted during the year

was 905; 887 were discharged and 4 died, leaving 94 patients in the hospital on January 1, 1931. The average number of patients in the wards each day was 90, and the average stay of each patient was 34 days. There were 154 waiting for beds at the end of the year. 1,521 operations were performed, 1,127 patients were operated on. The number of free days was 20,536, and the number of pay days was 12,635, making a total of 33,171 hospital days' care.

The cost per patient day in the ward was \$6.48. The cost per visit to the Dispensary was \$1.10. The cost per day in the Private Pavilion was \$12.27. The cost per visit to patients in their homes by nurses was \$1.75.

In the Private Pavilion 187 patients were treated during the year.

Table VIII shows that there were 10,236 patients X-rayed and 20,264 X-ray films made.

COUNTRY BRANCH. The number of patients in this hospital at the beginning of the year 1930 was 165; 381 were admitted during the year, 394 were discharged, and 2 died, leaving 150 in the hospital on January 1, 1931. The total number of patients treated was 546. The average number of patients per day during the year was 155. The percentage of beds occupied each day for the year was 93. The cost per patient day in the ward was \$4.11. The number of free days was 36,514; and the number of pay days was 20,120.

Table IX shows the report of the X-ray Department of the Country Branch; 1,404 patients were X-rayed, and 2,155 films were made.

Table VII is the report of the Pathological Laboratory and applies to both hospitals. It shows that the total number of examinations made during the year was 7,048.

The medical educational work of the institution has been carried on this year as it was last. The fourth year medical students from the College of Physicians and Surgeons, of Columbia University, attend clinics in the hospital four times a week, from September to June.

The post graduate training in orthopedic nursing for graduate nurses continues, and during the year 1930 there were 23 nurses graduated in this course.

Never before have we had the Pathological Laboratory so well organized and the work so well done as since the appointment of Dr. Halbach in March of this year. It is needless to emphasize again how important this department is in the study of disease and the improvement of methods of diagnosis.

The reorganization of our X-ray Department several years ago and the appointment of Dr. Ferguson as a full time director has been amply justified in the improvement in that department. The importance of the X-ray in the diagnosis of diseases and abnormalities of bone cannot be over-estimated.

During the year we have been hampered by our inadequate operating room facilities, but it would seem that this handicap will be overcome when the new building, which is now being planned, is erected.

The follow-up clinic, which is held on Tuesday morning each week, except during July and August, continues to be one of the most important aspects of the work. This clinic gives an opportunity for the staff to study the result of the surgical treatment of all patients who have been in the hospital and is a great factor in improving our methods of treatment. 1,245 patients have been studied in this clinic.

The end result studies of patients and operations are made throughout the entire year by various Fellows who are given certain problems, such as congenital dislocation, scoliosis, and so forth, and those studies of results are published.

One of the most important of them has just been published, that of the end result study of 360 cases of scoliosis treated by the fusion operation. January 11, 1930, marked the twentieth anniversary of the perfection of the spine fusion operation for diseases and deformities of the spine, the first case having been done on that date twenty years ago. I may say that during the year I have seen that first case, a boy, who was operated on at the age of eight, now a man in perfect health, married and with a family of children, and working every day.

During these twenty years about 1,000 cases of tuberculous disease of the spine have been operated, and a large percentage of them definitely cured. In addition to this there have been about 2,000 cases of other diseases and deformities of the spine upon which this operation has been successfully done. None of these cases, such as fractures of the spine, curvatures and developmental defects, all seriously disabling abnormalities in the individual, had ever had any adequate treatment before the perfection of this method.

Another valuable piece of work done by Dr. Ferguson and one of the Fellows, Dr. Howorth, is nearing completion and will be presented early in the spring at a meeting of the American Medical Association. It is the study of separation of the femoral epiphysis in children, a disease which is frequently seen and is very crippling. The methods of treatment in the past have been inadequate and our knowledge incomplete. Through this intensive

study we have obtained a more accurate knowledge of the disease and perfected improvements in the methods of its treatment. A good many such cases are under treatment in this institution.

Another important piece of work that has just been completed is an end result study of the treatment of congenital dislocated hip by an open operation—60 cases. Treatment of this condition began in about 1900. Up to that time nothing had ever been done for it. Then an operation was designed by an Italian surgeon, Pacci, and perfected and popularized by Dr. Lorenz, of Vienna, a so-called “bloodless operation.” This operation was improved upon here, and, by a table constructed for the purpose, made much simpler and less injurious to the tissues of young children. In 1926 an end result study was made by three members of our staff of 310 cases treated by this method during the previous twenty-five years. While the immediate results in many of these young children appeared to be good, a study of the cases in later life revealed great disappointment and led to a change in the method of treatment. The method now used in most instances is an open operation, by which means a more accurate knowledge of the joint is obtained and better functional results. This study is soon to be published.

Dr. Lantzounis, one of the Fellows, has made an end result study of all the cases, 145 in number, of loose cartilages in the knee. This study has been sent for publication. I am glad to report that the operation gave complete relief in every case.

All of these studies and findings, which are reviewed by the entire staff, illustrate again the increase in thoroughness with which our work is now being done as compared with a few years ago. This necessitates, as you know, larger expenditures of money, but it certainly is obvious that we know no better way to improve our surgical methods.

Various other lines of investigation are being carried out, too numerous to mention. All of this must give you some conception of the intensive study being made here of the diseases and deformities in this department of surgery. It is only by such means that methods for the cure of disease can be perfected, and it is only in such an organization as this that such study is possible, one organized and equipped for this purpose alone, staffed by men who have time and interest to do such work. It is fair, I think, therefore, to look forward as the years go by to much more accomplishment than there has been in the past. While it may be a fact that our institution is relatively small, if we can develop an organization wholly concerned with the welfare of the sick I have every reason to believe that such methods of treatment will be perfected and a larger number of sick people made well each year. What we, as surgeons, need primarily is the proper attitude

of mind toward the sick, and this is obtained only by years of close and painstaking study of their needs. Indeed the measure of our contribution to their welfare will be determined by how much we care to promote that welfare. We must in such institutions as this make it possible for those who are doing this work to have peaceful minds and constant devotion.

Our Fellowship system, established here three years ago, was marked by the President giving at his house a dinner to the Board of Trustees and surgical staff on January 13, 1931, in honor of the first graduating Fellows, Doctors Joseph C. Risser, Walker E. Swift and Harold W. Smith. This occasion was a very happy and inspiring one for those of us who attended it, and I am sure it impressed all present with the far-reaching importance of the Fellowship system which has been established here. Not only is it very significant from the standpoint of our own work here, but I feel sure that it will have a much wider significance in encouraging the establishment of a similar system in many other institutions. Dr. Smith has been appointed chief surgeon in the Orange Orthopaedic Hospital and Dispensary, at Orange, New Jersey, where he will have the direction of a large service and will carry great responsibility. Dr. Risser and Dr. Swift continue on our staff as assistant attendings.

The room in the Private Pavilion, which was endowed in April, 1929, in memory of Dr. von Lackum, has been available for patients since its endowment a total of 670 days, and has been occupied by 22 patients for 657 days. A tablet has been placed in the hall of the Pavilion commemorating this gift, and a plaque made by a friend of Dr. von Lackum has been placed in the library.

The medical library has become a most useful and vital part of the life of the institution, and volumes of great interest have been added this year, many of them pertaining to the very earliest history of surgery.

I regret to report the death of Mrs. Statira M. Bridgman, Superintendent of the Country Branch, which occurred in this hospital on January 18, 1931, after an illness of two years. Mrs. Bridgman had been in the service of the institution for about twenty years, and we all deeply regret her loss. The fact that her service has been so long is evidence of its value.

Respectfully submitted,

RUSSELL A. HIBBS,
Surgeon-in-Chief.

ENTRANCE TO THE COUNTRY BRANCH

REPORT OF THE SUPERINTENDENT

*To the Board of Trustees,
New York Orthopaedic Dispensary and Hospital.*

GENTLEMEN :

I have the honor to submit the Superintendent's report for the year 1930.

The hospital, together with its country branch, constitutes a 300-bed institution caring for orthopedic patients exclusively. This is the only hospital in the city which cares only for this type of case.

During the year there were 33,171 patient days in the city hospital, and 56,634 at the country branch, making a total of 89,805. The cost per patient per day in the city hospital was \$6.48, while at the country branch it was \$4.11. This substantial difference in costs is explained by the fact that the city hospital carries the patient through the period of operative procedure and acute illness, while at the country branch the less expensive post-operative and convalescent care is given. The country branch, however, is changing in marked degree in the type of work which it is doing. Patients are sent there much earlier after operation than a few years ago, and it is no longer merely a convalescent home.

This has been a difficult year, and more especially so for the individual who is crippled or ill. Hard times have forced many persons who in other years would have been patients in the private pavilion to accept treatment in the wards of this hospital. About two-thirds of the work done in the two hospitals this year has been free. The average length of stay in the city hospital was 34 days, and in the country branch 104 days.

The nursing service in the hospital has been carried on as usual, and very few changes have been made in the permanent staff. The post-graduate course for graduate nurses has been continued, and twenty-three have been graduated this year.

The private pavilion, like other private pavilions in the city, has not been as busy as in previous years. I am glad to report, however, that this department was not operated at a loss in spite of the financial depression.

The dispensary has been more active than usual, and 87,398 visits were made to the various departments during the year. The cost per visit was \$1.10.

The weekly follow-up clinic, which was started over a year ago, has been continued throughout this year. The social service and visiting nurse department, which serves the dispensary, hospital and country branch, has made every effort to assist in following up cases and to give more time to the proper adjustment of the patient in the home. The splendid cooperation of other relief and educational agencies in this work is very much appreciated. The nurses in this department have made 6,593 visits, at a cost of \$1.75 a visit.

The history department has been kept busy this year. Better histories are the goal of every hospital and dispensary, and improvement in our records has been our continual aim.

The physiotherapy department has operated to its full capacity, and 20,334 visits were made to it. This department has also trained students from Teachers' College, Columbia University, who come here for their corrective work. In the wards of both the city hospital and the country branch massage and corrective work are carried on.

The work of the dental department is of great importance. Examinations are made of all patients admitted to the hospital, and those who are to remain for a period of a few weeks have all the necessary dental work completed. These patients are also followed up during their stay at the country branch and their mouths kept in good condition.

The X-ray department has had increased demands made upon it, due to the requirements for research and study in connection with the follow-up clinic and end-result analyses. There were 20,264 X-rays taken in the city hospital, and 2,155 at the country branch.

The pathological laboratory is being developed and its work has increased decidedly. There were 800 more examinations made this year than last. Many tests and studies have been made during the year that previously were not attempted. This has greatly improved and facilitated the diagnosis and the treatment of the patient.

The brace shop has manufactured 3,252 new instruments this year. Fewer braces are being used than formerly, due to the change in treatment. It is a great satisfaction to see patients restored without the cruel necessity of wearing braces the rest of their lives.

The housekeeping and dietetic departments have been carried on satisfactorily. The hospital standards of cleanliness are high and the provision of very good food is held as an important factor not only in getting the patient well, but in keeping everyone contented and happy.

The medical library has had the good fortune this year to acquire many very valuable books through gifts and purchase. At present it comprises 1,061 volumes. The patients' library has added 639 books to its collection, but there is still a very urgent need for more books. Twice a week books are taken around to the ward patients, who eagerly make their selection. We hope that during the coming year this library will be much improved.

As a result of the activities of the appeals department our contributions did not fall off. This was the more gratifying in view of the general financial depression and the necessity for many philanthropic organizations to issue appeals more frequently than was their custom. The loyal support of all our contributors has meant help and encouragement beyond measure.

The two hospitals and the dispensary are so closely allied and all the departments so interwoven that one reacts on the other, and everyone active in the institution, no matter what his task may be, must of necessity be working primarily for the good of the patient. With this ideal of service in mind only good can be done, and the work for which this institution was established will be accomplished.

This year, as in former years, we have received many donations, and individuals and organizations have contributed in material and personal service to the care of our patients. I wish to thank the Boards of Trustees and Supervisors for their continued support, and I take this opportunity to speak of the cooperation and unfailing devotion of the staff and employees to the institution and the work which it is doing. For this cooperation and devotion I am most grateful.

Respectfully submitted,

THEODORA S. ROOT,
Superintendent.

SCENE IN THE DISPENSARY

AUDITORS' CERTIFICATE

We made an examination of the accounts of NEW YORK ORTHOPAEDIC DISPENSARY AND HOSPITAL, comprising the City Dispensary and Hospital, Country Branch, Legacy under the Will of Caroline A. James and the Annie C. Kane Endowment Fund and maintained on a cash basis by the Central Hanover Bank and Trust Company as Assistant Treasurer, for the year ended December 31, 1930.

We certify that, in our opinion, the accompanying balance sheets set forth the financial position of the institution as at December 31, 1930, on the basis of valuing the securities and plant assets at cost, except that securities when acquired by gift were valued at par or market values at date of acquisition.

We further certify that, in our opinion, the accompanying statements of receipts and disbursements set forth the results of operations on a cash basis for the year ended December 31, 1930.

LYBRAND, ROSS BROS. & MONTGOMERY,
Accountants and Auditors.

Mrs. Raymond L. Ward	Babylon, N. Y.

ANNUAL REPORT

OF

ORTHOPAEDIC HOSPITAL GUILD

1930

The work of the Guild has gone on as usual during the past year. The Guild wards have been well supplied with linen, and Mrs. Higgins' Red Cross Unit has made 56,256 dressings. The Guild appreciates the work that Mrs. Higgins and her associates are doing so regularly and faithfully.

The Guild has paid for two endowed beds during the year, amounting to \$700.00; and \$22.90 for cod liver oil for Dispensary patients. A cake sale was held at the residence of Mrs. J. Todhunter Thompson in May, which netted \$352.00.

Our membership has been diminished by the resignation of Mrs. C. C. Overton, Mrs. Robert H. Travers, and Mrs. Howard Carroll and by two deaths, Mrs. William Sinclair and Mrs. William G. Fleming.

We also deeply regret to announce the death of our dear and faithful secretary, Mrs. Frances B. Paine, who died May 6, 1930, of pneumonia. We will greatly miss her kind help and interest in the work of the Guild.

Respectfully submitted,

AGNES L. JOHNSON,

Secretary pro tem.

REPORT OF THE
ORTHOPAEDIC HOSPITAL SEWING SOCIETY

1930

The Orthopaedic Hospital Sewing Society has met regularly this year, and the work has been carried on as usual, although its membership has been reduced by deaths and resignations.

The inventory of linen is as follows:

Number of articles on hand January 1st, 1930.....	5,128
Number of articles added during the year.....	4,548
Total.....	<u>9,676</u>
Number of articles used during the year.....	4,778
Number of articles on hand January 1st, 1931.....	4,898

Respectfully submitted,

KATHERINE M. LUCE,
Secretary.

REPORT OF THE JUNIOR GUILD

There is no new feature to report in our work for the past year. During the Lenten season we meet every Wednesday morning at the residences of the different members of the committee to make garments for the children in the wards.

The movies given at the Heckscher Theatre last March, the Rummage Sale held in October, together with dues, donations and our yearly appeals bring in the necessary amount of money for our expenses.

Respectfully submitted,

FLORENCE S. KOBÉ,
Secretary.

The sum of \$7,500 endows a bed in perpetuity, and the sum of \$350 endows a bed for one year.

FORM OF CERTIFICATE TO THE DONOR OF AN
ENDOWED BED IN PERPETUITY

New York Orthopaedic Dispensary and Hospital

This is to Certify that the New York Orthopaedic Dispensary and Hospital through its Trustees has received from

.....
herein designated as the donor, a fund of Seven Thousand Five Hundred Dollars, for the purpose of founding and maintaining in accordance with its corporate powers an endowed bed in its Hospital in perpetual memory of

.....
The donor shall have the privilege of nominating the occupant of said bed, but such nomination and the use of said bed shall be subject to all such rules and regulations governing endowed beds, and providing for the treatment, reception and discharge of patients as now exists or which may hereafter be enacted by the Board of Trustees of said Dispensary and Hospital.

Witness this corporate seal of the New York Orthopaedic Dispensary and Hospital, and the signatures of two of its officers, this.....day of.....one thousand nine hundred and.....

.....
Secretary.

.....
President.

FORM OF BEQUEST

I bequeath to the New York Orthopaedic Dispensary and Hospital, a corporation incorporated under the Laws of the State of New York, the sum of..... dollars to be applied to the benevolent uses and purposes of said hospital.

NEW YORK ORTHOPAEDIC DISPENSARY AND HOSPITAL

420 EAST 59TH STREET

*Open from 1 to 3 P. M. Daily (Sundays and Legal Holidays Excepted)
for the Reception and Treatment of Patients*

OBJECTS OF THE INSTITUTION.—“To furnish treatment to the poor with special reference to the Diseases and Deformities of the Spine and the Hip Joints and other of the more serious diseases of the bones and joints requiring surgical and mechanical treatment, and for giving instruction in the same.” All cases of deformity, besides those mentioned, including Club Foot, Lateral Curvature of the Spine, Infantile Paralysis, Bow-Legs, etc., are received and treated.

RULES GOVERNING THE ADMISSION OF PATIENTS TO THE DISPENSARY DEPARTMENT.—Professional services are rendered gratuitously. Those who can afford to do so are expected to reimburse the Institution for the actual cost of apparatus. Payment for apparatus is received in installments, if required. Apparatus, however, is never *sold* to patients or others, the Institution reserving the right to remove the apparatus and discharge any patient not complying with the directions of the Surgeons. Apparatus will not be supplied in any case that does not come under the immediate care of the Institution.

RULES GOVERNING THE ADMISSION OF PATIENTS TO THE HOSPITAL DEPARTMENT.—Any suitable Orthopedic case may be admitted. Application for admission may be made at the Hospital during the regular Dispensary hours.

RULES GOVERNING THE ADMISSION OF PATIENTS TO THE COUNTRY BRANCH.—Applications for admission to this Hospital are made through the City Hospital, and only patients who are under treatment at the City Hospital will be admitted to the Country Branch.

THE MEDICAL PROFESSION and the public generally are invited to visit the Institution.

THE INSTITUTION is supported by the contributions of the benevolent. Contributions, which are earnestly solicited, may be sent to the Treasurer.

INTERNE SERVICE

The house staff consists of eight internes, each serving for two years. Appointments are made in February, May, August and November, and only those who have served a general hospital internship are eligible.

Application blanks will be sent upon request.

ANNIE C. KANE FELLOWSHIPS

Eight fellowships known as the Annie C. Kane Fellowships have been established at this hospital. These fellowships offer to selected young surgeons who have first completed their internship in this hospital an opportunity to continue their training in orthopedic surgery for from three to five years, and will carry a substantial annual salary.

REPORT OF THE PRESIDENT

*To the Board of Supervisors and the Board of Trustees
of the New York Orthopaedic Dispensary and Hospital,*

LADIES AND GENTLEMEN :

In my report last year mention was made of the need of rearranging our plant and supplementing our present facilities so that better work could be done in meeting the changed conditions and the great advances made in orthopedic surgery. It is, therefore, a cause for gratification that the new building on 59th Street, authorized last year, is now nearly ready for occupancy. On January first we expect to make use of it. The changes to be made in the present building, which are extensive, comprising as they do, the relocation of the Board Room, the Library and the X-Ray Department, and the rearrangement of the Massage and Physiotherapy Departments, the Filing and History rooms, will then be undertaken.

While it is never safe to forecast the future where the medical and surgical sciences are concerned, it seems fair to assume that our plant is complete and in all respects adapted to the purposes for which it was designed, and that the standard of work which this hospital has done in the past for the relief and cure of the cripple will be fully maintained and our professional staff will continue to lead in the field of orthopedic surgery.

The Dispensary and Hospital being operated practically at all times to capacity there are no marked changes in the numbers of patients treated as compared with former years. An increase over last year, however, is noted in the number of new cases seeking our services. As a result of the prevalence this past summer of infantile paralysis we have under treatment and expert after-care some six hundred cases. This has put a heavy strain on the Physiotherapy and Massage Departments. As these patients will presumably be under our care for a prolonged period and because they require more individual service than the usual orthopedic case, some addition to the personnel,—nurses and attendants,—may be required. The administration is giving this matter careful study.

The Private Pavilion, in common with the private services of the general hospitals in New York, has had a marked falling off in patronage. The loss of revenue from this source has been serious; so that, although the income of the Dispensary and Hospital has met expectations, there will be a deficit at the close of the year of approximately \$20,000 in the New York account.

In January last, a reorganization of the administrative staff was effected. Miss Theodora S. Root, Superintendent of the Dispensary and Hospital was appointed Superintendent of the Country Branch also. Miss Ruth H. Cummer, R.N., remains as Assistant Superintendent in New York, and Miss Evelyn Howard, R.N., has been appointed Assistant Superintendent at the Country Branch. This concentration of authority and responsibility was expected to result in greater administrative efficiency, which expectation has been fully realized.

The structural changes undertaken last summer at the Country Branch are now complete. It is believed that more economical and efficient operation will result from this, but as is so often the case when reconstruction is undertaken many defects in the plant developed and more work was found to be necessary than was anticipated. The principal items were the porches for all the wards and the elevators in the two wings. These, now in use, have proved most beneficial and have rendered the whole plant available for patients of varying ages and of either sex. This flexibility in the use of the different wards will conduce to more economical and efficient operation.

In addition to the above, the nurses' dining-room has been installed in the main building. A recreation room for ambulatory patients and a suitable room for Occupational Therapy, properly equipped, have added to the facilities of the hospital and the welfare of our patients.

The condition of much of the piping in the main building has required extensive repairs, and in the power plant much work was found necessary on the boilers and generators. These matters have been attended to and the plant as a whole brought up to first class condition. Some additional machinery in the laundry may be needed.

The number of patients treated in the Country Branch has remained stationary, all beds being occupied this year as heretofore. The many poliomyelitis cases now pressing for treatment however will tax all our resources and indicate that some additions to our staff will be needed.

The State Board of Charities continues to place our institution in Class I both as to plant and administration.

The Board of Trustees has lost, in the death of Mr. Henry W. Howe, a member who was earnestly interested in the hospital and who evidenced this interest by faithful attendance and by wise counsel. Mr. Grenville Clark, due to pressure of other affairs, has resigned from the Board. While we shall not have the advantage of his presence at our meetings and his always well considered advice, we may count, I am sure, on his continued interest in the welfare of the hospital.

These two vacancies on the Board of Trustees have been filled by the election of Mr. Peter Grimm and Mr. Deering Howe.

To the Staff, the Superintendent and the employees for faithful and devoted service, rendered under difficult conditions both in New York and at White Plains, I express the thanks and appreciation of the Trustees and Supervisors.

Respectfully submitted,

ROBERT S. BREWSTER,
President.

REPORT OF THE BOARD OF SUPERVISORS

*To the Trustees,
New York Orthopaedic Dispensary and Hospital.*

GENTLEMEN :

The Board has suffered a great loss this year in the death of Mrs. Whitelaw Reid, a faithful, generous and wise member for thirty-three years, whose interest and unfailing sympathy will always be missed.

To our many friends, known and unknown, we extend our heartfelt thanks, for in spite of all the worries and difficulties of the past year they have by their generosity made it possible for the Hospital not only to carry on its work as usual, but to enlarge and perfect the Hospital building, both here and at White Plains.

The Auxiliary Societies have as usual, done much to help.

The Orthopaedic Guild has supported two free beds and supplied linen and clothing for two Girls' Wards. The Junior Guild has supported one free bed and given clothing for the children in the Sixth Floor Ward, besides the gift of \$1,500. for a visiting nurse.

The Orthopaedic Hospital Red Cross Unit has helped immensely by making surgical dressings, and the Orthopaedic Hospital Sewing Society by giving linen, which is most useful.

We cannot over-emphasize the importance of the work of the visiting nurses. This work is essential to the Hospital, and we are most grateful to Mrs. Charles B. Alexander, Mrs. Robert S. Brewster, Mrs. Whitelaw Reid, Mrs. Henry White, Mrs. A. Murray Young, Miss Caroline White, Mr. Jack Straus and the Junior Guild for their support of this branch of the Hospital work.

In some hospitals the Christmas parties and celebrations were curtailed this year because of the financial depression, but

here we decided to make the day as happy and gay as possible. There were the usual Christmas trees and greens and presents for everyone in both Hospital and Dispensary. The nurses had their party, and it really was a Merry Christmas.

The coming year is full of problems for everyone, but let us look out on this poor anxious world with courage and faith that make all things possible.

Respectfully submitted,

CORA OLIVER CHOATE,
Secretary.

REPORT OF THE SURGEON-IN-CHIEF

*To the Board of Trustees of New York Orthopaedic
Dispensary and Hospital.*

GENTLEMEN :

At the beginning of the year we had under treatment 17,681 patients carried over from the previous year, and admitted 10,857 new patients during the year, which, with 1,102 patients who had previously been discharged from the Dispensary and were readmitted, makes the total number of patients treated in the institution 29,640. This is an increase in new cases of 779 over those admitted in 1930, and an increase of 2,154 in the total number of patients treated.

Table I shows that of the total number of patients treated during the year 1,346 had joint tuberculosis, 10,934 deformities of the feet and legs, 2,126 non-tuberculous deformities of the spine, of which 473 were developmental. There were 1,107 cases of fractures, of which 55 were of the spine; 2,973 were paralytic deformities, and the remaining 11,154 suffered from a great variety of deforming diseases.

This table also shows the results of treatment: 382 patients were discharged cured, 4,562 patients were discharged relieved, making a total of 4,944 patients who were restored to a condition of health where they required no further treatment; 5,830 patients were discharged for other reasons, many of them having come simply for diagnosis, others discharged for neglect, 25 died, leaving 18,841 patients under treatment at the end of the year.

Table II shows the number of revisits made by patients to the Dispensary to be 75,262. The number of visits by new patients was 10,857, the number of visits by visiting nurses to patients in their homes was 5,556, making a grand total of 91,675, a decrease of 2,406 from the year 1930. The number of patients visited by nurses in their homes was 4,149.

Table III shows in detail the manufacture of braces in the shop. The total number of new instruments made was 2,934, and the number repaired was 2,817.

CITY HOSPITAL. The number of patients in the Hospital on January 1, 1931 was 94. The number admitted during the year was 972; 967 were discharged and 5 died, leaving 94 patients in the hospital on January 1, 1932. The average number of patients in the wards each day was 92, and the average stay of each patient was 31 plus days. There were 79 waiting for beds at the end of the year. 1,510 operations were performed, 998 patients were operated on. The number of free days was 20,632, and the number of pay days was 13,018, making a total of 33,650 hospital days' care.

The cost per patient day in the ward was \$6.18.

In the Private Pavilion 154 patients were treated during the year.

Table VIII shows that there were 9,429 patients X-rayed, and 23,009 X-ray films made.

COUNTRY BRANCH. The number of patients in this hospital at the beginning of the year 1931 was 150; 349 were admitted during the year, 353 were discharged, and none died, leaving 146 in the hospital on January 1, 1932. The total number of patients treated was 499. The average number of patients per day during the year was 150. The percentage of beds occupied each day for the year was .887. The cost per patient day in the ward was \$3.95. The number of free days was 28,949; and the number of pay days was 26,042.

Table IX shows that at the Country Branch 1,683 patients were X-rayed and 2,319 films were used.

Table VII is the report of the Pathological Laboratory and applies to both hospitals. It shows that the total number of examinations made during the year was 7,554. There were also Arthritis studies made in the Laboratory upon 95 individual patients with some special vaccines, and 781 vaccine injections.

The medical educational work of the institution has been carried on this year as it was last. The fourth year medical students, in sections, from the College of Physicians and Surgeons, of Columbia University, attended clinics in the hospital three times a week, from September to June.

There have been no very important changes in the surgical staff during the year except the graduation of two Fellows, Dr. Hallock and Dr. Lantzounis. The former has been given a permanent position as Assistant Attending Surgeon, as has also Dr. Lantzounis, part of whose time is given to the New Jersey Orthopaedic Hospital.

The most important change taking place in the administrative staff was the appointment of Miss Root as superintendent of the Country Branch on February 1, 1931. Since that time a complete reorganization of that hospital has taken place and very great changes made in the building, which adapted it more adequately to our needs and made possible a more efficient and economical administration. The building of porches, properly related to the wards, will make possible the keeping of all the patients out of doors most of the time. This has never been possible heretofore. This hospital has been in operation some twenty-seven years, and these changes were necessary to make it available for the development of the work in the City Hospital.

The alterations in the City Hospital are well advanced and on January 22, 1932 we did the first operation in the new operating room. This suite is not yet complete and cannot be fully used until the plaster room, dressing rooms, and so forth are completed so that now we are able to use only two of the four operating rooms.

The changes in the offices on the first floor, the library, the doctors' quarters, the nurses' rooms, superintendent's quarters, and the squash court are all complete and in use. With these alterations, including those to take place in the Dispensary, it would seem to meet the needs of our work in the light of our present knowledge. Apparently this hospital opportunity for service to this community is increasing, as now it is the only one in the city devoted wholly to orthopedic surgery. It appears that people seeking our aid have confidence in the hospital as year by year the number coming to us is increasing, the total number of patients in 1931 being 29,640 as against 27,486 the year before, an increase of about 3,000.

The waiting list for admission to the hospital during the year has rarely been under 100 and usually ranges about 150, and the time patients have had to wait has varied from one to seven months, the average being about three months. When our new operating suite is entirely completed I believe with our bed capacity in both hospitals this situation can be very greatly altered by a more rapid turnover, but until this time our operating facilities are not much changed.

In the out-patient clinics the attendance has been very large, ranging from 200 to 500 patients in an afternoon, with an average of about 350. The contemplated alterations in this department will relieve the congestion somewhat and make a more simple and adequate arrangement for this large volume of work. These, also, will not be finished for several months and during the time

alterations are made there will be some embarrassment in the work, but it cannot be helped.

In the surgical care of our patients we have 26 surgeons involved, most of them giving the greater part and many of them all of their time to the service of the institution, and in spite of this fact there are certain aspects of our work incompletely done. You may get some conception of the volume of work that has been done the past year from the following list of studies published and in preparation by the staff:

STAFF PAPERS PUBLISHED IN 1931.

Fusion of the knee joint in cases of Charcot's disease. By Dr. Mather Cleveland and Dr. Alan DeForest Smith. J. Bone & Joint Surgery, xiii, 4, 849-855, October 1931.

A groove for the hypogastric vessels. By Dr. Albert B. Ferguson. J. Bone & Joint Surgery, xiii, 3, 568-569, July 1931.

Slipping of the upper femoral epiphysis. By Dr. Albert B. Ferguson and Dr. M. Beckett Howorth. J. Am. Med. Assn., 97, 25, 1867-1872, December 19, 1931.

Scoliosis treated by the fusion operation. An end-result study of three hundred and sixty cases. By Dr. Russell A. Hibbs, Dr. Joseph C. Risser and Dr. Albert B. Ferguson. J. Bone & Joint Surgery, xiii, 1, 91-104, January 1931.

Derangement of the menisci of the knee joint. A report of an end-result study of one hundred and forty-two cases treated by operation. By Dr. Leonidas A. Lantzounis, Surg., Gyn., & Obstet., liii, 182-188, August 1931.

Experimental joint tuberculosis. I. An attempt to produce localized lesions in guinea pigs. II. Comparative effects of tuberculous infection in normal and previously infected guinea pigs. By Dr. William J. Spring. Am. Rev. Tuberc., 23, 333 and 334, April 1931.

PAPERS ACCEPTED FOR PUBLICATION.

A rare accessory bone of the foot. By Dr. Albert B. Ferguson. J. Bone & Joint Surgery.

Fusion of the elbow joint for tuberculosis. A new technique and a report of three cases. By Dr. Halford Hallock. J. Bone & Joint Surgery, xiv, 1, 145-153, January 1932.

Open reduction in congenital dislocation of the hip. By Dr. M. Beckett Howorth and Dr. Harold W. Smith. J. Bone & Joint Surgery.

Monarticular arthritis simulating tuberculosis. By Dr. Alan DeForest Smith, Arch. Surgery.

SPECIAL WORK IN PROGRESS.

Studies of fetal hips and spines. By Dr. M. Beckett Howorth and Dr. John T. Saunders.

Coxa plana. By Dr. Albert B. Ferguson and Dr. M. Beckett Howorth.

Hip fusions, operations for tuberculosis, One hundred and eighty cases by Dr. Halford Hallock and Dr. James W. Toumey, Jr.

Closed reductions in congenital dislocation of the hip.

Shelf stabilizations of the hip.

Bone tumors. By Dr. M. Beckett Howorth.

Abnormal relations of the calcis to the scaphoid. By Dr. M. Beckett Howorth.

Knee flexion deformities. By Dr. Robert E. Hughes.

1. The surgical importance of sesamoids of the great toe, a study of their development in the foetus.

2. A study of synovectomy for chronic arthritis of the knee. By Dr. George A. L. Inge.

1. Surgical treatment of hallux rigidus.

2. Round back. By Dr. Leonidas A. Lantzounis.

A study of the course of scoliosis without treatment. By Dr. Joseph C. Risser.

A study of pseudo-arthritis. By Dr. Joseph C. Risser and Dr. Alan DeForest Smith.

Anterior tarsal resections and claw feet. By Dr. John T. Saunders.

Fusion operation for tuberculosis of the ankle. By Dr. Winfred H. Watters.

January 11, 1932 marked the twenty-first anniversary of the development of the spine fusion operation for tuberculosis of the spine, Potts Disease (hump-back). Since that date 2,415

individual patients have been operated and it is a source of great joy to see the large percentage of these cases entirely well and free from disease. The same surgical principle then established has gradually been applied to all joints affected with tuberculosis. For instance, in April 1923 the operation for hip joint tuberculosis was perfected and since that date 196 individual patients have been operated upon and the vast majority of these, in which time enough has elapsed, are free from disease and well.

This is particularly gratifying because there is nothing to justify the statement that any case in the past got well, though under treatment for indefinite years. That the need for this type of surgery still exists is evidenced by the fact that last year we treated 1,346 cases of joint tuberculosis.

The technique involved in spine fusion has also been applied to other deformities of the spine, such as lateral curvature, fractures, developmental abnormalities, and so forth. For instance, during the year an end result study of 360 cases of lateral curvature was reported. Fusion operations for knee, ankle, shoulder and wrist joints have been perfected and are the routine method of treatment. I am delighted to call your attention to an excellent piece of work done by one of our Fellows, Dr. Hallock, in developing an operation for elbow joint tuberculosis.

One of the most important clinics established two years ago is that of the follow-up clinic on Tuesday mornings. This is a clinic devoted to giving a close follow-up study by the entire staff of every patient that has been discharged from the hospital. It is of very great importance in familiarizing all members of the staff with the treatment of every case and the result obtained. During the year 1,595 patients have been studied in this special clinic.

The Laboratory continues to render very valuable aid in the diagnosis and study of disease, and the volume of work has been noted above as 7,554 examinations.

Of the recent epidemic of infantile paralysis occurring last summer and fall we have now under treatment 314 cases who had infantile paralysis during that period and as time goes on I am quite sure we will have many more, so that a very large part of the burden will come upon this hospital for the treatment of those cases and, as you know, it requires, in most instances, several years before the final result is obtained. We have about 60 of these cases now at the Country Branch, and are making a very careful and thorough study of the influence of this disease upon the development of deformity, and I feel sure it is going to lead to a much more complete knowledge than we have ever had before.

The institution here four years ago of our fellowship system has proven to be already of very great advantage to the Fellows themselves and to the work of our own organization. I feel quite sure that we will do better work for our own patients than we have ever done before and will furnish opportunities at the same time for men to perfect their equipment in this development of surgery so that when they leave the hospital service they are prepared to do good surgery. I hope the time is not far distant when we may refuse to accept for appointment any man on our house staff who does not desire himself to follow that up by a fellowship of from three to five years. I think the time has come when we may discontinue sending men out from our hospital with incomplete training, indeed it would seem that every department of medicine and surgery hospital training should be of sufficient length to give men the equipment to meet the tremendous responsibilities of their professional life.

In June the reunion of patients was held at the Country Branch and 214 attended. It was very interesting to see these former patients and have some opportunity to see what their condition was physically and what place they had made for themselves in life. I think such occasions are of value to the hospital.

Our medical library continues to be of the greatest service to the institution and is in constant use. We are gradually accumulating a very valuable collection of volumes, and the new room is now attractive and inviting to students.

Respectfully submitted,

RUSSELL A. HIBBS,

Surgeon-in-Chief.

ONE OF THE NEW OPERATING ROOMS

TABLE No. I

Summary of New and Continued Cases, January 1, 1931 to December 31, 1931

OCCUPATIONAL THERAPY CLASS
COUNTRY BRANCH

REPORT OF THE SUPERINTENDENT

*To the Board of Trustees,
New York Orthopaedic Dispensary and Hospital.*

GENTLEMEN :

This year there has been an extensive building program carried on both at the hospital in the city and at the country branch. A new five story and basement building, with a frontage of sixty-four feet on 59th Street, has been added to the building on the east.

To the first floor of the new addition the Board Room, Medical Library, Staff dining room and three of the offices have been moved. The second floor is occupied by the internes' quarters and a squash court; the third floor by nurses; the fourth floor by operating rooms, scrub-up rooms, anesthetic rooms; and the fifth floor by the Superintendent's quarters.

This addition enables us to make extensive changes in the main hospital building. The X-ray Department and Laboratory are to be moved to the second floor, the old operating suite is to be rebuilt to accommodate the work rooms, instrument room, plaster room, locker rooms, and so forth, which, with the new operating rooms, will make a complete operating suite, most modern and up-to-date in every way. Alterations will be made on the first floor which will increase the dispensary facilities and modernize the present dispensary. We hope this work will be completed by the end of August.

At the country branch nine porches leading off the wards of the present buildings have been added. Patients can be moved very easily in their beds from the wards to these porches and will there have the benefit of the sun and air. Electric elevators have been added in both wings. A new dining room was built for the nurses. Considerable new equipment has been added. Extensive work was done in the power house and the inside of most of the hospital buildings has been painted.

During the year there were 86,119 visits by patients to the dispensary at a cost of \$1.04 per visit. In the hospital there were 33,560 days of hospital care given, at a cost of \$6.18 per day. At the country branch 54,991 days of hospital care were given at a cost of \$3.95 per day. In the private pavilion there were 3,842 private patient days, which were at a cost of \$13.19 per day.

For the rest of the statistics and cost I refer you to the tables and to the treasurer's report.

There has been little change in the work done in the city hospital during the year, but many changes in the staff and personnel have been made at the country branch. The post graduate course for nurses, which has been given at the hospital for the past six years, has been extended, giving the nurses one month of their work at the country branch. At the country branch, also, there have been changes in the Occupational Therapy Department, the staff has been increased from one to three people, and its quarters have been moved from the basement to a large, sunny room on the second floor of the main building. Here the work is carried on for the up-patients and visits are made daily to the patients in their beds. A catalogued circulating library has been installed. Books are taken to the bed patients, while the up-patients visit the library and select the books for themselves. These activities have added a great deal to the welfare and contentment of the patients.

This year, as in former years, dispensary patients have been taken from their homes during the hot summer months for stays in the country. Many donations of gifts in material and money have been received from individuals and organizations and for all these we are most grateful.

With the dispensary, hospital and country branch in the excellent condition which they will be, and with the equipment and facilities which we have and the present staff we will be able to carry on with great satisfaction and do good work for the patient, which is the object for which the hospital is operated.

Respectfully submitted,

THEODORA S. ROOT,
Superintendent.

AUDITORS' CERTIFICATE

We made an examination of the accounts of NEW YORK ORTHOPAEDIC DISPENSARY AND HOSPITAL, comprising the City Dispensary and Hospital, Country Branch, Legacy under the Will of Caroline A. James and the Annie C. Kane Endowment Fund and maintained on a cash basis by the Central Hanover Bank and Trust Company as Assistant Treasurer, for the year ended December 31, 1931.

We certify that, in our opinion, the accompanying balance sheets set forth the financial position of the institution as at December 31, 1931, and the accompanying statements of receipts and disbursements set forth the results of operations on a cash basis for the year then ended.

ANNUAL REPORT
OF
ORTHOPAEDIC HOSPITAL GUILD
1 9 3 1

The work of the Orthopaedic Hospital Guild has gone on as usual during the past year. The Guild wards have been supplied with linen, and the Orthopaedic Hospital Red Cross Unit, under Mrs. Higgins, has made 51,048 dressings.

The Guild has paid for two endowed beds during the year, amounting to \$700.00; cod liver oil for Dispensary patients, \$22.90; \$35.00 for Christmas stockings which were filled for the patients, and for the seamstress, \$40.50.

We regret to report the resignation of Mrs. Talbot Ewart and Mrs. Harry J. Luce, and the deaths of Mrs. Edwin Thorn, Mrs. J. Todhunter Thompson, and Mrs. Daniel T. Worden.

Respectfully submitted,

AGNES L. JOHNSON,
Secretary pro tem.

REPORT OF THE JUNIOR GUILD

There is no new feature to report in our work for the past year. During the Lenten season we meet every Wednesday morning at the residences of the different members of the committee to make garments for the children in the wards.

The Rummage Sale held in October, together with dues, donations and our yearly appeals bring in the necessary amount of money for our expenses.

Respectfully submitted,

FLORENCE S. KOBBE,

Secretary.

The sum of \$7,500 endows a bed in perpetuity, and the sum of \$350 endows a bed for one year.

FORM OF CERTIFICATE TO THE DONOR OF AN
ENDOWED BED IN PERPETUITY

New York Orthopaedic Dispensary and Hospital

This is to Certify that the New York Orthopaedic Dispensary and Hospital through its Trustees has received from

.....
herein designated as the donor, a fund of Seven Thousand Five Hundred Dollars, for the purpose of founding and maintaining in accordance with its corporate powers an endowed bed in its Hospital in perpetual memory of

.....
The donor shall have the privilege of nominating the occupant of said bed, but such nomination and the use of said bed shall be subject to all such rules and regulations governing endowed beds, and providing for the treatment, reception and discharge of patients as now exists or which may hereafter be enacted by the Board of Trustees of said Dispensary and Hospital.

Witness this corporate seal of the New York Orthopaedic Dispensary and Hospital, and the signatures of two of its officers, this.....day of.....one thousand nine hundred and.....

.....
Secretary.

.....
President.

FORM OF BEQUEST

I bequeath to the New York Orthopaedic Dispensary and Hospital, a corporation incorporated under the Laws of the State of New York, the sum of..... dollars to be applied to the benevolent uses and purposes of said hospital.

NEW YORK ORTHOPAEDIC DISPENSARY AND HOSPITAL

420 EAST 59TH STREET

*Open from 1 to 3 P. M. Daily (Sundays and Legal Holidays Excepted)
for the Reception and Treatment of Patients*

OBJECTS OF THE INSTITUTION.—“To furnish treatment to the poor with special reference to the Diseases and Deformities of the Spine and the Hip Joints and other of the more serious diseases of the bones and joints requiring surgical and mechanical treatment, and for giving instruction in the same.” All cases of deformity, besides those mentioned, including Club Foot, Lateral Curvature of the Spine, Infantile Paralysis, Bow-Legs, etc., are received and treated.

RULES GOVERNING THE ADMISSION OF PATIENTS TO THE DISPENSARY DEPARTMENT.—Professional services are rendered gratuitously. Those who can afford to do so are expected to reimburse the Institution for the actual cost of apparatus. Payment for apparatus is received in installments, if required. Apparatus, however, is never *sold* to patients or others, the Institution reserving the right to remove the apparatus and discharge any patient not complying with the directions of the Surgeons. Apparatus will not be supplied in any case that does not come under the immediate care of the Institution.

RULES GOVERNING THE ADMISSION OF PATIENTS TO THE HOSPITAL DEPARTMENT.—Any suitable Orthopedic case may be admitted. Application for admission may be made at the Hospital during the regular Dispensary hours.

RULES GOVERNING THE ADMISSION OF PATIENTS TO THE COUNTRY BRANCH.—Applications for admission to this Hospital are made through the City Hospital, and only patients who are under treatment at the City Hospital will be admitted to the Country Branch.

THE MEDICAL PROFESSION and the public generally are invited to visit the Institution.

THE INSTITUTION is supported by the contributions of the benevolent. Contributions, which are earnestly solicited, may be sent to the Treasurer.

In Memoriam

RUSSELL A. HIBBS, Surgeon-in-Chief

Born September 1, 1869 — Died September 16, 1932

The death of Russell A. Hibbs brought to a close an association of thirty-eight years with the New York Orthopaedic Dispensary and Hospital; a period covering more than half the life of the institution.

Coming to the hospital as resident surgeon in 1894, he became Surgeon-in-Chief in 1899 at the age of thirty. This position he held until his death and under his guidance the hospital grew from its modest quarters on Lexington Avenue and 59th Street and the limited work done there, to its present plant in New York and at White Plains, complete in all details and established as the outstanding institution of its kind. On the professional side, under his leadership, a system of orthopedic surgery was developed which has obtained world-wide recognition.

His contributions to the science of orthopedic surgery were brilliant and have brought relief and comfort to countless sufferers. They covered a period of thirty years, from 1902 to 1932, and include such now universally recognized operations as the lengthening of the Achilles tendon, the fusion of the knee joint, vertebrae, ankle, hip joint, shoulder, wrist and elbow joints, where these joints were attacked by tuberculosis or congenitally deformed.

The success of these operations has received world wide recognition, and his contention, that the only way to cure joint tuberculosis is to destroy the function of the joint, is now generally accepted.

As professor of orthopedic surgery at the College of Physicians and Surgeons (appointed in 1918), as consulting surgeon to the Presbyterian, Babies, French, Sea View and Beekman Street hospitals, the New York Infirmary for Women and Children and St. John's Riverside Hospital, Yonkers, and as a member of the American Orthopaedic Association and fellow of the American Medical Association, the American College of Surgeons and the New York Academy of Medicine, he was an outstanding figure in his profession and brought much credit to the New York Orthopaedic Dispensary and Hospital.

Remarkable as were his professional attainments, his personality and character are what chiefly affected and profoundly influenced his friends and associates. A practical idealism was coupled with the highest ethical principles. To have served under Russell Hibbs was an inspiration; to have been associated with him was a rare privilege.

The Trustees of the New York Orthopaedic Dispensary and Hospital acknowledge a deep obligation to him for his services to this institution. They cannot adequately express their sorrow at the loss of this inspired leader and greatly loved friend.

REPORT OF THE PRESIDENT

*To the Board of Supervisors and the Board of Trustees
of the New York Orthopaedic Dispensary and Hospital,*

LADIES AND GENTLEMEN:

The loss our hospital has suffered in the death of Dr. Hibbs has brought sadness to us all and a feeling of anxiety as to the future. While his wise leadership and stimulating presence will be greatly missed he had, during these past years, gathered about him a group of young men imbued with his ideals, skilled in his methods and thoroughly loyal to the New York Orthopaedic Dispensary and Hospital. Knowing this and assured of the whole hearted devotion to the hospital of Dr. Farrell, now the Surgeon-in-Chief, we may be confident that the welfare of our patients will be safeguarded in the future as in the past.

On the material side our facilities are more complete than ever for the practice of orthopedic surgery in all its branches and for the treatment of all phases of orthopedic cases. The addition to the hospital on 59th Street which is now finished and in service has enabled us to rearrange the operating suite so that four operating rooms are now available, all modern and thoroughly equipped. A new and well planned plaster room adjoins the operating suite. The laboratory has been transferred to new quarters and it now seems to be adequate for our needs for years to come. Perhaps the most notable addition to our facilities is the X-Ray department, now installed on the second floor. This, equipped with the latest improvements and devices, is very complete, comprising four X-Ray rooms, fluoroscopic room, viewing room, dental X-Ray room, and facilities for taking moving pictures, together with waiting room and dressing rooms quite separate from the main body of the hospital.

The only remaining change to be made in our plant is the enlarging of the massage and physio-therapy department. This work is now being undertaken.

Financially, the past year has not been for us a time of such acute anxiety as it has been for many of our sister institutions. For, although we have suffered from the lack of patronage of the private pavilion, where the receipts show a serious falling off, our contributors have loyally supported our work and largely renewed their gifts of former years. The administration is deeply grateful for this evidence of confidence on the part of the public, thanks to which and to somewhat larger receipts from the City it seems likely that we shall close the year with a surplus in current account.

The additions and changes at the Country Branch were completed last year. Thus we have had an opportunity to study the results of one full year's operation. These have been most satisfactory, both as respects economy of administration and improved service to our patients, and have fully justified the capital expense incurred.

There will be published in the year book detailed figures as to the amount of work done in the two hospitals. The total now does not vary materially from year to year, operating as we do to normal capacity, but it is felt that with our improved facilities a somewhat greater number of patients may be treated and treated more efficiently and their stay in the hospital thereby shortened.

The State Board of Charities continues to rank our institution in Class I, both as to plant and administration. The American College of Surgeons classifies the hospital in Grade A, qualified for the training of internes specializing in orthopedics.

To the Staff, the Superintendent and the employees for faithful and devoted service, both at White Plains and in New York, I express the thanks and appreciation of the Trustees and Supervisors.

Respectfully submitted,

ROBERT S. BREWSTER,
President.

REPORT OF THE BOARD OF SUPERVISORS

*To the Trustees,
New York Orthopaedic Dispensary and Hospital.*

GENTLEMEN :

I suppose most of us were glad to say good-bye to 1932. No matter how we are personally situated, the distress, anxiety and suffering of so many of our fellow men have made a deep impression on us all.

The Hospital, and everyone connected with it, has suffered an unforgettable loss in the death of our Surgeon-in-Chief, Dr. Russell A. Hibbs. Those who worked with or for him were inspired by his spirit and genius, and we are all poorer, in a real sense, by the untimely end of his great career.

His able second in command, Dr. Benjamin P. Farrell, has been elected to succeed him.

There have been many things, however, this year to be thankful for. The Hospital has not only been able to keep up its usual work but the building of the new addition here has added materially to the work we can do. The new operating rooms, enlarged X-Ray department and many modern conveniences will make the running of every department more efficient.

This Board has carried out about the same program it sets itself every year. Our Auxiliaries have been faithful and generous and we owe them all both gratitude and praise. Our friends have stood by us, and though in many cases the donations have not been what they were in former years, our friends have not forgotten us and we are most grateful to them.

The Orthopaedic Guild has supported two Free Beds and supplied linen and clothing for two Girls' Wards.

The Junior Guild has supported one Free Bed and given clothing for the children in the Sixth Floor Ward, besides the gift of \$1,500 for a visiting nurse.

The Orthopaedic Red Cross Unit has, as usual, helped greatly by making surgical dressings and the Orthopaedic Hospital Sewing Society by giving linen which is most useful.

Through the generosity of Mrs. Charles B. Alexander, Mrs. Robert S. Brewster, Mrs. Henry White, Mrs. A. Murray Young, Miss Caroline White, Mr. Jack Straus and the Junior League, the

Hospital is able to continue the invaluable services of the Visiting Nurses. In these days of depression and poverty this branch of the Hospital's work is indispensable, and we are most grateful to those who give so generously to it.

After a talk with Miss Root it was decided to curtail the Christmas festivities this year and to use the money thus saved to buy extra baskets of food for the families of the patients. But Christmas was still very gay and happy at the Hospital with its Christmas trees, presents and greens and a delicious dinner.

We are now anxiously facing the New Year, but with a firm faith that we and our loyal friends will carry on and keep this Hospital a living, growing institution to which those who need our help can turn and not turn in vain.

Respectfully submitted,

CORA OLIVER CHOATE,
Secretary.

REPORT OF THE SURGEON-IN-CHIEF

*To the Board of Trustees of New York Orthopaedic
Dispensary and Hospital.*

GENTLEMEN:

The death of our Chief Surgeon, Russell A. Hibbs, was a loss great and irreparable. He was not only a courageous pioneer, but he combined with lofty practical idealism a becoming humility. A great teacher who was always willing to be taught. We who served with him dedicate our thoughts and efforts to carry on the worthwhile work for which this institution was founded.

At the beginning of the year we had under treatment 18,841 patients carried over from the previous year, and admitted 10,562 new patients during the year, which, with 1,086 patients who had previously been discharged from the Dispensary and were re-admitted, makes the total number of patients treated in the institution 30,489. This is a decrease in new cases of 295 from those admitted in 1931, and an increase of 849 in the total number of patients treated.

Table I shows that of the total number of patients treated during the year 1,257 had joint tuberculosis, 11,583 deformities of the feet and legs, 2,324 non-tuberculous deformities of the spine, of which 640 were developmental. There were 1,121 cases of fractures, of which 40 were of the spine; 2,406 were paralytic deformities, and the remaining 11,798 suffered from a great variety of deforming diseases.

This table also shows the results of treatment: 490 patients were discharged cured, 5,144 patients were discharged relieved, making a total of 5,634 patients who were restored to a condition of health where they required no further treatment; 5,983 patients were discharged for other reasons, many of them having come simply for diagnosis, others discharged for neglect, 22 died, leaving 18,850 patients under treatment at the end of the year.

Table II shows the number of revisits made by patients to the Dispensary to be 80,284. The number of visits by new patients was 10,562, making a grand total of 90,846. The number of visits made by the visiting nurses to patients in their homes was 5,450, and the number of patients visited by nurses in their homes was 3,880.

Table III shows in detail the manufacture of braces in the shop. The total number of new instruments made was 3,293, and the number repaired was 3,175.

CITY HOSPITAL. The number of patients in the Hospital on January 1, 1932 was 94. The number admitted during the year was 961; 961 were discharged and 5 died, leaving 89 patients in the hospital on January 1, 1933. The average number in the wards each day was 92, and the average stay of each patient was 32 days. There were 79 waiting for beds at the end of the year. 1,755 operations were performed, 1,149 patients were operated on.

In the Private Pavilion 123 patients were treated during the year.

Table VIII shows that there were 9,296 patients X-rayed, and 21,256 films were used.

COUNTRY BRANCH. The number of patients in the hospital at the beginning of the year 1932 was 146; 367 were admitted during the year, 357 were discharged and 2 died, leaving 154 in the hospital on January 1, 1933. The total number of patients treated was 513. The average number of patients per day during the year was 158.

Table IX shows that at the Country Branch 1,785 patients were X-rayed and 2,021 films were used.

Table VII is the report of the Pathological Laboratory and applies to both hospitals. It shows that the total number of examinations made during the year was 7,897.

The following changes have taken place in the surgical staff during the year. Dr. Swift resigned as attending surgeon of the Country Branch and was appointed Pathologist at the City Hospital, taking the place of Dr. Halbach. Dr. Lantzounis was appointed attending surgeon at the Country Branch. Dr. Watters, assistant attending surgeon, resigned, and this vacancy has been filled by Dr. Inge, who is one of our Fellows.

In June 1932 Dr. Hibbs resigned as Professor of Orthopaedic Surgery from the College of Physicians and Surgeons, Columbia University. At the request of the College that we continue the medical teaching for a time, permission was granted by the Board of Trustees and the work has been carried on as heretofore, the students attending clinics in the Hospital three times a week from September to June.

The alterations in the hospital made possible by the new addition, were completed during the year and the whole of the new facilities are now in use. These changes were brought about and various departments were moved into their new quarters without a single interruption in the routine work of the hospital. This, together with the complete transformation of the Country Branch, was accomplished by the untiring efforts and great efficiency of the Superintendent, Miss Root. It is difficult to convey an adequate idea of the remarkable improvement that these changes have made in the working conditions of everyone in the hospital and of the possibilities which they offer for more efficient service on the part of all.

The four new operating rooms are now in use, increasing by fifty per cent the number of operations that it is possible to do. This has done away with the long wait, in some cases several months, which previously was necessary before patients could be admitted to the hospital, and has reduced the waiting list from 250 to 100. It is now possible to operate on patients in from one to three days after admission to the hospital, whereas before the completion of the new suite, a delay of one week or more often was necessary. With faster turnover in the hospital the Country Branch is being used to its full capacity.

The new plaster room, which is more than twice as large as the old one, has made it possible to do all of this work on the same mornings as the operations. This saves an entire morning each week for the surgical and nursing staff.

The needs of the Pathological Department had outgrown the old Laboratory. The new Laboratory, with its larger space and better equipment makes more efficient the accomplishment of routine work and also provides a place for research in this field, the need for which is keenly felt.

The enlargement of the Dispensary, by reducing congestion and separating various departments, has facilitated greatly the care of the large number of patients treated there. The attendance continues to be very large, ranging from 250 to 500 patients each day, with an average of 350 per day for the year.

A room is now available in the Dispensary for an added service and it is hoped that within the coming year this can be established. Only in this way can the new facilities be developed to their full advantage. With the present four services each surgeon frequently has to see more patients than he can efficiently treat during the course of an afternoon.

The establishing of special clinics for the treatment of lateral curvature and of club foot has been amply justified by the better care which it has been possible to give to these difficult and trying cases. It also has afforded the staff a better opportunity to become familiar with and to study these conditions. Each of these clinics now has adequate space in quarters especially adapted to its needs.

In order to study more carefully the results of operations and to keep in close contact with patients after they leave the hospital, a special follow-up clinic has been in operation for several years. A particular effort is made by the visiting nurses to make these patients return for examination at regular intervals, often a difficult task, because of the failure of a person who has been cured to appreciate the necessity for such visits. During the year 1,747 complete examinations have been made and much valuable data has been gathered.

It has been possible through the economy in time effected by the new plaster room to shift the follow-up clinic to Saturday morning, which insures the attendance of a larger number of school children.

The institution of the Annie C. Kane Fellowships has been of great benefit to the hospital in making available a large staff of well trained, full time men, and at the same time it has placed greater responsibility upon the older members of the staff to make sure that the Fellows are receiving the best training that the opportunity affords. By attendance at rounds, supervised work in the operating room and by acting as assistant surgeon in the Dispensary these men are receiving a unique experience, unequalled in any other institution. They should leave the hospital thoroughly equipped for any responsibility they may be called upon to assume.

A number of investigations have been pursued by the members of the staff, in spite of their responsibilities in the Out-patient Department, in the wards and in the operating room.

The following is a list of the staff papers published in 1932. They were reported last year as having been accepted for publication.

A rare accessory bone of the foot. By Albert B. Ferguson, M.D. *J. Bone and Joint Surg.*, 1932, xlv, pp. 382-3.

Fusion of the elbow joint for tuberculosis. A new technique and a report of three cases. By Halford Hallock, M.D. *J. Bone and Joint Surg.*, 1932, xiv, pp. 145-153.

Congenital dislocation of hip treated by open operation. A report of seventy cases. By M. Beckett Howorth, M.D. and Harold W. Smith, M.D. J. Bone and Joint Surg., 1932, xiv, pp. 299-313.

Monarticular arthritis simulating tuberculosis. A clinical and pathologic study of twenty-four cases. By Alan DeForest Smith, M.D. Arch. Surg., 1932, xxv, pp. 54-64.

PAPERS ACCEPTED FOR PUBLICATION OR PUBLISHED IN 1933.

Divided patellae. By Albert B. Ferguson, M.D. Am. Jour. Roentgenology & Radium Therapy.

The surgery of the sesamoid bones of the great toe. An anatomic and clinical study, with a report of forty-one cases. By George A. L. Inge, M.D. and Albert B. Ferguson, M.D. Arch. Surg.

Russell A. Hibbs. A biographical sketch. By Alan DeForest Smith, M.D. To be published in Master Surgeons of America, Surgery, Gynecology, and Obstetrics.

Removal of vertebral bodies in the treatment of scoliosis. By Herman LeRoy von Lackum, M.D. Reported by Alan DeForest Smith, M.D. Surgery, Gynecology and Obstetrics.

Surgical stimulation of bone growth. By Albert B. Ferguson, M.D. J. Am. Med. Assn., 1933, c, pp. 26-7.

Short metatarsal bones and their relation to poliomyelitis. By Albert B. Ferguson, M.D. J. Bone and Joint Surg., 1933, xv, pp. 98-100.

Russell A. Hibbs. By Alan DeForest Smith, M.D. J. Bone and Joint Surg., 1933, xv, 00. 253-4.

WORK IN PROGRESS.

Dr. Malcolm B. Coutts:

1. An end-result study of atlanto-epistropheal dislocations.
2. An end-result study of operations for reconstruction of the hip joint.

Dr. Albert B. Ferguson:

1. Results of surgical treatment of scoliosis, round back, coxa plana, slipping epiphysis, and short bones for stimulation of growth.
2. Course of scoliosis and of round back in untreated cases.
3. Results of brace treatment in round back.
4. Arthritis; clinical and roentgenological study of the disease.
5. Changes in intervertebral discs after spine fusion.
6. Rôle of the intervertebral disc and of the facets in lumbosacral anomalies.
7. Mobility of the lumbosacral area.
8. Changes in cervical ribs in the growing child.
9. Dynamics of the foot studied in X-rays of moving subjects.
10. Incidence of lumbosacral anomalies in endocrine types.
11. Low voltage X-rays in differential diagnosis of effusions.
12. Data bearing on a theory of hallux valgus.
13. A device for relief of pain in bursitis of the shoulder.

Dr. Halford Hallock:

1. (With Dr. Toumey) End-result study of 163 cases of tuberculosis of the hip, treated by fusion operation.
2. The use of multiple small bone transplants in cases of non-union.

Dr. M. Beckett Howorth:

1. (With Dr. Ferguson) Coxa plana.
2. Closed reductions in congenital dislocation of the hip.
3. Shelf stabilization of the hip.
4. Bone tumors.

Dr. Robert E. Hughes:

1. End-result studies of flexion deformities of the knee.
2. Hip flexion release in poliomyelitis.
3. Elbow fractures.

Dr. George A. L. Inge:

1. Study of end results of synovectomy in cases of chronic arthritis of the knee joint.
2. Study of bacteriophage and its use in treatment of staphylococcus infection.
3. (With Dr. Toumey) An experimental study of bacteriophage therapy in suppurative arthritis.

Dr. William H. von Lackum :

1. Spine studies in convalescent poliomyelitis.
2. Long bone growth in convalescent poliomyelitis:
 - a. Retardation of growth in paralyzed extremities.
 - b. Stimulation of growth by diaphysis drillings.
3. End-results in surgical lengthening of tendo-achillis:
 - a. Poliomyelitis.
 - b. Muscle-bound feet.
 - c. Spastics.
 - d. Congenital club feet.
4. End-results in subastragalar arthrodesis in Friedreich's disease.
5. End-results in osteotomies of the tibia with flexion deformities.
6. Historical study of low back conditions:
 - a. Unstable fifth lumbar.
 - b. Sacro-iliac strain.
 - c. Sciatica.
 - d. Lumbosacral.
 - e. Backache.
 - f. Spine.

Dr. John T. Saunders: (With Dr. Ferguson)

1. Anterior tarsal resection for claw feet; end-result study.
2. Structural lateral curvature; end-result study.
3. Incidence of lumbosacral abnormalities in patients without symptoms.

Dr. Alan DeForest Smith :

1. End-result study of osteomyelitis of the spine.

Dr. James W. Toumey :

1. Scapho-cuneiform arthrodesis; operative results.
2. Operative treatment of recurrent slipping of patella.
3. End-result study of sternomastoid myotomy for torticollis.

Dr. Walker E. Swift: (Laboratory)

1. Study of the relations of the calcium, phosphorus, phosphatase and fibrinogen content of the blood in diseases such as tuberculosis, lesions of the bones, and peripheral vascular disorders.

2. Study of the monocytes in the peripheral blood and the blood sedimentation time as an aid in the diagnosis and prognosis of tuberculosis of the bones and joints.
3. Study of bone repair with the object of determining some way of hastening or making more certain bone growth following fusion of joints and operations for repair of fractures.
4. Study of the vitamins in relation to bone growth and repair.

Respectfully submitted,

BENJ. P. FARRELL,
Surgeon-in-Chief.

* 66 Undiagnosed conditions of previous years given specific diagnoses.

† Changes made in 1931 Diagnoses:

- 1 Congenital Dislocated Hip to Coxa Plana. 1 To Suppurative Arthritis.
- 1 Chronic Arthritis of Knee to Internal Derangement of Knee.
- 1 Abscess to Tumor.
- 1 Tuberculosis of Hip to Chronic Arthritis of Hip.
- 1 Lumbo-Sacral Strain to Unstable 5th Lumbar.
- 1 Chronic Arthritis of Spine to Fracture of Spine.
- 1 Slipped Epiphysis to Congenital Dislocated Hip.
- 1 Infectious Arthritis of Spine to Tuberculosis of Spine.
- 1 Chronic Synovitis of Knee to Tuberculosis of Knee.
- 1 Bursitis to Lipoma.

NEW YORK ORTHOPAEDIC DISPENSARY AND HOSPITAL, COUNTRY BRANCH

REPORT OF THE SUPERINTENDENT

*To the Board of Trustees,
New York Orthopaedic Dispensary and Hospital.*

GENTLEMEN:

It gives me pleasure to report for the sixty-fifth Year Book.

In the death of Dr. Hibbs, who had been the chief surgeon since 1899, this Hospital has lost a great leader and surgeon. His death is recognized as a distinct loss to orthopedic surgery throughout the world. Dr. Hibbs was a man whose hand and mind and heart had always been in this institution from his first coming here. His hands were skilled, his mind was so far-seeing, and his heart so afire that the dreams which he dreamed became realities and lived, and this made us all love him and enjoy working with him. The leadership which he gave to this Hospital and the inspiration will help to carry us on so that the Hospital may realize still further the dreams which he had for the better care of the sick.

This year has seen the completion of the alterations made in the main Hospital building. The operating suite is entirely completed. The X-ray department has been moved to its new quarters, and one new X-ray machine and the fluoroscope have been added to the already existing equipment. The laboratory was moved to new and larger quarters. The massage department and plaster rooms were moved from the main dispensary to quarters formerly occupied by the X-ray department. The Hospital walls throughout the entire building have been redecorated and the buildings at the present time are in excellent condition, and with the enlarged spaces and added equipment we are prepared to do more work than in the past.

The dispensary has been active throughout the year. There were 90,846 total visits at a cost of \$1.00 per visit. Of these 10,562 were new cases; 30,941 were revisits made by patients to the dispensary surgeons. There were 2,092 visits to the scoliosis department, 19,614 visits to the massage department, 23,978 visits to the physiotherapy department, 1,688 visits to the club-foot clinic, and 1,971 visits to the dental department.

The visiting nurses made 5,450 visits to the homes of 3,880 patients.

In the Hospital 1,066 patients were treated. There were 33,919 patient days, at a cost of \$6.01 per day. Of these 19,271 were free days, and 14,648 were pay days. The average stay per patient on the wards was 32 days.

At the Country Branch there were 513 patients treated during the year and there were 57,772 patient days at a cost of \$3.37 per patient day. There were 29,987 pay days and 27,785 free days. The average stay was 113 days.

The nursing department has been carried on as usual. We have continued the post graduate course for nurses both here and at the Country Branch, and find it most satisfactory.

The library, which was instituted some years ago for the patients at the city Hospital, has circulated 6,356 books among the patients this past year. The medical library has received several notable gifts, among them being a first edition of Vesalius. This medical library is used increasingly by the staff.

At the Country Branch the patient problem is very different from that in the city Hospital. The patients are not merely in bed where they are to be taken care of. There are patients in bed and ambulatory patients, both children and adults. The surgical work has been done on these patients before they are sent to the country, and, besides the nursing care, the entire welfare of the patient must be considered. The Board of Education of the City of New York cares for the education of all children of school age. The Hospital provides occupational therapy for all patients. A circulating library makes the reading of books possible and the recreational worker plans and cares for the recreation and play of the patients. All this is very necessary if one is to get the best cure possible.

We are most grateful to the friends of the hospital who have contributed so generously of their money and time, and to those who have given care to our dispensary patients during the summer, and for the many gifts and donations which have been received from individuals and organizations.

Respectfully submitted,

THEODORA S. ROOT,
Superintendent.

AUDITORS' CERTIFICATE

*New York Orthopaedic Dispensary and Hospital,
New York, N. Y.*

We examined the accounts of NEW YORK ORTHOPAEDIC DISPENSARY AND HOSPITAL, comprising the City Dispensary and Hospital, Country Branch, Legacy under the Will of Caroline A. James and the Annie C. Kane Endowment Fund and maintained on a cash basis by the Central Hanover Bank and Trust Company as Assistant Treasurer, for the year ended December 31, 1932.

We certify that, in our opinion, the accompanying balance sheets and the related statements of receipts and disbursements set forth the financial position of the institution as at December 31, 1932, and the results of operations on a cash basis for the year then ended.

LYBRAND, ROSS BROS. & MONTGOMERY,

New York, March 15, 1933.

As at December 31, 1932

ANNUAL REPORT
OF
ORTHOPAEDIC HOSPITAL GUILD
1 9 3 2

The Orthopaedic Hospital Guild has been active during the year. Linen has been supplied to the Guild wards, and the Orthopaedic Hospital Red Cross Unit, of which Mrs. Higgins is director, has made 56,701 dressings.

The Guild has paid for one endowed bed, purchased cod liver oil for Dispensary patients, filled Christmas stockings for patients in the Guild wards, and paid toward the salary of the Guild seamstress, as the Treasurer has reported.

We regret to report the death of one member, Miss Rosalie Spang, and the resignation of another, Mrs. Samuel T. Gilford, but we have been fortunate enough to add two new active members to the Guild, Mrs. G. S. B. Darlington and Miss A. Mayo-Smith.

Respectfully submitted,

AGNES L. JOHNSON,
Secretary pro tem.

REPORT OF THE
ORTHOPAEDIC HOSPITAL SEWING SOCIETY

1 9 3 2

The Orthopaedic Hospital Sewing Society has met regularly through the year, and the work has been carried on as usual. With deep regret we report the deaths of Mrs. Hadden, Mrs. Suydam, Mrs. Chisholm and Mrs. Hudson, who have long been valued members of the Society.

The inventory of linen is as follows:

Number of articles on hand January 1st, 1932.....	5,077
Number of articles added during the year.....	3,695
Total	<hr/> 8,772
Number of articles used during the year.....	3,388
Number of articles on hand January 1st, 1933.....	5,384

Respectfully submitted,

EMILY H. DE RHAM,
Secretary.

Mrs. Louis Haight	Miss Frances Stiger
Mrs. John M. Howells	Mrs. Clarence B. Sturges
Mrs. Francis C. Huntington	Mrs. David H. Taylor
Mrs. Walter Kobbé	Mrs. Paul Thébaud
Miss Esther Waterman	

REPORT OF THE JUNIOR GUILD

The work of the Junior Guild has been the same during the past year. At our Lenten meetings, held every Wednesday morning at the residences of the different members of the committee, we make garments for the children in the wards.

We decided this year that it would not be necessary to send out our annual appeals as we had a sufficient amount in the treasury for our expenses, and as there were such unprecedented demands being made on the public from so many other sources.

Respectfully submitted,

FLORENCE S. KOBÉ,
Secretary.

REPORT OF THE JUNIOR GUILD

From January 1st, 1932, to December 31st, 1932

Receipts		Expenditures

MELINDA G. REMSEN,
Treasurer.

The sum of \$7,500 endows a bed in perpetuity, and the sum of \$350 endows a bed for one year.

FORM OF CERTIFICATE TO THE DONOR OF AN
ENDOWED BED IN PERPETUITY

New York Orthopaedic Dispensary and Hospital

This is to Certify that the New York Orthopaedic Dispensary and Hospital through its Trustees has received from

.....
herein designated as the donor, a fund of Seven Thousand Five Hundred Dollars, for the purpose of founding and maintaining in accordance with its corporate powers an endowed bed in its Hospital in perpetual memory of

.....
The donor shall have the privilege of nominating the occupant of said bed, but such nomination and the use of said bed shall be subject to all such rules and regulations governing endowed beds, and providing for the treatment, reception and discharge of patients as now exists or which may hereafter be enacted by the Board of Trustees of said Dispensary and Hospital.

Witness this corporate seal of the New York Orthopaedic Dispensary and Hospital, and the signatures of two of its officers, this.....day of.....one thousand nine hundred and.....

.....
Secretary.

.....
President.

FORM OF BEQUEST

I bequeath to the New York Orthopaedic Dispensary and Hospital, a corporation incorporated under the Laws of the State of New York, the sum of..... dollars to be applied to the benevolent uses and purposes of said hospital.

NEW YORK ORTHOPAEDIC DISPENSARY AND HOSPITAL

420 EAST 59TH STREET

*Open from 1 to 3 P. M. Daily (Sundays and Legal Holidays Excepted)
for the Reception and Treatment of Patients*

OBJECTS OF THE INSTITUTION.—“To furnish treatment to the poor with special reference to the Diseases and Deformities of the Spine and the Hip Joints and other of the more serious diseases of the bones and joints requiring surgical and mechanical treatment, and for giving instruction in the same.” All cases of deformity, besides those mentioned, including Club Foot, Lateral Curvature of the Spine, Infantile Paralysis, Bow-Legs, etc., are received and treated.

RULES GOVERNING THE ADMISSION OF PATIENTS TO THE DISPENSARY DEPARTMENT.—Professional services are rendered gratuitously. Those who can afford to do so are expected to reimburse the Institution for the actual cost of apparatus. Payment for apparatus is received in installments, if required. Apparatus, however, is never *sold* to patients or others, the Institution reserving the right to remove the apparatus and discharge any patient not complying with the directions of the Surgeons. Apparatus will not be supplied in any case that does not come under the immediate care of the Institution.

RULES GOVERNING THE ADMISSION OF PATIENTS TO THE HOSPITAL DEPARTMENT.—Any suitable Orthopedic case may be admitted. Application for admission may be made at the Hospital during the regular Dispensary hours.

RULES GOVERNING THE ADMISSION OF PATIENTS TO THE COUNTRY BRANCH.—Applications for admission to this Hospital are made through the City Hospital, and only patients who are under treatment at the City Hospital will be admitted to the Country Branch.

THE MEDICAL PROFESSION and the public generally are invited to visit the Institution.

THE INSTITUTION is supported by the contributions of the benevolent. Contributions, which are earnestly solicited, may be sent to the Treasurer.

INTERNE SERVICE

The house staff consists of eight internes, each serving for two years. Appointments are made in February, May, August and November, and only those who have served a general hospital internship are eligible.

Application blanks will be sent upon request.

ANNIE C. KANE FELLOWSHIPS

Eight fellowships known as the Annie C. Kane Fellowships have been established at this hospital. These fellowships offer to selected young surgeons who have first completed their internship in this hospital an opportunity to continue their training in orthopedic surgery for from three to five years, and will carry a salary.

REPORT OF THE PRESIDENT

*To the Board of Trustees and the Board of Supervisors
of New York Orthopaedic Dispensary and Hospital,*

LADIES AND GENTLEMEN :

Last year's report referred to the completion of the addition to the hospital on 59th Street, all but the rearrangement of the Massage and Physio-Therapy departments. Since then these two departments have been installed and have been functioning in their new quarters. The result has been most satisfactory. More patients can be treated with greater efficiency. The confusion in the Dispensary due to inadequate waiting and dressing rooms has been materially lessened and the strain on the doctors and nurses lightened.

As was anticipated, the four new operating rooms which have replaced the amphitheatre, have enabled us to increase the number of operations performed so that the list of patients awaiting operations has been greatly reduced, and the total number of patients treated increased by more than 20% in both hospitals.

Economies have been practised both in the City hospital and at the Country Branch. Notwithstanding the increase in the number of patients, expenses have been reduced at both hospitals to a figure materially less than last year, a result reflecting much credit upon the management.

Our income, however, has been less in all four of its main sources.

- (1) Receipts from patients
- (2) Donations and subscriptions
- (3) Income from invested funds
- (4) Income from commercial real estate

The lack of patronage of the Private Pavilion accounts in large measure for the falling off in the first item. Our friends have supported our work loyally, but it is natural that many felt obliged to reduce their gifts and some to omit them altogether. We have suffered less from a smaller revenue from endowment than many of our sister institutions, the percentage of decrease in interest and dividends being gratifyingly small under the circumstances. The loss of income from real estate held as principal in the different funds has been severe, for reasons too obvious to be particularly noted.

The deficit in the City hospital accounts at the end of the year will be partly offset by the surplus at the Country Branch, so that to meet the net deficit will not need an excessive appropriation from the James Fund. It has been necessary to draw upon accumulated surplus income in the Kane Fund to meet the appropriations for fellowship salaries. It is hoped that with an improvement in real estate conditions, (real estate comprising the principal of the Kane Fund) the income in this account will be restored to its former figure and all yearly charges met.

The work done by the Surgeon-in-Chief and his associates has been of a high order, fully maintaining the standards heretofore established. Much research work has been done and several original papers published by members of the staff. The Laboratory has been strengthened this past year and plans are being considered for undertaking some original research, particularly pertaining to problems to be met with in Orthopedics. It is hoped that funds for this work may be made available.

The X-ray department, admirably equipped and staffed, is making a most valuable contribution to our work.

Both hospitals continue to be rated in Class I as to plant and administration by the State Board of Charities.

To the Staff, the Superintendent and the employees for faithful and devoted service, I express the thanks and appreciation of the Trustees and Supervisors.

Respectfully submitted,

ROBERT S. BREWSTER,
President.

REPORT OF THE BOARD OF SUPERVISORS

To the Trustees,

New York Orthopaedic Dispensary and Hospital.

GENTLEMEN :

The loss the Board has suffered this year in the death of Mrs. Douglas Robinson is a personal one to each of us. Her unfailing interest and real affection for the Hospital and everything connected with it, her gay sympathy and intelligent criticism are things that we can never replace and shall always miss.

The past year has been so full of anxiety and depression that we look at the Hospital with a thankful heart, for though many of our oldest friends have had to cut their gifts to us and in some cases omit them entirely, we have been able to carry on our work in about the same way as in former years. To all these friends we owe our sincere thanks for their unfailing interest and help.

To the Auxiliaries, too, we are most grateful. They have worked well but here, also, the work has had to be curtailed. The Orthopaedic Hospital Guild has supplied linen and clothing for two Girls' Wards but this year has had to give up the support of their two Free Beds. The Junior Guild has contributed toward the salary of a visiting nurse and given clothing to the children in the Sixth Floor Ward. The Orthopaedic Hospital Red Cross Unit has, as usual, helped greatly by making surgical dressings, and the Orthopaedic Hospital Sewing Society by giving linen.

We are grateful to Mrs. Charles B. Alexander, Mrs. Henry White, Mrs. A. Murray Young, Miss Caroline White, Mr. Jack Straus and the Junior Guild for continuing to give so generously to the Visiting Nurses' Fund. This branch of the Hospital work cannot be praised too highly. Without it the important follow-up and after-care work could not be carried on.

Christmas this year was simplified as much as possible. Presents and decorations were fewer and as much money as possible was spent on baskets for the families of the Dispensary patients.

The past few years have been such difficult ones for everyone that even the faintest sign of the lifting of the depression is hailed with joy. There really seems to be a trace of this so let us face 1934 with renewed hope, courage and patience.

Respectfully submitted,

CORA OLIVER CHOATE,
Secretary.

REPORT OF THE SURGEON-IN-CHIEF

*To the Board of Trustees of New York Orthopaedic
Dispensary and Hospital.*

GENTLEMEN :

At the beginning of the year 1933 there were 18,850 Dispensary patients carried forward from 1932. 10,712 new cases were received in the Dispensary during 1933, a slightly increased number from 1932. Table I is a classification of the types of conditions which brought these new patients to us.

Table II is the report of the Dispensary visits, there having been 95,826 visits in 1933, 4,980 more than in 1932. The Visiting Nurses made 4,447 visits to 3,702 patients in their homes.

Table III is the detailed report of the manufacture of instruments in the Brace Shop. 2,681 new instruments were made and 2,761 were repaired.

Table IV is the hospital report for the year 1933. It shows that 582 patients were discharged cured, 778 improved under treatment, 56 showed no improvement, 2 were incurable, 6 died and 11 were transferred to other hospitals. It also records that 130 patients had tuberculous joints; 101 had fractures, 7 being of the spine; there were 130 cases of non-tuberculous deformities and developmental conditions of the spine; and 259 cases of deformities and developmental conditions of the feet and legs.

Table V is the report of the operations performed in 1933, a total of 2,206; 1,308 patients were operated on.

CITY HOSPITAL: The number of patients in the Hospital on January 1, 1933 was 89. The number admitted during the year was 1,172; 1,162 were discharged and 4 died, leaving 95 patients in the Hospital on January 1, 1934. The average number in the wards each day was 92, and the average stay of each patient was 26.5 days. There were 29 waiting for beds at the end of the year. The number of patients treated was 1,261.

In the Private Pavilion 118 patients were treated during the year 1933.

Table VIII shows that there were 9,250 patients x-rayed; 20,250 films were used.

COUNTRY BRANCH: The number of patients in the Hospital at the beginning of 1933 was 154; 420 were admitted during the

year, 416 were discharged, and none died, leaving 158 in the Hospital on January 1, 1934. The total number of patients treated was 574. The average number of patients per day during the year was 160.

Table IX shows that at the Country Branch 1,226 patients were x-rayed, and 1,794 films were used.

Table VII is the report of the Pathological Laboratory and applies to both hospitals. A total number of 6,501 examinations was made during the year.

The work of the surgical staff of the hospital during the past year has been measurably facilitated by the marked enlargement and improvement in the buildings which were recently completed. Changes in various departments have been effected or are under way which are a direct outcome of the former.

It was realized for some time that defects existed in the nomenclature of disease used in our case histories and in the system of filing our records. A committee of the staff under the chairmanship of Dr. Howorth was appointed to take up the question of a new system of terminology for disease and for operations, and to cooperate with the historian in the revision of the filing system. It was decided to adopt, with certain additions, the terminology introduced in 1933 by the National Conference of Nomenclature of Disease which has been accepted by the American Medical Association, the American College of Surgeons, and other national societies. This system was devised by Dr. H. B. Logie, who was consulted by the committee and whose valuable counsel was of the greatest assistance in completing this work. It was necessary to create our own terminology for operations, which was done in accordance with the principles of the one for disease. As a part of this system each term has its code number which is used on the index cards and which results in economy of space and of labor, only one-tenth as many cards being necessary.

The historian consolidated into one the several name files which were needed under the old system and preparations were made to put the changes into effect on January 1st, 1934. It is believed that this will result in enhanced efficiency in handling of the records and will greatly facilitate their use in the researches which are constantly being made by the staff.

The following changes have occurred in the surgical staff: Dr. James W. Toumey completed an Annie C. Kane fellowship of three years on December 1st, and was appointed an Assistant Attending Surgeon to take effect on January 1st, 1934. Dr. M.

Beckett Howorth completed a four and one-half year period as a Fellow on January 1st, 1934. During two years of this time Dr. Howorth served with ability as Attending Surgeon. He also was appointed Assistant Attending Surgeon and has received the appointment of Consulting Orthopedic Surgeon to the Vanderbilt Clinic, College of Physicians and Surgeons. The hospital is fortunate in being able to retain the services of both these men.

The staff of the hospital has continued to carry on the teaching in orthopedic surgery to the students of the College of Physicians and Surgeons. Many of the Fellows participate in this and in addition many of them have been used as instructors of anatomy in the College. This has done much to further the education of the Fellows themselves, and has been a valuable addition to their training.

Columbia University has established the degree of Master of Medical Science for post graduate education in medicine and has recognized those who have completed an Annie C. Kane fellowship of three years as eligible to receive this degree upon the certification of the Surgeon-in-Chief and the submission of an acceptable thesis. Two Fellows already have had their theses accepted and others are working on theirs. This constitutes another recognition of the importance of these fellowships, which are attracting widespread interest. It is believed that at least in part because of them fellowships are being established in other hospitals.

Several years ago our internes were to a large extent the graduates of the College of Physicians and Surgeons. Applications now are being received from all parts of the country and men are being selected from the west as well as from the east. This will mean that in time as they return to their homes to practice, the influence of the hospital upon orthopedic surgery will be more widely dispersed. Sixty-eight applications for internships were received during the past year. Again much of this interest may be traced to the fellowships.

The question of the responsibility of hospital staffs for the better and more systematic instruction of their internes has been widely discussed recently. For several years a regular course of lectures on orthopedic surgery has been given in the evenings to the house officers of this hospital and Dr. Ferguson in addition to this gives a course in roentgenology.

The generosity of the Trustees in increasing the budget for the laboratory for the year 1934 will make possible an increased use of this department. Because of the press of routine work

which becomes ever greater with the advance of medical science, the staff of the laboratory, including only one technician, has been insufficient to carry on any extensive research work. It will now be possible to engage a second technician and thus to work on a number of problems, including the following:

A continuation of the work begun by Dr. Inge on the use of bacteriophage in staphylococcus infections of the joints, bones, and other tissues.

A study of the sedimentation rate of blood and its application to the diagnosis and prognosis of bone and joint tuberculosis.

A study of the chemistry of the blood, including determinations of the serum calcium, phosphorus, phosphatase and protein in patients with abnormal bone conditions.

Animal experimentation, using rabbits, for the study of the intricate and difficult problems of bone growth and bone repair. These are fundamental questions in orthopedic surgery which apply to most of our clinical problems and about which it is most important to have more accurate information.

PUBLICATIONS OF THE STAFF OF THE NEW YORK ORTHOPAEDIC DISPENSARY AND HOSPITAL DURING THE YEAR 1933.

*Surgical stimulation of bone growth by a new procedure. By Albert B. Ferguson, M.D. J. Am. Med. Assn., 1933, c, pp. 26-27.

*Short metatarsal bones and their relation to poliomyelitis. By Albert B. Ferguson, M.D. J. Bone & Joint Surg., 1933, xv, pp. 98-100.

A device for the relief of pain in bursitis at the shoulder. By Albert B. Ferguson, M.D. J. Bone & Joint Surg., 1933, xv, pp. 807-808.

The os epipyramis: report of a case. By Albert B. Ferguson, M.D. J. Bone & Joint Surg., 1933, xv, p. 1001.

*Surgery of the sesamoid bones of the great toe. An anatomic and clinical study, with a report of forty-one cases. By George A. L. Inge, M.D. and Albert B. Ferguson, M.D. Arch. Surg., 1933, xxvii, pp. 466-489.

*Removal of vertebral bodies in the treatment of scoliosis. By Alan DeForest Smith, M.D. Reporting for Herman LeRoy von Lackum, M.D. Surg., Gynec. & Obstet., 1933, lvii, pp. 250-256.

*Reported in January, 1933 as having been accepted for publication.

A benign form of osteomyelitis of the spine. By Alan DeForest Smith, M.D. J. Am. Med. Assn., 1933, ci, pp. 335-337.

PAPERS READY FOR PUBLICATION.

Atlanto-epistropheal subluxations. By Malcolm B. Coutts, M.D.

The clinical and roentgenographic interpretation of lumbosacral anomalies. By Albert B. Ferguson, M.D.

Calcification in fat pads about the joints. By Albert B. Ferguson, M.D.

The correction of knee-flexion deformity, after poliomyelitis, by wedging plasters. By Robert E. Hughes, M.D. and Joseph C. Risser, M.D.

A study of the etiology and treatment of clawfoot, with a report of the results of one hundred and two feet treated by anterior tarsal resection. By John T. Saunders, M.D.

Posterior displacement of the fifth lumbar vertebra. By Alan DeForest Smith, M.D.

An end-result study of one hundred and sixty-three cases of tuberculosis of the hip-joint treated by fusion. By Halford Hallock, M.D. and James W. Toumey, M.D.

WORK IN PROGRESS.

Alan DeForest Smith, M.D.:

1. (With Dr. Angus MacDonald Frantz) Study of sciatica.
2. Use of heterogenous bone grafts in osteogenesis imperfecta.

Albert B. Ferguson, M.D.:

Ready for publication:

1. (With M. Beckett Howorth, M.D.) Classification of coxa plana and related conditions at the hip.
2. (With M. Beckett Howorth, M.D.) Coxa plana: a study of 75 cases.

To be presented at American Medical Association meeting in June 1934:

1. (With M. Beckett Howorth, M.D.) Coxa magna; a condition of the hip related to coxa plana.

2. (With M. Beckett Howorth, M.D.) Exhibit on coxa plana.
3. (With Halford Hallock, M.D. and James W. Toumey, M.D.) Results of fusion of the hip for tuberculosis.

Present studies :

1. Operative results in
 1. Coxa plana.
 2. Slipping epiphysis.
 3. Stimulation of growth.
 4. Round back.
2. Round back. Course in untreated cases and with brace treatment.
3. Growth of extremities (Committee on Growth).
4. Intervertebral discs:
 1. After spine fusion.
 2. In lumbo sacral anomalies.
 3. Nucleus pulposus defects. (With Malcolm B. Coutts, M.D.).
5. Lumbo sacral area.
 1. Mobility.
 2. In symptomless backs.
 3. Incidence of anomalies in endocrine types.
6. Cervical ribs in growing children.
7. Roentgen study of dynamics of foot.
8. Course of scoliosis in untreated cases. (With Joseph C. Risser, M.D.) (Completed).
9. (With M. Beckett Howorth, M.D.) Book on orthopedics.
10. (With Dr. Taylor of Presbyterian Hospital, about completed) Study of arthritis.
11. Bone metabolism, repair and transformation.

Leonidas A. Lantzounis, M.D.:

1. End-result study of wedging round back treated by fusion.

Halford Hallock, M.D.:

1. Tuberculosis of the hip joint. End-results of fusion.
2. End-results of open reductions and bone grafts in the repair of non-union of fractures.
3. The use of multiple small bone transplants in the repair of congenital pseudarthroses.

M. Beckett Howorth, M.D.:

1. (With Albert B. Ferguson, M.D.) Coxa plana.
2. Congenital dislocation of the hip:—
 1. Thesis for M.M.S. degree.
 2. Material assembled for paper on closed reductions since 1920.
 3. Material partly assembled for paper on open reductions since 1929.
3. Shelf operations. (Material assembled)
4. Ecchinococcus cyst. Report of case. (Material in hand)
5. Calcaneo-navicular pseudarthroses. (Material in hand)
6. Chip operations in bone tumors. (Material in hand)
7. Closed and open reduction slipped upper femoral epiphysis, since 1930.

John T. Saunders, M.D.:

1. Study of the etiology of clawfoot.
2. Study of scoliosis.
3. Lumbo sacral abnormalities.

George A. L. Inge, M.D.:

1. Experimental suppurative arthritis and its treatment with bacteriophage.
2. End-result study of treatment of suppurative arthritis in New York Orthopaedic Dispensary and Hospital.

James W. Toumey, M.D.:

1. End-result study of knee-joint tuberculosis treated by fusion.
2. Naviculo-cuneiform arthrodesis in weak feet.
3. Operative treatment of recurrent dislocation of the patella.

Robert E. Hughes, M.D.:

1. Open release of knee flexion deformity, in poliomyelitis, congenital deformity, residual suppurative arthritis, spastic paraplegia.
2. Spine fusion for fracture.
3. Report on results in section of clubfoot clinic.

Malcolm B. Coutts, M.D.:

1. Congenital clubfoot: A clinical study of its etiology, pathology and the results of various types of therapy.

William H. von Lackum, M.D.:

1. Tuberculosis of the spine.
2. Spine studies in convalescent poliomyelitis.
3. (With Albert B. Ferguson, M.D.) Long bone growth in poliomyelitis.
4. Fractures of the ankle treated by ankle fusion.
5. Subtalar arthrodesis in Friedreich's ataxia.

Francis Brewer, M.D.:

1. Special study: Calcaneal tendon-lengthening for muscle-bound flat feet.

George A. Duncan, M.D.:

1. Skeletal and coincident extraskeletal tuberculosis. A statistical study of 292 patients with skeletal tuberculosis.
2. Coccygodynia.

Henry F. Ullrich, M.D.:

1. (With Walker E. Swift, M.D.) Growth stimulation of long bones in animals.
2. Scoliosis: graphic and diagrammatic representation.

A. Gurney Kimberley, M.D.:

1. A study of the after effects and the treatment of mal-united fractures involving the ankle joint.

Respectfully submitted,

BENJ. P. FARRELL,
Surgeon-in-Chief.

NEW YORK ORTHOPAEDIC DISPENSARY AND HOSPITAL, COUNTRY BRANCH

REPORT OF THE SUPERINTENDENT

*To the Board of Trustees,
New York Orthopaedic Dispensary and Hospital.*

GENTLEMEN :

I have the honor to present the report of the Superintendent for the year 1933.

During the past year there were 95,826 visits to the Dispensary. 10,712 of these were first visits made by new patients. A charge of \$1.00 is made for the first visit and 1,179 of these cases were unable to meet this charge.

In the wards 1,261 patients received 33,433 days' care, and in the Private Pavilion there were 2,697 days' care. The cost per patient day in the ward was \$5.99.

The Visiting Nurses and Social Service Department made 4,447 visits to patients in their homes. We are pleased to look forward to the fact that we have a small fund in this department to use this coming year for the needs of the patients.

The X-ray and Laboratory Departments have found it necessary to give a great deal of free treatment, because so many patients are unable in these times to meet the cost.

At the Country Branch 574 patients were treated during the year, and there were 58,432 patient days. The daily per capita cost was \$3.73. The Country Branch is being used more and more to its fullest capacity. Patients who are admitted to the hospital in the city and are to remain in bed for more than six weeks are transferred to the Country Branch as soon after operation as possible and remain there for long periods in bed and for convalescent care. The average stay at the Country Branch this year was 160 days. Here not only the surgical and nursing care are important, but the occupational therapy and recreation play important parts.

With the continuance of the economic depression, and the necessary adjustments and economies which we have made, it has been difficult to maintain the high quality of service which we wish to render to the patient, but not only has this been done, but there have been more patients treated this year at both the city hospital and the Country Branch.

The revenue from patients has been less this year and gifts to the hospital have been smaller. However, the decreased operating income has been offset somewhat this year by the decreased

operating expenses and we have closed the year better off than a year ago.

The Private Pavilion has been used by private patients this year at about the same occupancy as last year.

In the Dispensary two new clinics have been added. These clinics were found necessary in order to make it possible to treat the large number of patients who come every afternoon and not necessitate their waiting so long.

The usual amount of repairs to the plant in both the city and country has been carried on. No additions were made and no equipment of outstanding note was purchased.

The former patients at the Country Branch wished to show their love and appreciation of Dr. Hibbs and of the great work which he had done for them, and decided upon planting a tree as a memorial. An oak tree was planted on the grounds of the Country Branch in July, 1933, with appropriate exercises and a tablet was unveiled.

The hospital met with a great loss this year in the death of Mrs. Douglas Robinson, daughter of Theodore Roosevelt, the founder. Mrs. Robinson's interest in the welfare of the hospital and the workers was deep and never-failing, and we miss her sympathetic smile, her words of encouragement and her cordial handshake.

To the friends of the hospital who have contributed in various ways we are most grateful, and thanks are due to my assistants, department heads and personnel for their service and loyalty to the hospital, and I wish to thank the Trustees and Supervisors for their continued support.

Respectfully submitted,

THEODORA S. ROOT,
Superintendent.

AUDITORS' CERTIFICATE

*New York Orthopaedic Dispensary and Hospital,
New York, N. Y.*

We examined the accounts of the NEW YORK ORTHOPAEDIC DISPENSARY AND HOSPITAL, comprising the City Dispensary and Hospital, Country Branch, Legacy under the Will of Caroline A. James and the Annie C. Kane Fellowship Fund and maintained on a cash basis by the Central Hanover Bank and Trust Company as Assistant Treasurer, for the year ended December 31, 1933.

Real estate mortgages and mortgage participations, including past due and open items and mortgages on which interest is in arrears, are shown in the accompanying statements at face amount or at cost if less, as market values are not available.

On this basis we certify that, in our opinion, the accompanying balance sheets and the related statements of receipts and disbursements set forth the financial position of the institution as at December 31, 1933, and the results of operations on a cash basis for the year then ended.

LYBRAND, ROSS BROS. & MONTGOMERY.

New York, March 15, 1934.

ANNUAL REPORT
OF THE
ORTHOPAEDIC HOSPITAL GUILD
For 1933

The Orthopaedic Hospital Guild has met regularly during its season in 1933, and has rendered as much service as it could to the Hospital. Payment was made toward the salary of the Guild seamstress, and cod liver oil was purchased for Dispensary patients.

The Orthopaedic Hospital Red Cross Unit, under the direction of Mrs. Richard H. Higgins, has made 48,951 dressings.

At Christmas there were so few children in the Guild wards that instead of the filled stockings which the Guild has given for many years, Christmas trees and decorations were given by Mrs. Alexander and Mrs. Smyth through the Guild.

We regret that we must report the death of one member, Mrs. John T. Terry, and the resignation of two others, Mrs. H. Wilmerding Payne, and Miss Annie Rose Walker.

Respectfully submitted,

AGNES L. JOHNSON,
Secretary pro tem.

REPORT OF THE
ORTHOPAEDIC HOSPITAL SEWING SOCIETY

1933

The Orthopaedic Hospital Sewing Society has met as usual during the season. Mrs. Douglas Robinson, a member of the Society for many years, died February 17th, and other members have resigned for one reason or another. We are very anxious for more active members to join the Society.

The Society has given \$349.80 toward the purchase of linen for the hospital.

Respectfully submitted,

EMILY H. DE RHAM,

Secretary.

REPORT OF THE JUNIOR GUILD

The work of the Junior Guild has been more or less the same for the past year. During Lent we meet every Wednesday to make garments for the children in the wards.

Due to circumstances we were obliged to temporarily curtail some of our donations toward the Hospital expenses.

We regret the resignation of Miss Cornelia Osborne from our Committee.

Respectfully submitted,

FLORENCE S. KOBÉ,
Secretary.

The sum of \$7,500 endows a bed in perpetuity, and the sum of \$350 endows a bed for one year.

FORM OF CERTIFICATE TO THE DONOR OF AN
ENDOWED BED IN PERPETUITY

New York Orthopaedic Dispensary and Hospital

This is to Certify that the New York Orthopaedic Dispensary and Hospital through its Trustees has received from

.....
herein designated as the donor, a fund of Seven Thousand Five Hundred Dollars, for the purpose of founding and maintaining in accordance with its corporate powers an endowed bed in its Hospital in perpetual memory of

.....
The donor shall have the privilege of nominating the occupant of said bed, but such nomination and the use of said bed shall be subject to all such rules and regulations governing endowed beds, and providing for the treatment, reception and discharge of patients as now exists or which may hereafter be enacted by the Board of Trustees of said Dispensary and Hospital.

Witness this corporate seal of the New York Orthopaedic Dispensary and Hospital, and the signatures of two of its officers, this.....day of.....one thousand nine hundred and.....

.....
Secretary. President.

FORM OF BEQUEST

I bequeath to the New York Orthopaedic Dispensary and Hospital, a corporation incorporated under the Laws of the State of New York, the sum of..... dollars to be applied to the benevolent uses and purposes of said hospital.

NEW YORK ORTHOPAEDIC DISPENSARY AND HOSPITAL

420 EAST 59TH STREET

*Open from 1 to 3 P. M. Daily (Sundays and Legal Holidays Excepted)
for the Reception and Treatment of Patients*

OBJECTS OF THE INSTITUTION.—“To furnish treatment to the poor with special reference to the Diseases and Deformities of the Spine and the Hip Joints and other of the more serious diseases of the bones and joints requiring surgical and mechanical treatment, and for giving instruction in the same.” All cases of deformity, besides those mentioned, including Club Foot, Lateral Curvature of the Spine, Infantile Paralysis, Bow-Legs, etc., are received and treated.

RULES GOVERNING THE ADMISSION OF PATIENTS TO THE DISPENSARY DEPARTMENT.—Professional services are rendered gratuitously. Those who can afford to do so are expected to reimburse the Institution for the actual cost of apparatus. Payment for apparatus is received in installments, if required. Apparatus, however, is never *sold* to patients or others, the Institution reserving the right to remove the apparatus and discharge any patient not complying with the directions of the Surgeons. Apparatus will not be supplied in any case that does not come under the immediate care of the Institution.

RULES GOVERNING THE ADMISSION OF PATIENTS TO THE HOSPITAL DEPARTMENT.—Any suitable Orthopedic case may be admitted. Application for admission may be made at the Hospital during the regular Dispensary hours.

RULES GOVERNING THE ADMISSION OF PATIENTS TO THE COUNTRY BRANCH.—Applications for admission to this Hospital are made through the City Hospital, and only patients who are under treatment at the City Hospital will be admitted to the Country Branch.

THE MEDICAL PROFESSION and the public generally are invited to visit the Institution.

THE INSTITUTION is supported by the contributions of the benevolent. Contributions, which are earnestly solicited, may be sent to the Treasurer.

COUNTRY BRANCH—WHITE PLAINS, N. Y.

REPORT OF THE PRESIDENT

*To the Board of Trustees and the Board of Supervisors
of New York Orthopaedic Dispensary and Hospital.*

LADIES AND GENTLEMEN :

The two Hospitals have been conducted this year well within the budget and if the payments due from the City of New York are received before the end of the year we may look forward to closing our books without a deficit. This is a very gratifying situation reflecting credit on the management for wise and careful supervision.

While expenses have been reduced somewhat there has been an increase in receipts in several departments, notably from the Private Pavilion. In the City Hospital the increases in the items of receipts from patients and payments due from the City of New York have more than offset the decrease in subscriptions and donations. At the Country Branch the increased receipts from board of patients were especially marked.

The physical properties have been well maintained and reflect the generous provision made each year for renewals and repairs. At the Country Branch the outer boundary of the property has been defined by a substantial fence, a measure of protection which will simplify the task of supervision.

The experimental work for the study of bone growth undertaken by the staff and the laboratory has been started and will be continued, although it is too early yet to report any striking results.

The professional side of our work has been recognized by the appointment of Dr. Farrell as Professor of Orthopedic Surgery at the College of Physicians and Surgeons, Columbia University, this appointment carrying with it membership in the Medical Faculty. Dr. Alan de F. Smith has been appointed an Associate Professor. Both he and Dr. Farrell conduct a course of lectures at the College, while the fourth year medical students visit the hospital three times a week for clinical instruction.

A course in applied anatomy as related to orthopedics is also given at the College, conducted by the younger members of our staff.

The number of Fellows appointed by the Kane Fellowship Committee remains as heretofore. This establishment is of increasing value to our Hospital and should prove of great importance in extending the knowledge and practice of orthopedic surgery, as developed in our Hospital, throughout the country.

The new degree of Doctor of Medical Science established recently by Columbia University has been granted to the following members of our staff:—Doctors Inge, Howorth, Saunders and Toumey, whose three-year service at the Orthopaedic Hospital supplemented by technical theses qualified them for this honor. Their three-year fellowships under the Kane Fund have been accepted as the equivalent of three years advanced study at the University.

The committee appointed to consider a suitable memorial to Dr. Hibbs has recommended the establishing of the Russell A. Hibbs Memorial Library Fund. The Trustees have approved the recommendation and the fund has been started with an appropriation of \$25,000. The income of the fund will be used to defray the expenses of the Library which was started by Dr. Hibbs and in which he was deeply interested. It is serving a definitely useful purpose and its value to the science of orthopedics will grow with the years. It is hoped that the fund thus started will grow to substantial proportions and it is believed that the many friends and former patients of Dr. Hibbs will wish to evidence their affection and regard for his memory by contributing to it.

Both Hospitals continue to be rated in Class I, as to plant and administration, by the State Board of Charities.

To the Staff, the Superintendent and the Employees for faithful and devoted service, I express the thanks and appreciation of the Trustees and Supervisors.

Respectfully submitted,

ROBERT S. BREWSTER,
President.

REPORT OF THE BOARD OF SUPERVISORS

*To the Trustees,
New York Orthopaedic Dispensary and Hospital.*

GENTLEMEN :

In the past year the Hospital has suffered an inestimable loss in the death of Mrs. de Rham, who served on the Board of Supervisors for forty-two years and acted as Treasurer for twenty-six. The spirit of this gentle and unassuming lady has acted as a leaven on this Board too long to be forgotten. Efficiency may be replaced but the gifts of the heart—never.

Mrs. Wilson, of whom she was fond, has been appointed Treasurer in her place.

The departure of Mrs. Choate for Washington necessitated her resignation as Secretary. This was received with great regret as for ten years she had most ably filled this position. Mrs. Wilmerding was appointed in her place.

Additional members elected to the Board are Mrs. De Lancey K. Jay, Mrs. Wm. Jay Schieffelin, Jr. and Miss Helen M. Rives.

The continued bad times have had their effect on the donations which have been less than last year.

The Hospital has received valuable help from the Sewing Society of the Church of the Holy Communion. This was timely and much needed and has been very gratefully received.

After years of devotion of the members and splendid work accomplished, it was decided to discontinue the Orthopaedic Hospital Sewing Society owing to the difficulty of securing new members to replace the old ones.

The Patients' Library has been made more enjoyable by the addition of subscriptions to the Society Library.

The report of the Private Pavilion shows an increase of patients and the Dispensary and Wards have been very busy.

The length of time the patients are required to stay in the Hospital gives an opportunity for a close relationship to grow up between them and the doctors and nurses. These give an inspired service and this kindly and devoted cooperation has its effect on many, whose eyes are forever after lifted unto the Hills.

Respectfully submitted,

HELEN WILMERDING,
Secretary.

REPORT OF THE SURGEON-IN-CHIEF

*To the Board of Trustees of New York Orthopaedic
Dispensary and Hospital.*

GENTLEMEN :

At the beginning of the year 1934 there were 5,370 Dispensary patients carried forward from 1933. 10,970 new cases were received in the Dispensary during 1934, a slightly increased number from 1933. Table I is a classification of the types of conditions which brought these new patients to us.

Table II is the report of the Dispensary visits, there having been 94,169 visits in 1934. The Visiting Nurses made 3,507 visits to 2,938 patients in their homes.

Table III is the detailed report of the manufacture of instruments in the Brace Shop. 3,477 new instruments were made and 3,053 were repaired.

Table IV is the Hospital report for the year 1934. It shows that 411 patients were discharged cured, 873 improved under treatment, 62 showed no improvement, 2 were incurable, 2 died, and 7 were transferred to other hospitals. It also records that 122 patients had tuberculous joints; 65 had fractures, 7 being of the spine; there were 125 cases of non-tuberculous deformities and developmental conditions of the spine; and 301 cases of deformities and developmental conditions of the feet and legs.

Table V is the report of the operations performed in 1934, a total of 2,486; 1,433 patients were operated on.

CITY HOSPITAL: The number of patients in the Hospital on January 1, 1934 was 95. The number admitted during the year was 1,208; 1,207 were discharged, and none died, leaving 96 patients in the Hospital on January 1, 1935. The average number in the wards each day was 95, and the average stay of each patient was 26.6 days. There were 24 waiting for beds at the end of the year. The number of patients treated was 1,303.

In the Private Pavilion 161 patients were treated during the year 1934.

Table VIII shows that 9,369 patients were x-rayed; 19,548 films were used.

COUNTRY BRANCH: The number of patients in the Hospital at the beginning of 1934 was 158; 467 were admitted during the year, 468 were discharged, and none died, leaving 157 in the Hospital on January 1, 1935. The total number of patients treated was 625. The average number of patients per day during the year was 162.

Table IX shows that at the Country Branch 1,105 patients were x-rayed, and 1,501 films were used.

Table VII is the report of the Pathological Laboratory and applies to both hospitals. A total number of 7,858 examinations was made during the year.

An outstanding feature of the work in the Hospital in recent years has been the improvement in the treatment of lateral curvature of the spine. This condition always has constituted one of the most difficult problems confronting orthopedic surgeons. The first great advance was made by Dr. Hibbs in 1914 when he demonstrated that the progress of the deformity could be arrested by the spine fusion operation.

The next step lay in evolving a method by which the curve could be corrected before the operation was performed. At first this was attempted by making traction on the head and pelvis as the patient lay in bed. A frame was then devised by which traction could be made from the side as well as from each end of the spine. Later on this was discarded for a plaster jacket which was applied while strong traction was made on the spine. The next improvement consisted of a hinge placed in one side of the jacket which was then wedged open by a turnbuckle on the opposite side. This was applicable only to curves in the lower part of the spine.

Finally Dr. Risser, holding an Annie C. Kane fellowship, developed an entirely new principle which consisted in bending the curve through a fulcrum placed directly at its center. This was carried out by means of a jacket having two hinges, front and back. It proved so successful that it is now possible to correct completely many cases and even the more advanced ones can be so balanced that the curve no longer is evident. This method was presented in 1934 at the meeting of the American Academy of Orthopedic Surgeons, and again last October at the New York Academy of Medicine. It has attracted wide attention and is considered one of the great advances in modern orthopedic surgery.

Dr. Willard C. Rappelye, Dean of the College of Physicians and Surgeons, made the following comments about the relation of the New York Orthopaedic Dispensary and Hospital to the College in his annual report, published June 30th, 1934: "The high

quality of the instruction and the stimulating influence of the staff of that institution are real assets to the program of the school. The fellowship plan of training recent graduates for the specialty of orthopedic surgery is as finely conceived as any program in the country. Those appointed to such positions are eligible now for the degree of Doctor of Medical Science of the University; several received the degree at the Commencement in June."

The following, who have completed fellowships, received the degree of Doctor of Medical Science during the past year: Doctors Howorth, Inge, Saunders and Toumey.

Dr. George A. L. Inge completed his fellowship on February 28th and was appointed Assistant Attending Surgeon; Dr. John T. Saunders, whose fellowship ended on March 31st, is now practicing in Asheville, North Carolina; Dr. Robert E. Hughes, whose fellowship ended July 31st, is practicing orthopedic surgery in San Francisco, California, is affiliated with several hospitals, and is on the teaching staff of the University of California; Dr. William H. von Lackum was appointed Attending Surgeon on December 31st, following the termination of his fellowship; Dr. Joseph C. Risser, formerly an Annie C. Kane Fellow, recently has begun the practice of orthopedic surgery in Pasadena, California.

The following completed their internships in 1934; Dr. Norman R. Brown, January 31st, now practicing orthopedic surgery in Spokane, Washington; Dr. Maurice N. Bellerose, April 30th, now practicing orthopedic surgery in Rutland, Vermont; Dr. James P. Cole, July 31st, and Dr. Frederick L. Liebolt, October 31st, both of whom were appointed to Annie C. Kane fellowships.

The following began their services as internes during the year 1934: Dr. Frederick R. Thompson, February 1st; Dr. Everett M. George, May 1st; Dr. John Fallon, August 1st, and Dr. Robert T. McElvenny, November 1st.

During the year 62 applications have been received for internships in this hospital from 20 different states, in addition to one from Canada and one from Scotland.

We appreciate more each year the advantages of our well equipped laboratory for diagnosis and the study of disease. The following experiments are now being carried on: A study of coxa plana by interfering with the blood supply of the head and neck of the femur in rabbits. Two preliminary series of these experiments have been completed and a third is now being started. It is planned to make a study of the effect of drilling the epiphyseal region on the rate of growth of long bones in rabbits, and the fate of bone chips of various sizes used in spine fusion operations.

The efficient administration of this Hospital under the direction of the superintendent, and the splendid cooperation of the entire personnel with the surgical staff are responsible for the smooth running of this organization and its development to a high level of effectiveness.

Committees have been appointed by the Board of Trustees, the Board of Supervisors, and the Alumni Association to raise a fund of \$100,000 as a memorial to our late Surgeon-in-Chief, to be known as "The Russell A. Hibbs Memorial". The income from this will be applied to the maintenance of the library which Dr. Hibbs gave to the Hospital and in which he took a great interest.

Considering the many demands on the members of the staff in carrying out the routine work of the Dispensary and Hospital and in teaching, it is encouraging to find that in addition considerable time has been spent in the investigation of a number of problems. This is reflected in the following list of papers published by the staff during 1934 and of others ready for publication:

PUBLICATIONS OF THE STAFF OF THE NEW YORK ORTHOPAEDIC
DISPENSARY AND HOSPITAL DURING THE YEAR 1934.

Atlanto-epistropheal subluxations. By Malcolm B. Coutts. Arch. Surg., 1934, 29: 297-311.

Open reduction in congenital dislocation of the hip. By Benjamin P. Farrell and M. Beckett Howorth. J. Bone & Joint Surg., 1935, 17:35-42.

Calcification in fat pads about the joints. By Albert B. Ferguson. J. Bone & Joint Surg., 1934, 16:418-422.

The clinical and roentgenographic interpretation of lumbosacral anomalies. By Albert B. Ferguson. Radiology, 1934, 22:548-558.

Coxa plana and related conditions at the hip. Part I. Classification and correlation of these conditions. Part II. A study of seventy-five cases of coxa plana. By Albert B. Ferguson and M. Beckett Howorth. J. Bone & Joint Surg., 1934, 16:781-803.

Hip joint tuberculosis treated by fusion operation. An end result study of one hundred and seventy unselected cases. By Halford Hallock and James W. Toumey, Jr. J. Am. Med. Assn., 1934, 103:1836-1840.

The correction of knee-flexion deformity, after poliomyelitis, by wedging plasters. By Robert E. Hughes and Joseph C. Risser. *J. Bone & Joint Surg.*, 1934, 16:935-946.

The treatment of acute suppurative arthritis. Report of thirty-six cases treated by operation. By George A. L. Inge and Frederick L. Liebolt. *Surg., Gynec. & Obstet.*, 1935, 60:86-101.

A review of acquired scoliosis. By Joseph C. Risser. Chapter in *Cyclopedia of Medicine*.

Posterior displacement of the fifth lumbar vertebra. By Alan DeForest Smith. *J. Bone & Joint Surg.*, 1934, 16:877-888.

PAPERS ACCEPTED FOR PUBLICATION.

Coxa magna; condition of the hip related to coxa plana. By Albert B. Ferguson and M. Beckett Howorth.

Roentgen features in arthritis. By Albert B. Ferguson, G. Douglas Taylor, and Martin H. Dawson.

Chapter on orthopedic conditions for a text book for students of physical education. By Halford Hallock.

Knee-flexion deformity following poliomyelitis; its correction by operative procedures. By Robert E. Hughes.

Experimental staphylococcus suppurative arthritis and its treatment with bacteriophage. By George A. L. Inge and James W. Toumey, Jr.

A study of the etiology and treatment of clawfoot, with a report of the results of the one hundred and two feet treated by anterior tarsal resection. By John T. Saunders.

Chapter on joint tuberculosis. To be published in *Nelson's Loose-leaf Surgery*. By Alan DeForest Smith.

PAPERS READ BUT NOT PUBLISHED.

Shelf stabilization of the hip. A report of fifty-three cases with particular emphasis on congenital dislocation. By M. Beckett Howorth.

The etiology and treatment of low back pain. By Alan DeForest Smith.

Scoliosis; treatment, with end-result survey. By Henry F. Ullrich.

Scoliosis; clinical aspects, treatment, and end results. By Henry F. Ullrich and Albert B. Ferguson.

PAPERS READY FOR PUBLICATION.

A statistical study of associated tuberculous lesions in five hundred and fifty-five patients with joint tuberculosis. By George A. Duncan.

Malunited fractures affecting the ankle joint, with special reference to an end-result study of those treated by ankle arthrodesis. By A. Gurney Kimberley.

End-results of wedging round back treated by fusion. By Leonidas A. Lantzounis.

Scoliosis: its prognosis. By Joseph C. Risser and Albert B. Ferguson.

Knee-joint tuberculosis. A study of two hundred and one cases treated by operative fusion. By James W. Toumey, Jr.

EXHIBITS.

Coxa plana and related conditions at the hip. Albert B. Ferguson and M. Beckett Howorth.

Treatment of scoliosis. Albert B. Ferguson and Henry F. Ullrich.

Posterior displacement of the fifth lumbar vertebra. Albert B. Ferguson.

WORK IN PROGRESS.

Butte, Felix L.:

Study of tendon transplants.

Cole, James P.:

Fracture-dislocations of the cervical spine.

Coutts, Malcolm B.:

Etiology of congenital clubfoot.

Pathology of congenital clubfoot.

Treatment of congenital clubfoot.

End-results of treatment of congenital clubfoot by conservative means, by soft-tissue operations, by bone operations.

Revision of terminology, disease and operative. Many of our suggestions on disease terminology were adopted by Dr. Logie for "A Standard Classified Nomenclature of Disease".

Duncan, George A.:

Coccygodynia.

Bone shortening. (With Benjamin P. Farrell).

Esquivel, Sandy:

Evaluation of sacro-iliac strain, sprain, etc.

Fallon, John:

Study of bone regeneration and bone replacement in human spine fusions.

Nerve supply to the knee-joint.

Ferguson, Albert B.:

Roentgenology at the New York Orthopaedic Hospital.

To be read at a meeting of the New Jersey Society of X-ray Technicians.

Report on operative stimulation of bone growth.

Studies in arthritis. With G. Douglas Taylor and Martin H. Dawson, Presbyterian Hospital.

Results of operation in coxa plana, slipping epiphysis, round back, scoliosis.

Brace treatment of round back.

Study of growth of long bones.

Cervical ribs in children.

Study of osteogenesis imperfecta.

George, Everett M.:

Spondylolisthesis.

Hallock, Halford:

Calcaneal tendon-lengthening in muscle-bound feet.

Reconstructions and arthroplasties of the hip-joint.

Operative results in Dupuytren's contracture of the palmar fascia.

Inge, George A. L.:

End-result study of synovectomy of the knee-joint.

Study of the deformity resulting from absence of peroneus longus muscle, and an operation for its correction.

Kimberley, A. Gurney:

Low back pain. Its etiology, diagnosis and treatment.

End-result study of tuberculosis of the ankle treated by arthrodesis.

Case reports of osteochondritis dissecans of the ankle.

von Lackum, William H.:

Tuberculosis of the spine. End-results of surgical treatment.
Spine studies in poliomyelitis.
(With Albert B. Ferguson) Long bone growth in poliomyelitis.
Lumbosacral backache.

Lantzounis, Leonidas A.:

Observations on congenital clubfoot.

Liebolt, Frederick L.:

Fusion of the ankle to stabilize the knee in poliomyelitis.
Mortality rate at the New York Orthopaedic Hospital, with
particular attention to tuberculosis.

Norcross, John R.:

Spine fusion for fractured spines.

Smith, Alan DeForest:

The use of heterogenous bone grafts in the treatment of osteo-
genesis imperfecta.

Swift, Walker E.:

An analysis of one hundred and seventy-five biopsies done on
suspected tuberculous joints.
A study of five hundred erythrocyte sedimentation rates to
determine their value as an aid in the diagnosis and
prognosis of orthopedic conditions.

Thompson, Frederick R.:

Spine fusion for sciatica.

Ullrich, Henry F.:

Scoliosis; history, treatment and end-results.

Respectfully submitted,

BENJAMIN P. FARRELL,
Surgeon-in-Chief.

TABLE No. 1

Summary of New and Old Cases — January 1, 1934, to December 31, 1934

1934 DIAGNOSES	New Cases	1-3 Years	4-16 Years	Over 16 Years	Old Patients Return- ing to Dispensary	Total
DISEASES OF THE BODY AS A WHOLE:—						
Psychobiological unit.....	34	14	9	11	13	47
Infection.....	17	1	5	11	4	21
Due to static mechanical abnormality.....	149	2	95	52	10	159
Metabolic Diseases.....	46	20	9	17	15	61
REGIONAL DISEASES:—						
Due to prenatal influence.....	12	5	4	3	4	16
Due to trauma.....	95	1	16	78	15	110
Due to disturbance of innervation or of psychic control.....	2	2	1	3
Due to circulatory disturbance.....	3	3	3
New growths.....	14	1	1	12	2	16
Unknown cause.....	70	6	64	70
DISEASES OF THE SKIN AND SUBCUTANEOUS AREOLAR TISSUES:—						
Prenatal influence.....	5	5	5
Infection.....	257	3	62	192	25	282

REPORT OF THE SUPERINTENDENT

*To the Board of Trustees,
New York Orthopaedic Dispensary and Hospital.*

GENTLEMEN :

I have the honor to submit the report of the Superintendent for the year 1934.

In the past year this institution has been fortunate in being able to carry on to full capacity and offer treatment to all eligible patients who applied. This service has been achieved in the face of the economic catastrophe which has decreased revenues from hospital endowment while increasing the number of persons in need of free hospitalization.

During the year 94,169 visits were made to our Dispensary. Of this number 10,970 were first visits made by new patients, 1,000 of whom were unable to pay the registration fee.

In the wards 1,303 patients were treated and 34,773 days' care were given. The cost per patient day was \$6.15, and 21,514 free days of care were given. The average number of patients in the wards per day was 95. The average stay per patient was 26 days.

The Social Service Department has been extremely active during this year, with 1,510 cases referred to it. Not only has advice been given and adjustments in the family and home made, but braces, x-rays, coal, food and transportation have been provided. This expansion of service has been made possible through the establishment of a Social Service Relief Fund, which was composed in part of gifts of generous friends and in part by an allotment from another fund.

In the X-ray Department 19,548 x-ray films were taken. For 8,826 of the new Dispensary patients 18,396 x-ray films were ordered. This indicates the vital importance of the x-ray in the diagnosis of orthopedic conditions.

The Pathological Laboratory has been carrying on research work in bone growth but as yet has nothing definite to report. During the year 7,858 examinations were made.

The Nursing Department of the Hospital has had few changes in its permanent staff. Fifty post-graduate students in orthopedic nursing were graduated during 1934. The post-graduate course

given here includes instruction in adjusting braces, turning the patients, caring for plaster casts, and, in general, the proper care of orthopedic surgical patients and those suffering from paralytic deformities. These students spend three months in the city hospital and one month in our Country Branch. We have had more calls from outside hospitals for nurses trained here than we can supply, and it is pleasing to know that the nurses who fill these positions give excellent satisfaction.

The medical library is highly valued by the visiting doctors and internes. There are 1,347 volumes on its shelves and subscriptions are placed for 17 medical journals. This coming year an endowment fund is being sought as a memorial to Dr. Russell A. Hibbs, the founder of the library. The fund is greatly needed for the purchase of new books and the maintenance of the library.

Private Pavilion occupancy has been much higher during 1934 than for several years previous. There were 3,692 patient days. Early in the year the price of the rooms was reduced in the hope of making it easier for the person of limited means to avail himself of hospitalization in a private room.

The Country Branch is being used as a hospital to a greater extent each year. Of the 169 beds about 90 are being occupied by bed patients. The remaining 79 are used by ambulatory patients. About ten days after operation patients are sent to the Country Branch, where they are kept until able to return home. Later they again visit the Dispensary for observation and further treatment if necessary.

The Country Branch had 59,218 patient days, and of these 24,709 free days' care were given. The average stay of the patient was 95 days, the daily census was 162. The bed patients are given occupational therapy and provided with books. The children confined to bed have regular bedside teaching. The up-patient's days are busy ones with occupational therapy, recreation, including movies, games and reading. Dances and parties of all kinds are planned by the patients with the aid of the recreation leader. The up-children attend school in class-rooms. All patients are taken out of doors every day, bed patients being wheeled in their beds out on the porches. It has been proven that fresh air and the quiet of the country are indispensable factors in a patient's restoration.

The Brace Shop, which proves its worth daily, has changed in its scope along with the great changes in orthopedic surgery. It was established sixty-two years ago in the basement of the old hospital building at 126 East 59th Street. The Year Book for that

year, 1873, speaks proudly of the "large workshop with machinery driven by steam power." The man who was in charge of the shop was also engineer of the building and he took the first x-rays. He had two helpers and a large number of braces was made. This first foreman died in 1926 after having served the hospital for fifty-two years.

When the present hospital building was erected, in 1915, a complete Brace Shop, equipped with modern machinery was installed. Several rooms are required for the brace-making, as well as a sewing room and a room for the plaster work. In 1896, twenty-three years after the shop was started, Dr. Shaffer reported that "the future of orthopedic surgery depends upon the deliberate study and development of the mechanical aspect of the work." In 1924, twenty-eight years after this statement was made, Dr. Hibbs said that the great falling off in the number of braces made in the shop, notwithstanding that the number of patients treated had increased 115%, was due to the modern cures by operations. This statement is true today. During the epidemics of infantile paralysis the work in the shop has increased, but it remains true today that the brace is not worn for as long a period of time as it was formerly in a great many cases, and in some it is not used at all. The first published report of the Brace Shop was in 1879, in which year the number of patients treated was 1,031, and the number of braces made was 315. In other words, 31% of the patients wore braces. In 1934, the number of patients treated was 16,340, and 647 braces were made, showing that now only .004% of the patients are fitted with braces. It is interesting to note that while the number of braces made has decreased, the number of operations performed has increased. In 1873 no operations were performed here, while in 1934 there were 2,486 operations.

To the friends of the Hospital who have given of their time and money we are most grateful. I also wish to thank all who are working with me at the Hospital and Country Branch for their loyalty to the institution.

Respectfully submitted,

THEODORA S. ROOT,
Superintendent.

BRACE SHOP

AUDITORS' CERTIFICATE

*New York Orthopaedic Dispensary and Hospital,
New York, N. Y.*

We examined the accounts of NEW YORK ORTHOPAEDIC DISPENSARY AND HOSPITAL maintained on a cash basis by the Central Hanover Bank and Trust Company, as assistant treasurer, for the year ended December 31, 1934.

In connection with our work we visited the City Dispensary and Hospital and the Country Branch in order to substantiate the remittances, by the branches, of receipts from patients, city aid and contributions to the assistant treasurer and also the remittances from the latter to the branches as recorded in the accounts kept by the assistant treasurer.

We did not examine the investment securities, real estate mortgages and mortgage participations owned at December 31, 1934, nor request confirmation of the balances of the mortgages by direct correspondence with the mortgagors, but we received a certified list of such items from the Central Hanover Bank and Trust Company, the custodian thereof.

Real estate mortgages and mortgage participations, including past due and open items and mortgages on which interest is in arrears, are shown in the accompanying statements at face amount or at cost if less, as market quotations are not available to us.

Subject to the foregoing, we certify that, in our opinion, the accompanying balance sheets and related statements of receipts and disbursements set forth the consolidated position of the City Dispensary and Hospital and the Country Branch, and the positions of the Legacy under the Will of Caroline A. James and the Annie C. Kane Fellowship Fund as at December 31, 1934, together with the results of operations on a cash basis for the year then ended.

LYBRAND, ROSS BROS. & MONTGOMERY.

New York, April 3, 1935.

NEW YORK ORTHOPAEDIC DISPENSARY AND HOSPITAL

Alonzo Potter, Treasurer

Consolidated Statement of Receipts and Disbursements, City Dispensary and Hospital, and Country Branch
For Year Ended December 31, 1934

Receipts:

Received from patients for board, professional care, etc.	\$163,372.48
City aid	116,233.38

ANNUAL REPORT
OF THE
ORTHOPAEDIC HOSPITAL GUILD
For 1934

The Orthopaedic Hospital Guild, through its forty-three years of existence, has performed the services for which it was organized, namely: "To support a bed or beds in the ward known as the Orthopaedic Hospital Guild Ward. To supply linen, comforts and necessities to patients in that Ward." But now the membership of the Guild has decreased and conditions have changed so that it was decided, with regret, that the Guild should disband, which it did legally on February 7, 1935.

Respectfully submitted,

AGNES L. JOHNSON,

Secretary.

REPORT OF THE JUNIOR GUILD

The work of the Junior Guild has been the same for the past year. Our meetings are held at the Hospital on the second Wednesday of each month.

Our various activities include maintaining a bed, supplying all clothing used in our wards, a payment towards the salary of our visiting nurse, a monthly sum to her for supplying milk to children whom she visits after their discharge from the Hospital, and sending ice-cream at Easter. At Christmas we fill white cotton and wool stockings with toys for each child, and the stockings are used for the children afterwards.

The necessary funds for these activities are raised through dues, donations, yearly appeals, and a rummage sale held every autumn.

During Lent we meet every Wednesday morning to make garments for the wards.

Respectfully submitted,

FLORENCE S. KOBÉ,
Secretary.

REPORT OF THE JUNIOR GUILD

From January 1, 1934 to December 31, 1934.

Receipts		Expenditures	
Balance, January 1, 1934	\$1,182.39	Toward Nurse's Salary	\$ 500.00

The sum of \$7,500 endows a bed in perpetuity, and the sum of \$350 endows a bed for one year.

FORM OF CERTIFICATE TO THE DONOR OF AN
ENDOWED BED IN PERPETUITY

New York Orthopaedic Dispensary and Hospital

This is to Certify that the New York Orthopaedic Dispensary and Hospital through its Trustees has received from

.....
herein designated as the donor, a fund of Seven Thousand Five Hundred Dollars, for the purpose of founding and maintaining in accordance with its corporate powers an endowed bed in its Hospital in perpetual memory of

.....
The donor shall have the privilege of nominating the occupant of said bed, but such nomination and the use of said bed shall be subject to all such rules and regulations governing endowed beds, and providing for the treatment, reception and discharge of patients as now exists or which may hereafter be enacted by the Board of Trustees of said Dispensary and Hospital.

Witness this corporate seal of the New York Orthopaedic Dispensary and Hospital, and the signatures of two of its officers, this.....day of.....one thousand nine hundred and.....

.....
Secretary.

.....
President.

FORM OF BEQUEST

I bequeath to the New York Orthopaedic Dispensary and Hospital, a corporation incorporated under the Laws of the State of New York, the sum of..... dollars to be applied to the benevolent uses and purposes of said hospital.

INTERNE SERVICE

The house staff consists of eight internes, each serving for two years. Appointments are made in February, May, August and November, and only those who have served a two year general hospital internship are eligible.

Application blanks will be sent upon request.

ANNIE C. KANE FELLOWSHIPS

Fellowships known as the Annie C. Kane Fellowships have been established at this hospital. These fellowships offer to selected young surgeons who have first completed their internship in this hospital an opportunity to continue their training in orthopedic surgery for from three to five years, and will carry a salary.

REPORT OF THE PRESIDENT

*To the Board of Trustees and the Board of Supervisors
of the New York Orthopaedic Dispensary and Hospital.*

LADIES AND GENTLEMEN :

The statistics for the year 1935 show that while the hospital work has remained fairly constant as regards number of patients and number of patient days, there has been a falling off in the patronage of the Dispensary. The number of visits to the dispensary surgeons, to the massage department, to the physiotherapy department and to the club-foot clinic was less than in 1934. The total number of visits to the Dispensary fell from 94,707 to 89,915.

There seems to be no clear reason for this shrinkage, but it is understood that similar conditions have obtained in the general dispensaries throughout the city. There was an increase, however, in the service to private patients as evidenced by the figures for the Private Pavilion during the past year.

On the financial side there was a falling off in income from investments, but this was more than offset by increases in donations and subscriptions and by payments from the City of New York. The usual reserve for renewals and betterments was set up at the Country Branch, and by appropriating from the reserve of the James Fund we were able to close the books at the end of the year without a deficit.

It is a satisfaction to know that our properties in all respects have been well maintained and continue to be rated in Class I, as to plant and administration, by the State Board of Charities.

On the professional side the work of the staff has been appreciated and recognized. Dr. Farrell as Professor of Orthopaedic Surgery at the College of Physicians and Surgeons, and Dr. Smith as Associate Professor, having been reappointed to these respective positions. They are conducting their course of lectures at the College. The course in applied anatomy as related to orthopedics conducted by the younger members of our staff is being continued by the college.

The new degree of Doctor of Medical Science established last year by Columbia University was granted then to four of the

staff. This year Doctors Ullrich and Duncan are preparing theses to qualify for this advanced degree.

The number of Fellows appointed by the Annie C. Kane Fellowship Committee remains as heretofore.

A gratifying number of articles have been published this past year in the various medical and surgical magazines by members of the staff. These, largely of a technical character, are indications that the staff, and especially the Kane Fellows, appreciate and are taking advantage of their opportunities for research and original study.

Dr. Farrell was given the opportunity to address the radio audience on the after-care of infantile paralysis under the auspices of the New York Tuberculosis and Health Association and the New York Academy of Medicine.

The Trustees approved and authorized a rearrangement of the Medical Staff to go into effect January 1, 1936. This created the positions of Assistant Surgeon-in-Chief and of two Associate Attending Surgeons. To the first, Dr. Alan DeForest Smith has been appointed in recognition of his long association with the hospital and his outstanding ability. As Associate Attending Surgeons two members of the staff will be appointed to serve one year in rotation. It is thought that by this method stimulus will be given the younger men and opportunities offered for development in administrative and executive lines.

The experimental work for the study of bone growth mentioned in the last report as having been undertaken by the staff, is being continued and it is hoped that important results will be developed by this study.

During the past year the Russell A. Hibbs Memorial Library Fund has been increased by gifts amounting to something in excess of \$6,000. These, on a wholly voluntary basis, are evidence of the regard and affection in which the memory of Dr. Hibbs is held. It is hoped that this fund may grow so that the library in which he was so deeply interested may have adequate and continuing support.

To the Staff, the Superintendent and the employees for faithful and devoted service, I express the thanks and appreciation of the Trustees and Supervisors.

Respectfully submitted,

ROBERT S. BREWSTER,

President.

REPORT OF THE BOARD OF SUPERVISORS

*To the Trustees,
New York Orthopaedic Dispensary and Hospital.*

GENTLEMEN :

In the past year the Board of Supervisors and the Hospital as a whole have suffered a great loss in the deaths of Mrs. Alexander and Miss Hamilton. Mrs. Alexander had served forty-four years on the Board, thirty-five years as President. Miss Hamilton had served forty-two years, twenty-nine as Secretary. Both had filled their offices with ability and distinction and those who saw their labor and devotion will not forget.

Two other losses have been sustained by the resignations of Mrs. Henry White and Mrs. Whitridge. These were received with regret. Mrs. White gave one of the two houses which formed the old hospital buildings. She had served on the Board for forty-eight years and, while her generous interest still continues, her faithful attendance will be greatly missed. Three new members were elected to fill these vacancies.

It is gratifying to be able to report that on the whole the Hospital has had a good year. The free beds are still provided for. There are ten nurses who work in the Social Service Department and the Dispensary. It has been decided to start a Social Service Fund with the legacy left by Mrs. Alexander, the Board all agreeing that something on that order is what she would have preferred.

The Junior Guild has maintained its high standard of usefulness. Amongst other things it contributes a free bed, supplies some clothing for the sixth floor ward and contributes towards the salary of a nurse.

The Orthopaedic Hospital Red Cross Unit gives valuable help, meeting every week during the winter to make dressings.

In the past year the expenses reported by the Superintendent were within her budget. An increased budget will be necessary for the coming year because of rising prices.

We are proud to report that the State inspection placed the hospital in the highest rank.

The Board wishes to thank the kind friends who contributed money for the Christmas fund and the ninety-five Christmas baskets which were distributed among the poor families of our patients.

Respectfully submitted,

HELEN C. WILMERDING,
Secretary.

REPORT OF THE SURGEON-IN-CHIEF

*To the Board of Trustees of New York Orthopaedic
Dispensary and Hospital.*

GENTLEMEN :

There were 16,018 patients who visited our Dispensary during the year 1935, 10,410 of whom were new cases. Table I is a classification of the types of conditions which brought these cases to us.

Table II is the report of the Dispensary visits, there having been 89,915 visits in 1935.

Table III is the detailed report of the manufacture of instruments in the Brace Shop, 3,236 new instruments having been made, and 3,091 having been repaired.

Table IV is the Hospital report for the year 1935. It shows that 23 patients were discharged cured, 1,221 improved under treatment, 87 showed no improvement, 0 were incurable, 4 died, and 10 were transferred to other hospitals. It also records that 116 patients had tuberculous joints; 59 had fractures, 11 being of the spine; there were 157 cases of non tuberculous deformities and developmental conditions of the spine; and 329 cases of deformities and developmental conditions of the feet and legs.

Table V is the report of the operations performed in 1935, a total of 2,431; 1,473 patients were operated on.

CITY HOSPITAL: The number of patients in the Hospital on January 1, 1935 was 96. The number admitted during the year was 1,177; 1,174 were discharged and 3 died, leaving 96 patients in the Hospital on January 1, 1936. The average number in the wards each day was 96, and the average stay of each patient was 27.4 days. There were 77 waiting for beds at the end of the year. The number of patients treated was 1,273.

In the Private Pavilion 174 patients were treated during the year 1935.

Table VIII shows that 9,082 patients were roentgenographed; 18,931 films were used.

COUNTRY BRANCH: The number of patients in the Hospital at the beginning of 1935 was 157; 532 were admitted during the year, 622 were discharged and 1 died, leaving 166 in the Hospital on January 1, 1936. The total number of patients treated was 689. The average number of patients per day during the year was 167.

Table IX shows that at the Country Branch 1,082 patients were roentgenographed and 1,499 films were used.

Table VII is the report of the Pathological Laboratory and applies to both hospitals. A total number of 7,658 examinations was made during the year.

The appointments of Dr. Alan DeForest Smith as Assistant Surgeon-in-Chief and of Dr. Leonidas A. Lantzounis and Dr. James W. Toumey, Jr. as Associate Attending Surgeons were made by the Board of Trustees, to become effective on January 1st, 1936. It is believed that the appointment of two associate attending surgeons will improve the work of both the dispensary and ward services. Dr. Halford Hallock was made Attending Surgeon at the Country Branch for the ensuing year in addition to his other duties.

The work done by the Staff in the teaching of orthopedic surgery at the College of Physicians and Surgeons, Columbia University, was recognized by the appointment of Dr. Smith as Clinical Professor and by the promotion of Dr. Hallock and Dr. Lantzounis to the rank of Assistant Professor and of Dr. von Lackum and Dr. Howorth to that of Associate. Part of the clinical teaching of the fourth year students at the hospital is done by the Fellows, and it is intended that each Fellow shall receive an appointment as assistant instructor in the department of orthopedic surgery of the College during the latter part of his term. The opportunity that is afforded the Fellows to teach anatomy and applied anatomy continues to play an important part in their training.

Dr. Malcolm B. Coutts received the degree of Doctor of Medical Science from Columbia University on the completion of his fellowship. His thesis on congenital club-foot is an important contribution to the knowledge of that subject. Dr. Coutts was appointed to the staff of the fracture service at Presbyterian Hospital and was continued as an instructor at the College of Physicians and Surgeons.

Four men completed their internship during the past year: Dr. Harry L. Leavitt, now associated with the Roosevelt Clinic, Seattle, Washington; Dr. Sandy Esquivel, now in private practice

in Austin, Texas; Dr. Felix L. Butte, who was given an Annie C. Kane fellowship and began his duties here on August 1st; and Dr. John R. Norcross, now practicing orthopedic surgery in Chicago.

A plan has been adopted for the more definite instruction of interns by a series of seminars with the senior members of the staff. A program also has been elaborated which will insure the house staff of a definite period of work in the several departments of the clinic and in the laboratory. For several years Dr. Ferguson has been giving a course in roentgenology, which is very popular with the interns.

The excellent functioning of the various departments of the hospital and of the Country Branch continues to reflect the efficient administration of the superintendent.

A conspicuous improvement is evident in the treatment of congenital club-foot. A large number of these patients is brought to the clinic each year and their treatment consumes so much time and requires such careful consideration that a special clinic was created to care for this group. The improvement in the results has shown the wisdom of this step. Discoveries which have been made during the past few years have led to changes in the method of treatment and to far more satisfactory results.

As a result of the marked increase in the incidence of poliomyelitis in New York City during the past summer 177 new victims of this disease were admitted to the clinic and are under active treatment. This has added much to the activities of the surgeons, visiting nurses and physio-therapy department. Twenty-four of these patients were admitted to the Country Branch where the majority still are under treatment.

All the members of the Staff are continuing their investigations of the various conditions coming within the scope of orthopedic surgery, and have contributed a number of papers to various journals, some of which were read at meetings of the different medical societies. The medical library plays an indispensable part in this work. Without the reference books, indexes and journals which it makes available to the Staff it would be difficult for them to carry on their researches. It is hoped therefore that we will continue to receive contributions to the Hibbs Memorial Library Fund, which is to be used for the maintenance of the library.

Following are the titles of the papers which were published by the Staff during the year; others which are ready for publication, and a summary of the work now in progress:

PUBLICATIONS OF THE STAFF OF THE NEW YORK ORTHOPAEDIC
DISPENSARY AND HOSPITAL DURING THE YEAR 1935.

Ferguson, Dr. Albert B. and Howorth, Dr. M. Beckett: Coxa magna: a condition of the hip related to coxa plana. J. Am. Med. Assn., 1935, 104:808-812.

Howorth, Dr. M. Beckett: Shelf stabilization of the hip. A report of fifty-three cases with particular emphasis on congenital dislocation. J. Bone & Joint Surg., 1935, 17:945-952.

Hughes, Dr. Robert E.: Knee-flexion deformity following poliomyelitis. Its correction by operative procedures. J. Bone & Joint Surg., 1935, 17:627-639.

Inge, Dr. George A. L. and Toumey, Dr. James W., Jr.: Experimental staphylococcic suppurative arthritis and its treatment with bacteriophage. Arch. Surg., 1935, 31:642-661.

Kimberley, Dr. A. Gurney: Low back pain: its etiology, diagnosis and treatment. Western J. Surg., Obstet. & Gynec., 1935, 43:699-709.

Smith, Dr. Alan DeF.: Section on Tuberculosis of bones and joints in chapter on Orthopedic Surgery. Nelson Loose-Leaf Surgery, 3:15-46.

PAPERS READY FOR PUBLICATION.

Coutts, Dr. Malcolm B.: Congenital clubfoot. Thesis written in partial fulfilment of requirement for the degree of D.Sc. (Med.) from Columbia University.

Coutts, Dr. Malcolm B.: Wedging-plaster technique as applied to the treatment of congenital clubfoot.

Duncan, Dr. George A.: Skeletal and extra-skeletal lesions associated with joint tuberculosis.

Duncan, Dr. George A. and Ferguson, Dr. Albert B.: Benign giant cell tumor of the fourth lumbar vertebra.

Ferguson, Dr. Albert B.: Foot comfort pads.

Ferguson, Dr. Albert B.: Roentgen features of rheumatoid arthritis.

- Inge, Dr. George A. L.: Congenital absence of the medial sesamoid bone of the great toe.
- Kimberley, Dr. A. Gurney: Malunited fractures affecting the ankle joint with special reference to twenty-two cases treated by arthrodesis.
- Liebolt, Dr. Frederick L.: The incidence of tuberculous meningitis in joint tuberculosis. Non-operative treatment and operative treatment.
- Liebolt, Dr. Frederick L.: Mortality in orthopedic surgery. Twenty-three-year report of the New York Orthopaedic Dispensary and Hospital.
- Risser, Dr. Joseph C. and Ferguson, Dr. Albert B.: Scoliosis: its prognosis.
- Smith, Dr. Alan DeF.: Use of homologous bone grafts in osteogenesis imperfecta.
- Swift, Dr. Walker E.: Frozen-section diagnosis of tuberculous joints.

PAPERS READ BUT NOT PUBLISHED.

- Farrell, Dr. Benjamin P.: The after-care of infantile paralysis.
- Smith, Dr. Alan DeF.: Acute suppurative arthritis.
Causes of low back pain.
Scoliosis.

WORK IN PROGRESS.

- Butte, Dr. Felix L.:
Naviculocuneiform arthrodesis in the treatment of flat feet.
Congenital scoliosis.
- Cole, Dr. James P.:
Fractures and fracture-dislocations of the lower cervical spine. ('With Dr. A. B. Ferguson) Round back.
Osgood-Schlatter disease.
New type of hinge for the knee joint.
- Duncan, Dr. George A.:
Painful coccygea.
Tendon transplantations of the foot in poliomyelitis patients.

Fallon, Dr. John :

Bone repair in spine fusion.

Ferguson, Dr. Albert B. :

Posterior displacement of the fifth lumbar vertebra.

Non-traumatic origin of spondylolisthesis.

Medullary drilling.

Bone and related tissues.

Descriptive terms in roentgenology.

A new method of taking lateral views of the femoral neck.

Spontaneous collapse of vertebrae.

George, Dr. Everett M. :

Spondylolisthesis and spine fusion.

Hallock, Dr. Halford :

Arthroplasty of hip.

Results of calcaneal tendon-lengthening in muscle-bound feet.

Congenital pseudarthrosis of the tibia.

Howorth, Dr. M. Beckett :

Closed reduction of congenital dislocation of the hip.

Open reduction of slipped upper femoral epiphyses.

Spine fusion for compression fracture.

Calcaneonavicular coalition.

Case report : Ecchinococcus cyst of femur.

Inge, Dr. George A. L. :

Synovectomy of the knee joint.

Pathology of synovial membrane.

Kimberley, Dr. A. Gurney. :

Low back pain : its etiology, diagnosis and treatment, with special reference to a comparative study of end-results from non-operative and operative treatment.

Osteochondritis dissecans of the ankle joint.

von Lackum, Dr. William H. :

Tuberculosis of the spine. A twenty-year study of surgical end-results.

(With Dr. A. B. Ferguson) Inequality in leg lengths, treated by drilling of diaphyses of tibia, fibula and femur.

Lateral curvature of the spine in poliomyelitis.

Lantzounis, Dr. Leonidas A. :

Pre-adolescent wedging round back treated by the spine fusion operation. An end-result study.

Liebolt, Dr. Frederick L.:

Fusion of the wrist. A report of forty-two cases.
Fusion of the ankle to stabilize the knee.

Smith, Dr. Alan DeF.:

Comparative anatomy of the omovertebral bone in congenital elevation of the scapula.

Swift, Dr. Walker E.:

Rabbit experiments on effect of interfering with the circulation of the femoral neck and head.

Blood sedimentation rates in tuberculosis of bones and joints.

Two glomus tumors.

Bilateral discoid lateral semilunar cartilage.

Results of giant cell tumors of bone and osteitis fibrosa cystica treated by packing of cavity with bone chips.

Repair of bone after spine fusion operation.

Seven semilunar cartilages with cyst formation.

Studies on the stimulation of the rate of growth at the epiphyseal line in the long bones of rabbits.

Thompson, Dr. Frederick R.:

Lumbosacral and sacro-iliac tuberculosis.

Coxa vara.

Operative treatment for flat feet.

Toumey, Dr. James W., Jr.:

End-result study of tuberculosis of knee joint.

Ullrich, Dr. Henry F.:

Scoliosis. Study of present treatment with end-result review of 253 cases treated by wedging jackets and spine fusion.

Respectfully submitted,

BENJAMIN P. FARRELL, M.D.,

Surgeon-in-Chief.

REPORT OF THE SUPERINTENDENT

*To the Board of Trustees,
New York Orthopaedic Dispensary and Hospital.*

GENTLEMEN :

I have the honor of submitting the report of the superintendent for the year 1935.

During this period there were 35,005 patient days in the Hospital in the city and 61,072 at the Country Branch, making a total of 96,077. The number of patients treated in the city was 1,273, and at the Country Branch 689. The per capita cost per patient day in the city hospital was \$5.92, and at the Country Branch it was \$3.23. The difference in cost is explained by the fact that the city hospital carries the patient through the period of operative procedure and acute illness, while at the Country Branch the less expensive post-operative and convalescent care is given. Patients are sent to the Country Branch much sooner after operation than was the custom a few years ago, and it is no longer merely a convalescent home. The average length of stay of the patient in the city hospital was 27 days and in the country 88 days.

The nursing service in the Hospital and at the Country Branch has been carried on in the usual efficient manner, and few changes have been made in the staff. The post-graduate course in orthopedic nursing has been continued ; forty-nine nurses completed the course in 1935.

The Private Pavilion has been busier this year than for several years, 174 patients having been treated there and 4,020 patient days of care given.

Visits to the number of 89,915 were made to the dispensary and the nurses of the social service department made 3,075 visits to patients' homes. In all cases where surgery is advised a social service nurse visits the patient's home in an attempt to interpret the hospital to the patient and his family and to seek cooperation, and also to carry out the doctor's orders for treatment. This department is also responsible for providing patients required by the medical staff for demonstration in teaching, and for the weekly post-operative follow-up clinics. The social service department disbursed from special funds some \$6,000. for braces, arches, x-rays, clothing and many other necessities for patients who could not provide for themselves. A Christmas fund supplied ninety dinner baskets for the families of needy patients. Mrs. Edward S. Harkness makes generous provision for a summer in the

country for a certain number of under-privileged children, and in the period from April to October 40 children selected from among our patients were at Dorcas House, New London, Connecticut. These months of outdoor life, excellent care and food do much to build up resistance and in some cases to condition patients for further surgery.

From the brace shop we have lost our oldest employee, John J. Hughes, who was retired at the end of 1935 because of his age. Mr. Hughes came into the employ of the Hospital in 1879 and had played his part in the making of its history during his many years of service. He had seen the brace shop grow from small beginnings to a large, well-equipped department and had had a large share in making it the efficient service it is today.

The medical library is an important factor in the work of our hospital, providing as it does means for study and research. There are now 1,424 volumes in the library, 77 having been added during 1935, and the library subscribes for 17 medical periodicals. One of the accessions was a life of Russell A. Hibbs, by Dr. George M. Goodwin, an account of the important achievements of Dr. Hibbs and his contributions toward the improvement of orthopedic surgery. The Russell A. Hibbs Memorial Library Fund has been started to perpetuate the library in which he was greatly interested and to which he had given liberally.

We have also patients' libraries in the city and at the Country Branch. The borrowing of books amounted to 17,623 volumes in 1935. From those to whom books are indispensable there are frequent expressions of surprise and gratification that there is a library available for their use.

The usual amount of repairs and painting has been done in both the city and country hospitals. The engines in the city hospital have been completely overhauled this year.

We have received many donations and contributions and a great many organizations and individuals have contributed in different ways towards the welfare of the patients, for all of which we are most grateful.

In closing may I express my appreciation to the Board of Trustees and to the Supervisors for their most generous support and advice, and I thank the staff and employees for their cooperation in the work of the hospital.

Respectfully submitted,

THEODORA S. ROOT,
Superintendent.

AUDITORS' CERTIFICATE

*New York Orthopaedic Dispensary and Hospital,
New York, N. Y.*

We have made an examination of the accounts of the NEW YORK ORTHOPAEDIC DISPENSARY AND HOSPITAL maintained on the basis of cash receipts and disbursements by the Central Hanover Bank and Trust Company, as assistant treasurer, for the year ended December 31, 1935.

In connection with our examination we visited the City Dispensary and Hospital and the Country Branch in order to substantiate the remittances, by the branches, of receipts from patients, city aid and contributions to the assistant treasurer and also the remittances from the latter to the branches as recorded in the accounts kept by the assistant treasurer, but we did not make an examination of the accounts kept at the branches.

Real estate mortgages and mortgage participations, including past due and open items and mortgages on which interest is in arrears, are shown in the accompanying statements at face amount or at cost if less, as market quotations are not available to us.

We did not examine the investment securities, real estate mortgages and mortgage participations owned at December 31, 1935, nor request confirmation of the balances of the mortgages by direct correspondence with the mortgagors, but we received a certified list of such items from the Central Hanover Bank and Trust Company, the custodian thereof.

Subject to the foregoing, in our opinion, based upon such examination, the accompanying balance sheets and related statements of income and surplus fairly present, in accordance with accepted principles of accounting consistently maintained during the year under review, the consolidated position of the City Dispensary and Hospital and the Country Branch, and the positions of the Legacy under the Will of Caroline A. James and the Annie C. Kane Endowment Fund as at December 31, 1935, and the results of operations for the year 1935 on the basis of cash receipts and disbursements.

LYBRAND, ROSS BROS. & MONTGOMERY.

New York, March 16, 1936.

REPORT OF THE JUNIOR GUILD

The work of the Junior Guild has been about the same for the past year. Our meetings are held at the Hospital on the second Wednesday of each month.

Our various activities include maintaining a bed in the children's wards, supplying all clothing used in the wards, a payment towards the salary of our visiting nurse, a monthly sum to her for supplying milk to children whom she visits after their discharge from the Hospital, and sending ice cream at Easter. At Christmas we fill white cotton and wool stockings with toys for each child, and the stockings are used for the children afterwards.

The necessary funds for these activities are raised through dues, donations, yearly appeals, and a rummage sale held every autumn.

During Lent we meet every Wednesday morning to make garments for the wards.

Respectfully submitted,

FLORENCE S. KOBÉ,
Secretary.

REPORT OF THE JUNIOR GUILD

From January 1, 1935 to December 31, 1935

Receipts		Expenditures	
Balance, January 1, 1935	\$1,078.52	Toward Nurse's Salary	\$ 500.00
Interest	9.42	Endowed Bed	350.00

		Easter Ice Cream	8.40
		Clothing	101.02
			<u>\$1,606.55</u>
		Bank Balance, December 31, 1935	1,364.29
			<u>\$2,970.84</u>

MELINDA G. REMSEN,
Treasurer.

The sum of \$7,500 endows a bed in perpetuity, and the sum of \$350 endows a bed for one year.

FORM OF CERTIFICATE TO THE DONOR OF AN
ENDOWED BED IN PERPETUITY

New York Orthopaedic Dispensary and Hospital

This is to Certify that the New York Orthopaedic Dispensary and Hospital through its Trustees has received from

.....
herein designated as the donor, a fund of Seven Thousand Five Hundred Dollars, for the purpose of founding and maintaining in accordance with its corporate powers an endowed bed in its Hospital in perpetual memory of

.....
The donor shall have the privilege of nominating the occupant of said bed, but such nomination and the use of said bed shall be subject to all such rules and regulations governing endowed beds, and providing for the treatment, reception and discharge of patients as now exists or which may hereafter be enacted by the Board of Trustees of said Dispensary and Hospital.

Witness this corporate seal of the New York Orthopaedic Dispensary and Hospital, and the signatures of two of its officers, this.....day of.....one thousand nine hundred and.....

.....
Secretary.

.....
President.

FORM OF BEQUEST

I bequeath to the New York Orthopaedic Dispensary and Hospital, a corporation incorporated under the Laws of the State of New York, the sum of..... dollars to be applied to the benevolent uses and purposes of said hospital.

INTERNE SERVICE

The house staff consists of eight internes, each serving for two years. Appointments are made in February, May, August and November, and only those who have served a two year general hospital internship are eligible.

Application blanks will be sent upon request.

ANNIE C. KANE FELLOWSHIPS

Fellowships known as the Annie C. Kane Fellowships have been established at this hospital. These fellowships offer to selected young surgeons who have first completed their internship in this hospital an opportunity to continue their training in orthopedic surgery for from three to five years, and will carry a salary.

COUNTRY BRANCH—WHITE PLAINS, N. Y.

REPORT OF THE PRESIDENT

*To the Board of Trustees and the Board of Supervisors
of the New York Orthopaedic Dispensary and Hospital.*

LADIES AND GENTLEMEN :

The work of the hospital continues without any noticeable change in the numbers cared for from year to year, our facilities being used to their full capacity.

The tendency toward smaller numbers treated in the Dispensary still persists. This was noted in last year's annual report and while the loss in total number of visits to the Dispensary was not so marked, still it was appreciable; the figures being for 1936, 86,998 as against 89,915 in 1935. No clear reason for this is apparent, but an effort is being made to learn if similar tendencies are noted in other comparable institutions.

There has been a gratifying increase in the patronage of the Private Pavilion, more patients having been treated there, with a consequent increase in the number of patient days.

During the year substantial repairs were made to the roof and cornices of the City hospital, which may be regarded as an unusual expenditure, although generous provision is made yearly for maintenance and repairs. Our friends may have the satisfaction of knowing that the entire plant is kept up adequately.

On the financial side the situation was satisfactory. Due in part to the larger contribution from the United Hospital Fund and to larger payments from the City for caring for those patients in the category of city charges, the year closed with a slight balance of receipts over expenses. The Treasurer's statement published in this report gives the financial picture in greater detail.

On the professional side, your attention is drawn to the report of the Surgeon-in-Chief in which are given the activities of the staff in the field of teaching, in research and in original work. The number of papers published indicates the importance of the oppor-

tunities offered by our hospital for study and shows that the staff are leaders in the science of Orthopedics.

Dr. Farrell continues as Professor of Orthopedic Surgery at the College of Physicians and Surgeons of Columbia University, with Dr. Smith as Associate Professor. The younger members of the staff are associated with them in their teaching work and students from the college visit the hospital for bedside and clinical instruction.

Six physicians served under appointment as Kane Fellows during the year, qualifying by service and by submitting a thesis, for the degree of Doctor of Medical Science, Columbia University.

At the Country Branch, except for the construction of a line to carry off the waste from the power house, a much needed improvement, no incidents of importance are to be noted. The number of patients admitted was somewhat smaller and the number of patient days in consequence somewhat less than last year. The X-Ray, Dental and Massage Departments however, show an increased volume of work.

Both hospitals continue to be rated in Class I as to plant and administration by the State Board of Charities.

To the Staff, the Superintendent and the employees for faithful service, I express the thanks and appreciation of the Trustees and Supervisors.

Respectfully submitted,

ROBERT S. BREWSTER,
President.

REPORT OF THE BOARD OF SUPERVISORS

*To the Board of Trustees,
New York Orthopaedic Dispensary and Hospital.*

GENTLEMEN :

The Annual Meeting of the Board of Supervisors of the New York Orthopaedic Dispensary and Hospital was held on December 8th, 1936, at 11 A.M., at the hospital.

It is pleasant to report a good year. The volume of work has been about the same as in past years. Owing to the fact that there has been no epidemic, few cases of infantile paralysis have been treated. Cases of tuberculosis of the joints are becoming rarer. Better preventive medicine is the cause of this.

The rising prices have necessitated an increase of \$2,000.00 to a budget of \$89,740.00. The efficiency of the superintendent was the cause of a saving of \$3,505.97 and that without any diminution of comfort to either patients or personnel.

The hospital and the Country Branch have needed considerable repairs, all of which have been attended to.

The Social Service has been very active. Many cases for relief have come in in spite of the great number of families who are still on Home Relief.

The Junior Guild, one of the hospital's great assets, has as usual backed the hospital in the most efficient manner. It supplies a very great deal of clothing for the children and \$500.00 towards the salary of a visiting nurse.

The Board of Supervisors is also deeply grateful to the Hospital Unit of the American Red Cross for the many dressings they made for the operating room.

Respectfully submitted,

HELEN C. WILMERDING,
Secretary.

REPORT OF THE SURGEON-IN-CHIEF

*To the Board of Trustees of New York Orthopaedic
Dispensary and Hospital.*

GENTLEMEN :

There were 15,662 patients who visited our Dispensary during the year 1936, 10,156 of whom were new cases. Table I is a classification of the types of conditions which brought these cases to us.

Table II is the report of the Dispensary visits, there having been 86,998 visits in 1936.

Table III is the detailed report of the manufacture of instruments in the Brace Shop, 3,234 new instruments having been made and 3,141 having been repaired.

Table IV is the hospital report for the year 1936. It shows that 14 patients were discharged cured, 1,262 improved under treatment, 83 showed no improvement, 2 died, and 21 were transferred to other hospitals. It also records that 89 patients had tuberculous joints; 45 had fractures, 8 being of the spine: there were 253 cases of non-tuberculous deformities and developmental conditions of the spine; and 387 cases of deformities and developmental conditions of the feet and legs.

Table V is the report of the operations performed in 1936, a total of 2,441; 1,453 patients were operated on.

CITY HOSPITAL: The number of patients in the hospital on January 1, 1936 was 96. The number admitted during the year was 1,207, 1,206 were discharged and 1 died, leaving 96 patients in the hospital on January 1, 1937. The average number in the wards each day was 95.5, and the average stay of each patient was a little over 26 days. There were 34 waiting for beds at the end of the year. The number of patients treated was 1,303.

In the Private Pavilion 186 patients were treated during the year 1936.

Table VIII shows that 10,034 patients were roentgenographed; 20,127 films were used.

COUNTRY BRANCH: The number of patients in the hospital at the beginning of 1936 was 166; 500 were admitted during the year, 523 were discharged and none died, leaving 143 in the hospital on January 1, 1937. The total number of patients treated was 666. The average number of patients per day during the year was 162.

Table IX shows that at the Country Branch 1,260 patients were roentgenographed and 1,972 films were used.

Table VII is the report of the Pathological Laboratory and applies to both hospitals. A total number of 9,215 examinations was made during the year, and 2,355 patients were examined.

As was expected, the Annie C. Kane fellowships have been a most important factor in causing this hospital to take front rank in graduate medical education in this country. The influence of this institution on orthopedic practice is being extended each year as more of our graduates establish themselves in various parts of the country. The success which these men have attained and the important part which they are taking in this work speak well for the soundness of this plan of training.

The enthusiastic cooperation of Columbia University in recognizing these fellowships by placing them under university supervision and awarding the degree of Doctor of Medical Science to those fellows who have presented a satisfactory thesis and who have passed an examination on their work, has added greatly to their value.

Dr. Hibbs' comprehension of the need for better training of surgeons after their internship marked him as a pioneer in this as in many other phases of his work. It is now generally recognized that short courses of a few weeks or months are entirely inadequate for training a specialist, and that a longer period of training, such as is offered in this hospital, is necessary. Boards of certification have been formed in various specialties, including orthopedics. Their requirements are becoming increasingly exacting, and soon only those who are thus certified will be allowed to practice orthopedics.

The full significance of our fellowship can better be understood by reading the following outline of the work required, which recently was submitted to the faculty of the College of Physicians and Surgeons and which was endorsed by Dean Rappelye:

The candidates for the degree of Doctor of Medical Science are holders of the Annie C. Kane fellowships at the New York Orthopaedic Dispensary and Hospital. To be eligible for a fellowship they must have completed a two years internship in the Orthopaedic Hospital, or its equivalent in some other accepted hospital. The fellowships are given for a period of not less than three years. The fellows are paid adequate salary, are required to spend their full time at the hospital and are not permitted to engage in private practice. Their duties at the hospital combine practical work in the wards and out patient department, in which they perform the functions of Assistant Attending Surgeon under the supervision of senior members of the staff.

In addition to this they are required to work on problems having to do with orthopedic surgery, one of which is a major

problem and is the subject of the thesis for the degree. These combine clinical investigations and work in anatomy, pathology and bacteriology. Instruction in anatomy is stressed because it is believed that a thorough knowledge of this subject should be the foundation of the training of an orthopedic surgeon. The fellows are given an opportunity to act as voluntary instructors in the course in first year anatomy in the College of Physicians and Surgeons and they also act as junior instructors in the course in applied anatomy in the third year. Work in pathology is done in the laboratory in connection with the investigations which are used as the basis of the thesis, and also in assisting in postmortem examinations and in attendance at the bi-monthly clinical-pathological conferences.

Each fellow is put in charge of a service in the out patient department where his work is supervised by the Chief Surgeon and the attendings of the Clinic. He there sees an unusually large number of all kinds of orthopedic conditions and becomes familiar with their diagnosis and treatment. In addition to this the fellows serve for a time in the special clinics for scoliosis and congenital club feet. They also spend sufficient time in the physiotherapy department to become familiar with this part of the treatment.

Fellows attend ward rounds and enter into the discussions about diagnosis and treatment of cases. They perform all routine orthopedic operations under the supervision of the senior members of the staff. Staff meetings are held monthly at which are discussed wound infections, deaths and other topics relating to the work in the hospital. Here papers by the fellows are presented to the staff. A symposium on some subject such as poliomyelitis, tuberculosis of the joints, etc. is held each year in which each subject is thoroughly discussed. Current literature is reviewed weekly, largely by the fellows, in the Journal Club. A well equipped library is maintained for the fellows and other members of the staff.

During 1936 four fellows presented theses and were examined by the faculty of Columbia University. All were accepted and received the degree of Doctor of Medical Science.

The operative treatment of tuberculous joints which was instituted in this hospital by Dr. Hibbs, and which was so strongly opposed for many years, has now been generally accepted as the correct one. An important study in confirmation of this principle has been made by one of the fellows. By analysing the records of all such patients treated over a period of forty-six years he has shown that tuberculous meningitis, a fatal complication, was almost ten times more common during a period of twenty-three years when no fusion operations were performed than it was during a similar period when the disease was treated surgically. This very con-

vincingly refutes the idea that tuberculosis is liable to be disseminated by surgical operations.

Graduate teaching also is being done in the field of nursing. Many special points about the care of orthopedic patients are not learned in the training school of a general hospital and to meet this need a four months course for graduates is given under the direction of our supervisor of nurses. That the school is a popular one is attested by the fact that many more applications are received than can be accepted. Since the beginning of the course in 1926 diplomas have been given to three hundred and seventy nurses. Forty-eight students graduate each year. Many of them now hold executive positions in orthopedic hospitals or services throughout the country.

The cordial cooperation of our Superintendent and the members of her staff with the surgeons has done much to help the latter in their work.

Dr. Henry F. Ullrich and Dr. George A. Duncan completed their Annie C. Kane fellowship during the year. Dr. Ullrich is practicing in Baltimore, Maryland, where he has been appointed on the staff of several hospitals and is continuing his work in scoliosis. Dr. Duncan is established in Norfolk, Virginia.

The following completed their internship: Doctors Everett M. George, John A. Fallon, Frederick R. Thompson, and Robert T. McElvenny. Doctors Thompson, George and McElvenny were appointed Annie C. Kane Fellows.

REPORT OF THE SUPERINTENDENT

To the Board of Trustees,

New York Orthopaedic Dispensary and Hospital.

GENTLEMEN :

I have the honor to present the report of the Superintendent for the year ending December 31, 1936.

This year the Hospital's beds were kept filled to 95% of their capacity. In the wards of the Hospital there were 34,824 patient days and at the Country Branch 61,072 patient days, making a total of 95,896 patient days. The cost per day in the Hospital was \$6.04, while at the Country Branch it was \$3.42. This substantial difference in cost is explained by the fact that the city hospital carries the patient through the period of operative procedure and acute illness, while at the Country Branch post-operative and convalescent care are given.

In the Dispensary there were 15,656 patients treated, and 86,998 visits were made. The Dispensary is a very active part of the institution, as all patients admitted to the hospital are first admitted to the Dispensary. The social service department is a very necessary and important factor both in the Dispensary and in the Hospital.

For reports of the work done in the special departments such as the brace shop, laboratory, x-ray and others I refer you to the statistical tables. The nursing department has continued to give excellent service to the patients.

In the Hospital there were few changes made in the administrative staff or employees. Extensive repairs were made on the building. New copper gutters were installed on the roof and much restoration work was done on the stucco and terracotta of the building. The usual amount of inside painting was done. At the Country Branch outside woodwork was painted and the usual necessary upkeep of walls inside the building continued. Each year as the buildings grow older they require more attention if they are to be kept in condition.

At the Country Branch a new child-development program was inaugurated for the bed patients as well as for the up-patients. This program is for children ranging from kindergarten to fourteen years of age. It is working out satisfactorily and we hope as time goes on we will be able to obtain good results.

I am most grateful to the Board of Trustees and the Board of Supervisors for their readiness to help at all times and to the heads of departments and co-workers for their cooperation and loyalty to the Hospital.

Respectfully submitted,

THEODORA S. ROOT,
Superintendent.

AUDITORS' CERTIFICATE

*New York Orthopaedic Dispensary and Hospital,
New York, N. Y.*

We have made an examination of the balance sheets of the

NEW YORK ORTHOPAEDIC DISPENSARY and HOSPITAL

as at December 31, 1936, which consist of the consolidated balance sheet of the City Dispensary and Hospital and the Country Branch, and the separate balance sheets of the Legacy under the Will of Caroline A. James and the Annie C. Kane Fellowship Fund, and of the related statements of income and surplus for the year 1936, which were prepared from the records maintained by the custodian, the Central Hanover Bank and Trust Company, on the basis of cash receipts and disbursements.

In connection therewith, we examined or tested accounting records maintained for the institutions by the Central Hanover Bank and Trust Company as custodian, and other supporting evidence, and obtained information and explanations from officers and employees of the custodian; we also made a general review of the operating and income accounts shown on the books kept by the custodian for the year, but we did not make a detailed audit of the transactions or of the accounting records maintained at the City Dispensary and Hospital and the Country Branch except to substantiate the remittances by these institutions to the custodian and remittances from the custodian to the institutions, as recorded by the custodian. Our examination of the income from patients, city aid and contributions received at the institutions and remitted to the custodian was limited to comparison of the total amounts recorded on the books kept by the custodian with the related amounts shown on the books maintained by the institutions.

Real estate mortgages and mortgage participations, including past due and open items and those on which interest is in arrears, are shown in the accompanying statements at face amount or at cost if less, as market quotations are not available to us. Hospital land, buildings and equipment are stated at cost without allowance for depreciation.

We did not examine the investment securities, real estate mortgages and mortgage participations shown at December 31, 1936 on the records kept by the custodian nor request confirmation of the balances of the mortgages by direct correspondence with the mortgagors, but we received certified lists of such items from the custodian.

It was impracticable for us to obtain direct confirmation and verification of contributions and legacies shown on the books kept by the custodian as received during 1936 for endowment, plant and current funds, but we examined such correspondence as was on file with respect to such items. We did not undertake to ascertain that provisions with respect to contributions and legacies have been observed or that the classification of the endowment and plant funds, as shown on the balance sheets, is in accordance therewith.

In our opinion, based upon such examination and subject to the foregoing comments, the accompanying balance sheets and related statements of income and surplus fairly present the consolidated position of the City Dispensary and Hospital and the Country Branch, and the positions of the Legacy under the Will of Caroline A. James and the Annie C. Kane Fellowship Fund as at December 31, 1936, and the results of operations for the year 1936 on the basis of cash receipts and disbursements.

LYBRAND, ROSS BROS. & MONTGOMERY.

New York, March 15, 1937.

NEW YORK ORTHOPAEDIC DISPENSARY AND HOSPITAL

Wm. Sheffield Cowles, Treasurer

REPORT OF THE JUNIOR GUILD

The work of the Junior Guild has been the same for the past year. We meet at the hospital on the second Wednesday of each month from October to May.

The funds for our various activities are raised through dues, donations, yearly appeals, which are sent out every February or March, and a rummage sale held every autumn.

We maintain a bed in one of the children's wards, supply clothing used in the wards, make a payment towards the salary of our visiting nurse, give her a monthly sum to be used for milk for children either before their entrance to the hospital for treatment or after their discharge from the hospital, and send ice cream at Easter. At Christmas we fill white cotton stockings with toys for each child, and the stockings are used afterwards for the children while in the wards.

During Lent we meet every Wednesday morning to make garments for the wards.

Respectfully submitted,

FLORENCE S. KOBÉ,

Secretary.

FORM OF CERTIFICATE TO THE DONOR OF AN
ENDOWED BED IN PERPETUITY

New York Orthopaedic Dispensary and Hospital

This is to Certify that the New York Orthopaedic Dispensary and Hospital through its Trustees has received from

.....
herein designated as the donor, a fund of Seven Thousand Five Hundred Dollars, for the purpose of founding and maintaining in accordance with its corporate powers an endowed bed in its Hospital in perpetual memory of

.....
The donor shall have the privilege of nominating the occupant of said bed, but such nomination and the use of said bed shall be subject to all such rules and regulations governing endowed beds, and providing for the treatment, reception and discharge of patients as now exists or which may hereafter be enacted by the Board of Trustees of said Dispensary and Hospital.

Witness this corporate seal of the New York Orthopaedic Dispensary and Hospital, and the signatures of two of its officers, this.....day of.....one thousand nine hundred and.....

.....
Secretary.

.....
President.

FORM OF BEQUEST

I bequeath to the New York Orthopaedic Dispensary and Hospital, a corporation incorporated under the Laws of the State of New York, the sum of dollars to be applied to the benevolent uses and purposes of said hospital.

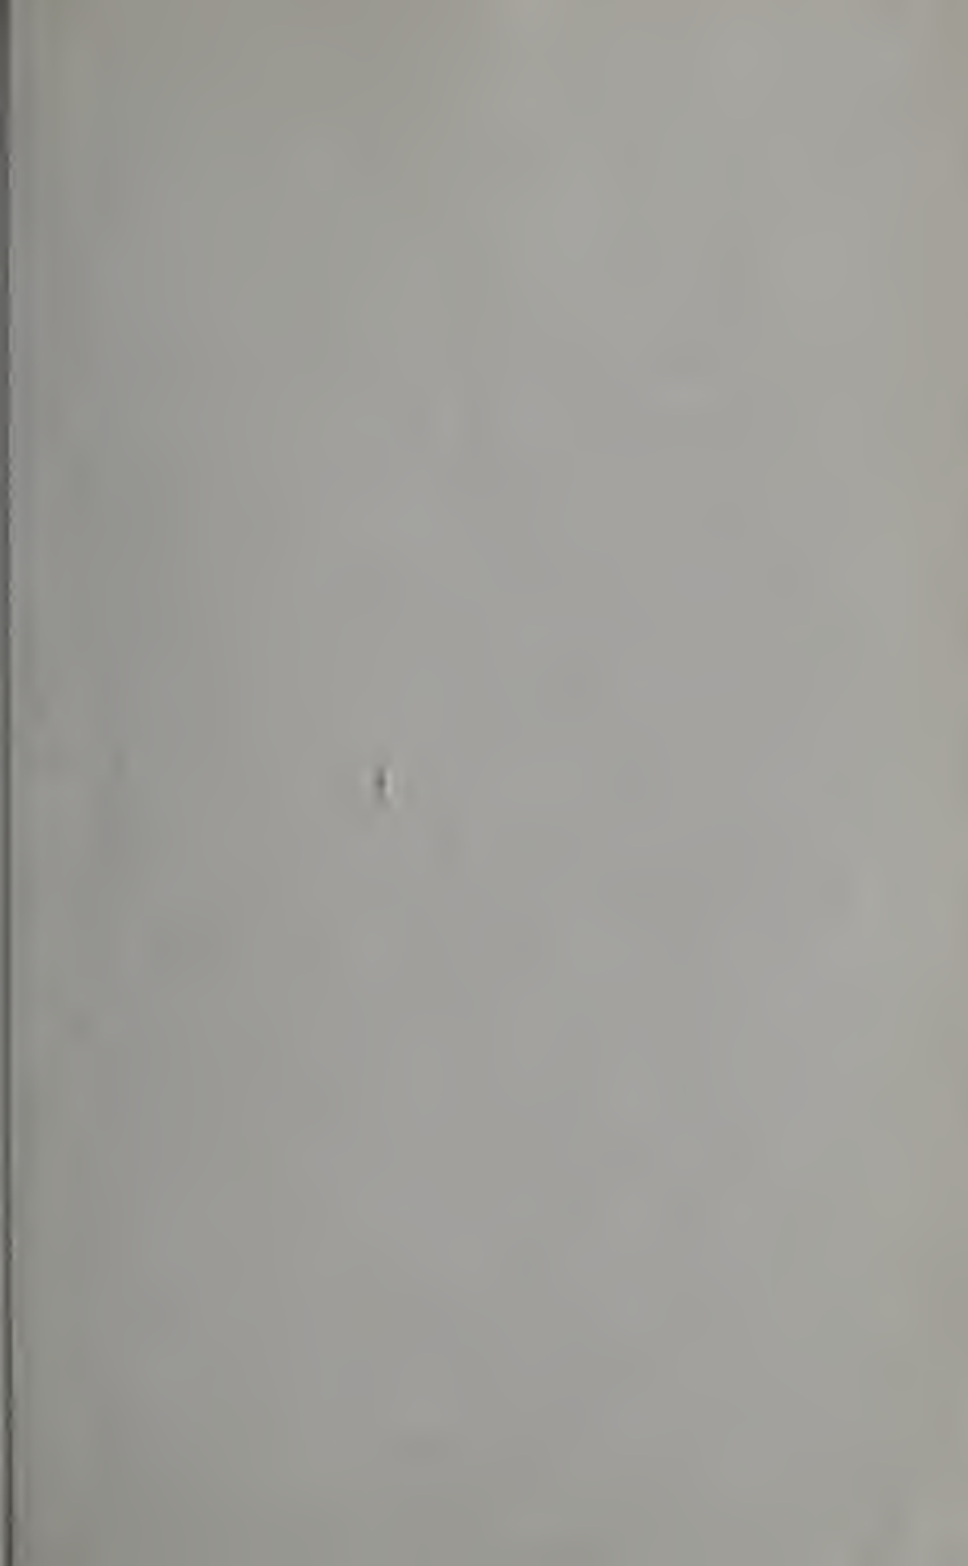

INTERNE SERVICE

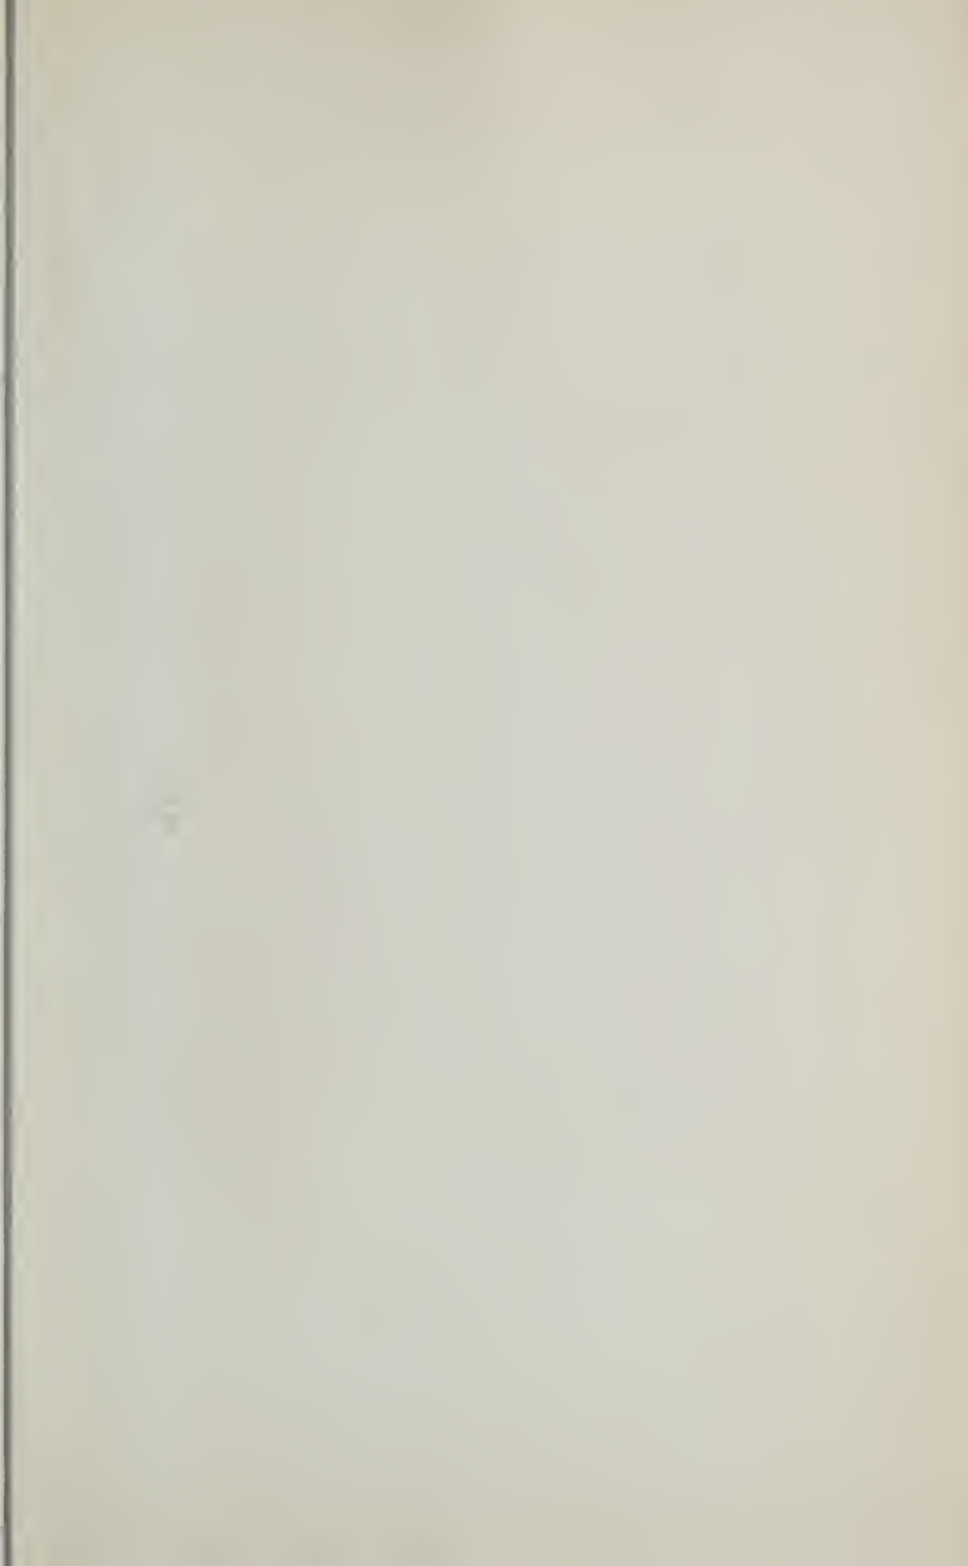

The house staff consists of eight internes, each serving for two years. Appointments are made in February, May, August and November, and only those who have served a two year general hospital internship are eligible.

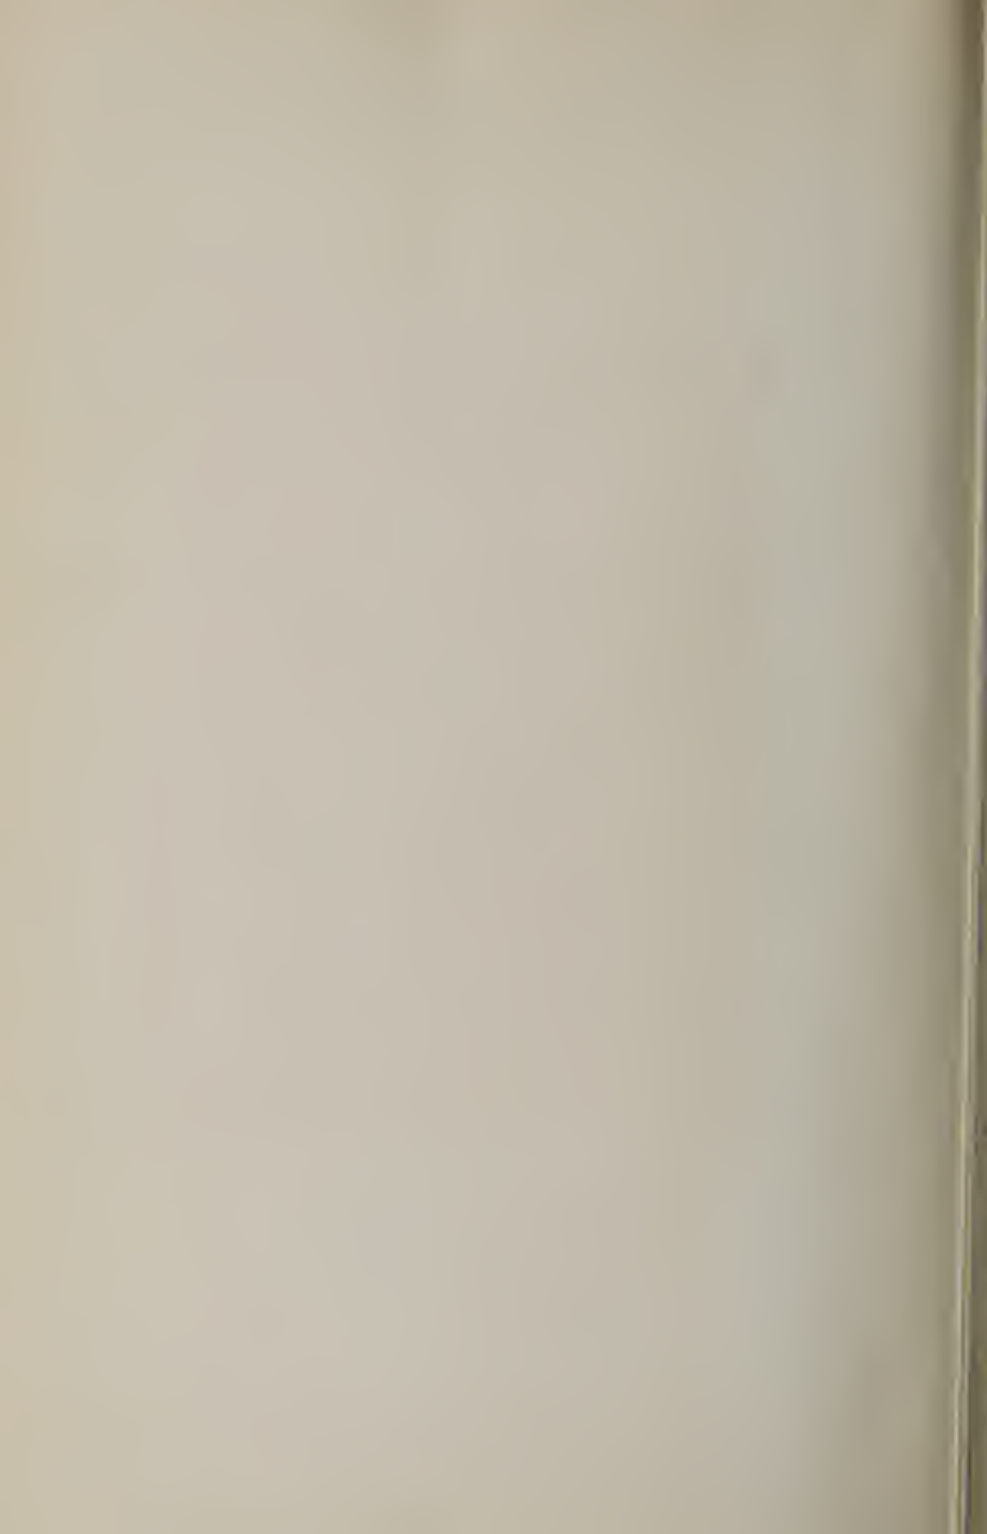

Application blanks will be sent upon request.

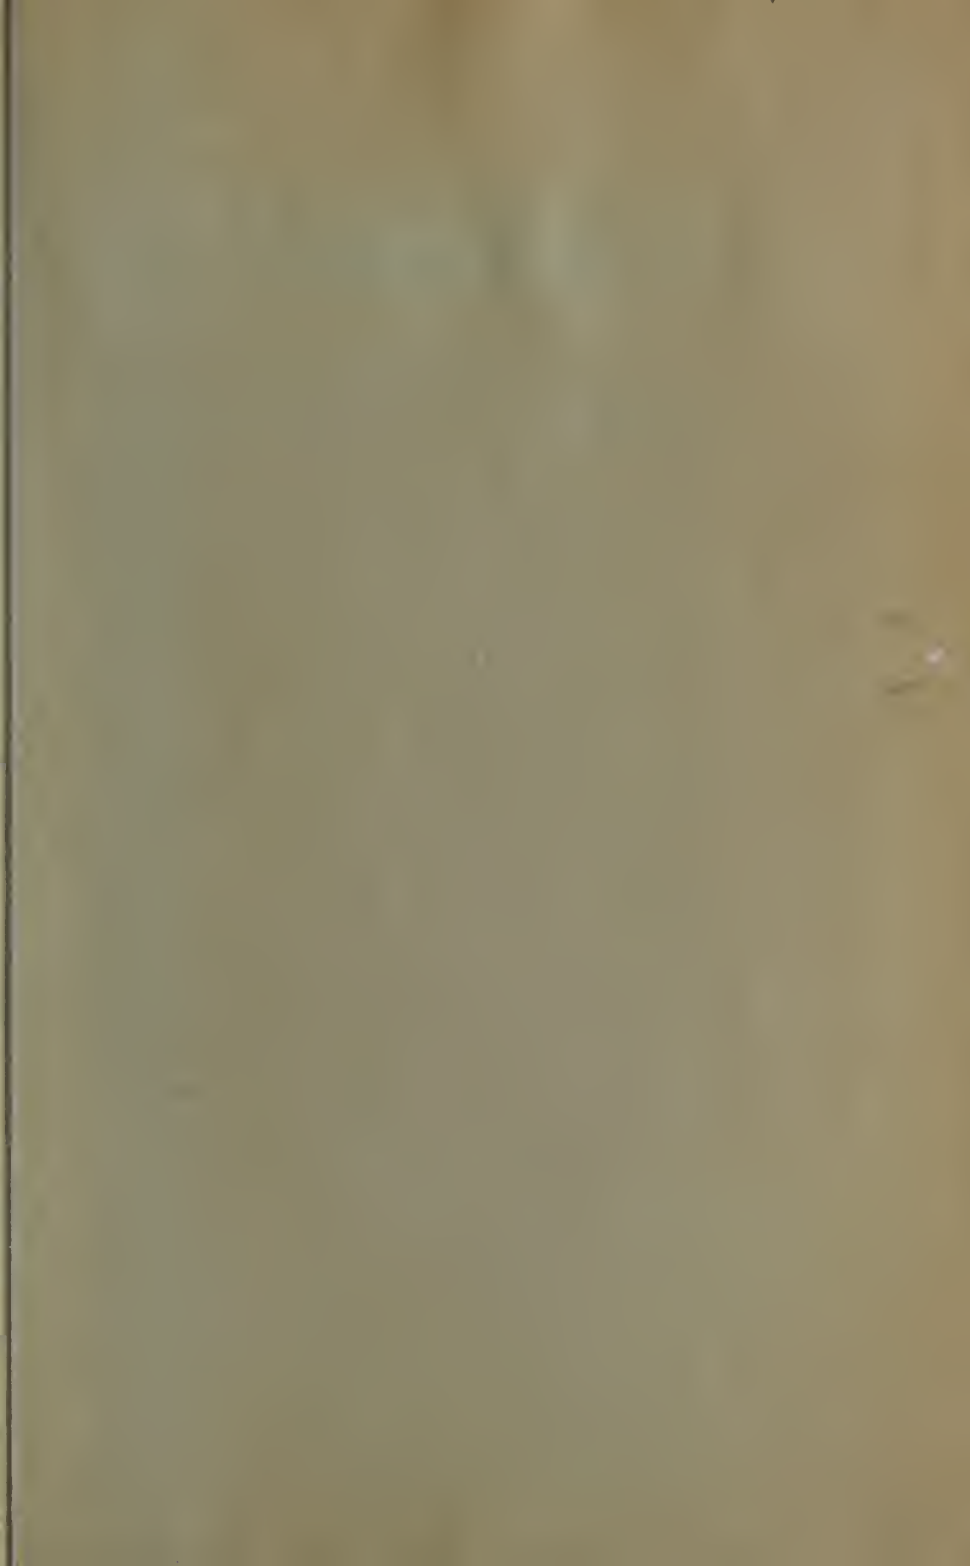

ANNIE C. KANE FELLOWSHIPS

Fellowships known as the Annie C. Kane Fellowships have been established at this hospital. These fellowships offer to selected young surgeons who have first completed their internship in this hospital an opportunity to continue their training in orthopedic surgery for from three to five years, and will carry a salary.
